Lancaster Farming

VOL. 25 No. 20 | Lancaster Farming, Saturday, March 15, 1980 | $7.00 Per Year

E.E. Denlinger, V.M.D., from Lancaster County, receives the Cattleman of the Year Award from Pa. Cattlemen's Association director Harry Stambaugh.

Weinberger crowned queen

Denlinger chosen Cattleman of Year

BY SHEILA MILLER

STATE COLLEGE — At their annual meeting on Thursday evening, the Pennsylvania Cattlemen's Association selected E.E. Denlinger, V.M.D., as Cattleman of the Year.

Denlinger accepted his award in front of the 144 cattlemen gathered in State College for this annual event.

Making the presentation, Harry Stambaugh, director, stated the cattlemen were grateful for Denlinger's service to the cattle industry.

After studying pre-veterinary courses at Franklin and Marshall College in Lancaster and receiving his veterinary degree from the University of Pennsylvania, Denlinger practiced in the Lancaster area for 22 years. His practice, physically located in Paradise, was concentrated in the large animal area.

In 1969, he accepted a position with the Pennsylvania Department of Agriculture as the superintendent of meat inspection. Denlinger explained when the federal government took over those responsibilities in 1972, he then became the head of the Bureau of Animal Industries for PDA.

Denlinger has served as a director for the Pa. Cattlemen's Association for over four years. He also serves on the Pa. Beef Council as a director.

Since his retirement from PDA in 1977, Denlinger has remained active in the programs affecting the livestock industry.

He resides in R2 Ronks, Lancaster County.

Other ceremonies at the cattlemen's annual meeting included the coronation of the 1980 queen.

Laura Weinberger, a junior at Penn State, was selected to represent the

Legislative roundup

Farmers flock to Washington

BY DICK WANNER

WASHINGTON, D.C. — Farmers from Pennsylvania nearly wore grooves in the road to Washington this week, as both the Pennsylvania Farmers Association and the Pennsylvania Grange sent members to the nation's capitol for meetings with their senators and representatives.

The Pennsylvania Farmers Association spent two days at the Quality Inn, within sight of the Capitol Building. Some 260 PFA members drove in from every part of the state to spend Wednesday and Thursday with their Congressmen and Congressional staff members.

Nearly every one of Pennsylvania's 25 Representatives - or a staff member - received a call from a PFA delegation. Senator Richard Schweiker paid a brief visit to Wednesday evening's banquet, and Representative Allen Ertel, from Dauphin County, spoke at length during

Local farmer nominated to Condemnation board

BY CURT HARLER

CONESTOGA — John E. Barley, Conestoga, was nominated this week by Governor Dick Thornburgh to serve on the state Agricultural Lands Condemnation Approval Board.

Also nominated for a four year term on the board is Charles Benner, Middleburg, Snyder County.

If approved, the pair will be the two required farmer-members to sit on the board. By law, other board members will include State Agriculture Secretary Penrose Hallowell, Environmental Resources Secretary Clifford Jones, and Transportation Secretary Thomas Larson.

The Ag Lands Condemnation Approval Board was created in December 1979 to determine the feasibility of condemning

Memories of a year ago

Farm family scrapbook recalls TMI

BY DICK ANGLESTEIN

MIDDLETOWN — Mrs. Clair Nissley, of Dauphin County, has kept a family scrapbook for the past 25 years.

Last year's scrapbook began much like many of the other years that traced the personal activities of the farm family living just across the Conewago Creek from Lancaster County.

January, 1979: "The beginning of another New Year and I spent a lot of time this winter getting our scrapbook up to date.

'We finally got the grandfather clock finished after setting around since 1976."

February: "Daddy gave me a valentine. We are really going through something now with the bridge away. We have to drive out of the way several miles every time we go to town, church, Grandpa Nissley and other places toward Elizabethtown."

(This entry refers to the Nissley Mill covered bridge which was burned by vandals in August, 1978.)

February 17: "Sharon made me a beautiful cake for my birthday."

March 13: "We started the horrible job of tearing up the old kitchen linoleum, which was in since 1960."

March 27: "Daddy's 48th birthday. I gave him a card and a blue shirt."

The very next day the Nissley family scrapbook takes a dramatic turn and recounts events that reached around the world.

On the pages following those containing the cards that Clair received for his birthday were pasted these few words clipped from a large, bold headline that appeared in the Middletown newspaper:

"7 Days March 28 - April 4."

The Nissleys, who live and farm in the shadow of Three Mile Island, recorded those first few unforgetable days following the nuclear accident.

Wednesday, March 28: "The nightmare began," Mrs. Nissley labeled her overall impression of the week or so that followed.

"I was in the kitchen working and suddenly decided to turn the radio on, which is unusual since I like it quiet. We first heard about the accident at Three Mile Island. As the day progressed and the news kept coming, we were wondering what was happening."

Her husband recalled he was packing eggs in the nearby 50,000-layer house at the time. He didn't know anything about what was happening a mile away at the plant until he came home for lunch. Then, he began to follow the news, too.

Thursday, March 29: "The helicopters are flying over our place and around the area at regular intervals."

Nissley snapped a photo of his 80-foot silo as a remembrance of that day and entered it in the scrapbook.

"Two photographers from Time and Newsweek came to the farm and wanted to take some pictures from the top of the silo," he said.

"I went along up and it took qute a time for them to climb the silo. They were huffing and puffing already

(Turn to Page A30)

From elevated field Clair Nissley has panoramic view of neighboring Three Mile Island Nuclear Power Plant.

HUBBARD WHITE MT BROILERS

Probing your dairy farm for better profits.

As the nutritional content of your cows' forage goes, so goes your milk yield and its profitability That's why this forage sampling is vital to your farm It catches the changes in nutritional content from one of your crops to another from one of your fields to another even from one set of weather conditions to another In short, it spots any nutritional over- or under-balance so you can do something about it

This forage sampling is a vital part of the Pennfield Computerized Total Ration Service. And here's how it works **1.** We collect samples of your forage **2.** Then we evaluate the quality of your forages. We determine the total digestible nutrients The fiber content The protein content The amount of carbohydrates **3.** The computer quickly spots any nutrients lacking in the forage For your milking cows And for your dry cows It immediately points out the overfeeding of nutrients. Underfeeding, too

J Shephard Wolff of Valley Acres Farm, RD #1, Newville, Pa., reviews forage sampling operation with Penn Pro Gene Schlosnagle while (inset) Mike Thomas, Supervisor of Quality Control, analyzes another forage sample in Pennfield's in-house laboratory

Both, of course, may be different at different times of the year And the printout will tell you what you need And when **4.** Your Penn Pro Professional advises you on the quantity and type of nutrients that should be added, to balance your total feeding program to your cows' nutritional requirements. **5.** The result can be increased milk production at the lowest possible feed cost.

The Pennfield Computer Total Ration Service could bring on your greatest growth act. In your milk yield And your profits

Try the Pennfield Computerized Total Ration Service There's no cost or obligation for this unique service to your dairy operation. Just phone us right now. Today. At Pennfield Feeds Local calls: Lancaster 299-2561, Red Lion 244-4511 In 717 and 215 areas dial toll-free 800-732-0467. Pennfield Feeds, Rohrerstown Road, Lancaster, PA 17604

Livestock market and auction news

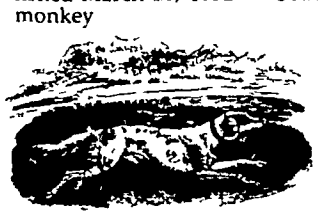
THE OLD FARMER'S ALMANAC

MARCH 17-23, 1980

Spring has sprung!

Don't remove winter mulches too soon Spring begins March 20 at 6 10 AM First quarter of the moon March 23 Average length of days for the week, 12 hours, 10 minutes Postal workers went on strike March 18, 1970 *Uncle Tom's Cabin* published March 20, 1852 Some people's manners would shock a monkey



Ask the Old Farmer: What is the meaning of the expression "getting a jim over the Johnson bar"? This was used commonly in the late 1920s and early '30s around Spokane, Wash., mostly among railroad and lumber workers O P, Seal Beach Calif

Had the same meaning as 'getting the show on the road' The throttle on a steam locomotive was called the Johnson bar, when the train was stopped it was straight up and down on the quadrant To start the engine and take the slack out of the cars the throttle was pushed down the quadrant to the stop pin As the slack was taken out, the throttle was gradually drawn back to running position

Home Hints: Keep ants out by putting talcum powder along their favorite entrances

OLD FARMER'S WEATHER FORECASTS

New England: Cloudy and cold to start, then snow turning to heavy rain coast, snow in mountains, weekend is rainy and milder

Greater New York-New Jersey Snow, 10"-15" north through end of week, showers for weekend, seasonal

Middle Atlantic Coastal Snowstorm throughout the week, by week's end, clearing and warming, few showers

Piedmont & Southeast Coastal: Cold wave starts the week, with rain east and snow west, through weekend, partly sunny and mild, possible showers

St. Louis Cattle

Thursday, March 13
Report supplied by USDA

Receipts This Week:	5,100
Week Ago:	4,500
Year Ago:	7,600

Compared to the previous weeks close, slaughter steers and heifers mostly .50 lower, except Holstein steers steady. Cows 2.00-3.00 lower. Bulls weak to 1.00 lower. Slaughter supply mainly Choice and Mixed Choice and Prime 2-4 slaughter steers, around 40 heifers and 10 cows.

SLAUGHTER STEERS: Mixed Choice and Prime 2-4 1050-1275 lb. 67.00-68.00, closing 67.50-68.00. Choice 2-4 950-1300 lb. 65.50-67.50, closing 66.00-67.50; couple loads 2-3 1025-1050 lb.s 67.75. Mixed Good and Choice 2-4 900-1200 lb. 64.50-66.00. Good 1-2 900-1175 lbs. 62.50-65.00. Standard to Good 2-3 1050-1350 lb. Holsteins 59.00-62.00.

SLAUGHTER HEIFERS: Mixed Choice and Prime 2-4 875-1050 lb. 65.50-66.50, package early 67.00; closing sales 65.50 to mostly 66.00, part load 66.25. Choice 2-4 800-1050 lbs. 64.00-66.00, mostly 64.00-65.50. Mixed Good and Choice 2-3 700-1000 lbs. 63.00-64.00. Good 2-3 700-975 lbs. 61.50-63.00.

COWS: Closing week sales utility and commercial 2-4 45.00-49.00. Boning Utility 1-2 49.00-51.00. Cutter 1-2 45.00-48.00. Canner and low Cutter 1-2 41.00-45.00.

BULLS: Yield Grade 1-2 1050-1900 lbs. 58.00-63.00. Yield Grade 1 1700-2000 lbs. 64.00-64.50. Individual outstanding yield grade 1 2450 lb. Holstein 65.00.

FEEDERS: (Including around 1,000 at the regular Thursday auction.) Feeders steers and heifers 2.00-4.00 lower. Supply mainly medium frame 1 400-800 lb. steers and 400-700 lb. heifers.

FEEDER STEERS: Medium Frame 1 - Lot 238 lbs. 102.00; L06 330 lbs. 93.00; 400-500 lbs. 80.00-87.00; 500-600 lbs. 75.25-84.00; 600-700 lbs. 75.00-80.50; 700-800 lbs. 66.25-72.75. Medium Farme 1-2 - Few lots 335-400 lbs. 80.00-85.75; few 625-675 lbs. 70.00.71.00. Large Frame 1-2 Holsteins - Lot 400 lbs. 76.75; 500 lbs. 67.75; couple lots 890-895 lbs. 58.50-58.75.

FEEDER HEIFERS: Medium Frame 1 - Lot 217 lbs. 92.50; 300-400 lbs. 75.25-83.00; 400-500 lbs. 70.00-75.50; 500-600 lbs. 68.25-73.00; few lots 600-700 lbs. 64.75-69.50. Medium Frame 1-2 - Few lots 490-560 lbs. 66.00-67.50.

Oklahoma Cattle

Thursday, March 13
Report supplied by USDA

Estimated Receipts	10,000
Same Day Last Week	7453

Trading active. Feeder steers and heifers over 400 lbs. fully steady; not enough sales under 400 lbs. to make an adequate test of the trade. Majority receipts Medium Frame 1 500-800 lbs. feeder steers and 400-700 lbs. heifers. Good buyer attendance.

FEEDER STEERS: Medium Frame 1 lot 345 lbs. 94.75; 400-500 lbs. 88.00-94.50; 500-600 lbs. 79.50-85.00, lot 510 lbs. thin 87.25; 600-700 lbs. 76.00-80.50, lot 81.75; 700-800 lbs. 73.50-78.75; 800-850 lbs. 72.75-74.50, fleshy 70.50-72.25. Large Frame 1 600-800 lbs. 73.25-79.00; lot 915 lbs. 71.00. Small Frame 1 500-600 lbs. 73.50-75.75. Medium Frame 1-2 package 375 lbs. 84.00; 500-600 lbs. 75.00-78.75. Large Frame 1-2 550-700 lbs. 73.00-77.75; 750-825 lbs. 69.75-72.00. Large Frame 2 Holsteins few 550-650 lbs. 63.75-65.75; 775-925 lbs. 60.00-61.25.

FEEDER HEIFERS: Medium Frame 1 lot 345 lbs. 82.00; 400-500 lbs. 72.50-80.00; 500-600 lbs. 71.75-74.50; 600-700 lbs. 69.00-73.50, fleshy 69.00-71.00; 700-750 lbs. 66.50-69.75. Large Frame 1 lot 775 lbs. 70.20. Medium Frame 1-2 few 500-600 lbs. 70.50-72.50, load 570 lbs. thin 73.85.

FOR THE WEEK: Feeder steers and heifers under 500 lbs. 4.00-7.00 lower; over 500 lbs. 2.00-4.00 lower. Slaughter cows 1.00-3.00 lower; late sales included Utility and Commercial 2-3 46.00-50.75, low dressing and YG 3-4 42.50-46.25. Slaughter bulls closed the week steady; package YG 1 high dressing 1700 lbs. at 70.75; YG 1-2 1300-1625 lbs. 61.50-67.50, mostly 62.50-67.50. This week's salable receipts near 28,700 head compared with 16,716 head one week ago and 25,022 head the same week a year ago. Feeder steers and heifers comprised 97 percent of this week's cattle receipts; cows and bulls near 3 percent.

Lancaster Farming says...

Food for thought on Ag Day

The coincidence of Ag Day on March 20 and the 100th anniversary of the New Jersey Experiment station this month is a bit much to ignore.

What better way to mark the First Day of Spring than by saluting farmers?

Ag Day's purpose is to make the 96 percent of the American population aware of the four percent which provides its daily food and fiber needs.

Non-farmers and farmers alike may be surprised to learn that American agriculture has assets nearly equal to the $790 billion in total worth of all the stocks listed on the New York Stock Exchange.

Ag Day promotions will say that because America's agriculture is the most scientifically advanced, efficient, and plentiful in the world, food in the United States still is a bargain.

The centennial of our neighboring research station underscores the many advantages farmers and farm researchers bring to this nation as a whole.

What gardener hasn't planted Rutgers tomatoes in the family patch? A tip of the hat to New Jersey research here, please.

Does the name Selman Waksman ring a bell? Trivia experts will identify him as the Nobel Prize winning soil scientist who discovered the antibiotic streptomycin — while working at Rutgers.

Almost all land grant schools have similar bright spots in their history

Ag Day, then, provides an opportunity to put such achievements into the limelight

Ag businesses will sponsor advertising aimed at the general public. One fine theme says the best way to keep peace is to have the most tractors, feeding the world rather than fighting it.

One explains the need for farm chemicals Another points out how well Americans are fed as compared to people elsewhere.

But among the themes there is one which will raise a red flag in front of most farmers. It highlights the relatively low cost consumers pay for food.

In some nations people don't complain about high food prices because there is no food available at any price.

If U S egg prices had increased at the same rate as transportation costs since 1958, eggs would run over $3.40 per dozen

Similarly, if milk prices increased at the same rate as housing costs in the last 20 years, milk today would cost about $4.50 a gallon

While all of that makes for good, breast-beating public relations with non-farmers, it should raise the hackles of every person who's ever run a tractor

Is it fair for farmers to accept anywhere from one-third to one-fourth of the price they might get for their goods? Should the 96 percent be allowed to thrive on the belt-tightening of the other four percent?

When labor unions accept major wage cuts for work they do in the public sector, when politicians work for the public rather than as paid promoters of special interests, when public employees forgo the right to strike, then we can begin to accept for a time the sacrifices made by the farm community Then we will agree the burden is being borne equally by the many rather than a few

Until then, farming deserves all the recognition it can get in any form

That includes Ag Day, the first day of Spring March 20 is our day Enjoy

THE BIBLE SPEAKS

BY LAWRENCE W. ALTHOUSE

ANNAS & CAIAPHAS

Lesson for March 16, 1980

Background Scripture:
John 11:45-53; 18:12-24.
Devotional Reading:
John 15:18-27.

After the Romans invaded and occupied the Jewish nation, the only Jewish leader with any kind of authority remaining was the high priest, and he ruled only at the sufferance of the occupying authorities. In the year A.D. 15 Annas, the high priest, was deposed by the Romans, apparently because he had not co-operated fully with the conquerors as they desired.

But this was not the end of Annas' power, for his son-in-law, Caiaphas, was appointed to succeed him and through him he continued to wield a great deal of power. Thus, in the Gospel According to John, we find both of them referred to as "high priest" — Annas still was referred to as "high priest" even though he no longer held that position, just as former presidents of the United States are still addressed as "Mr. President." In the case of Annas, however, he was more than just an ex-high priest.

The Romans Will Come!

These two men, then, Annas and Caiaphas, were the religious and, in some ways, secular authority of the Jews under their conquerors Their objective was clear: to maintain their authority without earning the disapproval of the occupying forces. So long as they were able to maintain this status quo, their power would remain intact. Thus, we can understand their concern in reporting of Jesus "If we let them go on thus, every one will believe in him, and the Romans will come and destroy both our holy place and our nation" (John 11:48). Jesus was clearly a threat to their power

Yet, Caiaphas, the ruling high priest, was clever enough to see that this man Jesus could be used to bolster his position. "You know nothing at all," he said to his fearful compatriots, "you do not understand that it is expedient for you that one man should die for the people and that the whole nation should not perish" (11.50).

It Is Expedient

Caiaphas used a word most translators render as "expedient". Expedience may mean one of two things. (1) that which is fit or suitable to the purpose, and (2) conducive to advantage as opposed to right. In other words, an expedient is a means to an end. But it is the second meaning that fits Caiaphas' use of the word He was not concerned with whether the death of Jesus was "right", but rather that it served his and their own selfish interests.

How often do we stand right there with Caiaphas and Annas, choosing the expedient rather than the right or just? How often do we choose dubious means for the best-intentioned purposes? These two men would fit well into our contemporary society — as we do.

But Caiaphas had not spoken the last word, nor even later when Jesus stood before him as a prisoner condemned. Because even in his cynical words, he spoke more than he knew and God would take his terrible act and make of it a redeeming reality for humanity.

NOW IS THE TIME

By Max Smith Lancaster County Agricultural Agent
Phone 394-6851

TO CONTROL WILD GARLIC

Many of us may like onions on our hamburgers, and in other food, but very few of us like onion-flavored milk. This can easily happen on dairy farms where wild garlic plants are allowed to grow. Many pastures are infested with wild garlic. One of the very best times to start control methods on this weed is early in the spring when the young plants are 4 to 8 inches high. An application of 2,4-D low-volatile ester will knock them down; when this is done around the middle to latter part of March little damage is done to any legumes in the area. If garlic plants are allowed to mature each year, the pasture area will be so contaminated that milking dairy cows cannot utilize the grass.

TO STORE FIREARMS PROPERLY

What have you done with your shotgun, or your high-powered rifle, since hunting season? I hear too many of us allow them to stand around where youngsters can get to them. Our safety experts inform us to urge hunters to clean up their firearms and store them in a gun closet, or cabinet, out of reach of children Store the ammunition separately from the guns in order to prevent serious accidents. Our National Safety Council reports that nearly half of the firearm accidents occur in the home - not in the field.

TO PRODUCE MORE ALFALFA

This "Queen of the Forage Crops" is widely used in all parts of the country. However, not very many producers are getting the yields that are possible The top growers in the alfalfa growing contest last year got 7 3 tons of hay equivalent per acre Our Lancaster County average for alfalfa hay is only 3 6 tons per acre It appears to us that if more attention is give to fertilization, weed and insect control, and to other cultural practices that we should be getting higher yields Alfalfa may not have the high market value of several years ago, but it is still a very good feed for livestock. Growers are urged to check their alfalfa growing practices toward the goal of increasing yields It is possible

TO BEWAR OF "BARGAINS"

Every spring we are aware of the increase in the number of traveling salesmen working our county No doubt this is true in many other areas I have nothing against salesmenship as a career, however, farmers are urged to be careful about buying from a stranger who is promoting an item at a reduced price Some of these may be all right, and be as represented, however, in case the product is not satisfactory, too many times the salesman is gone and you are stuck" with the materials The best practice is to deal with concerns that are established in the area, that have an interest in giving good service, and one who will stand behnd the product. Many 'bargains' turn out to be very expensive

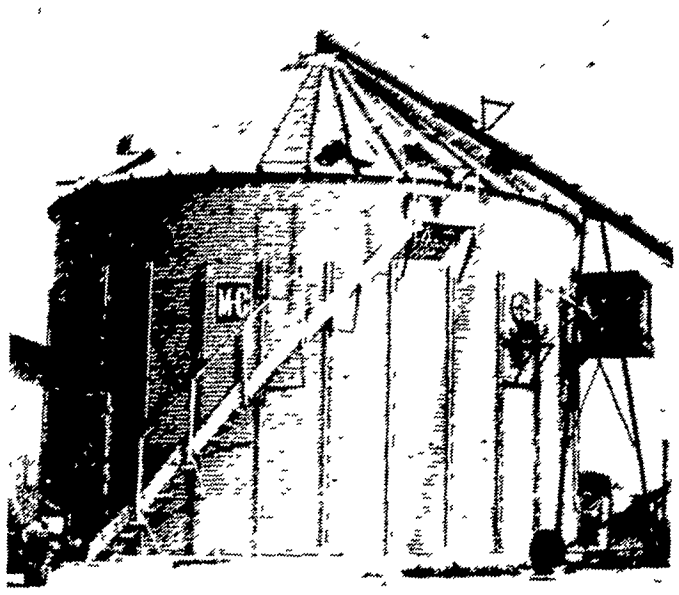
GREAT GRAIN HANDLING SYSTEMS BEGIN WITH GOOD PLANNING AND M-C DRYERS

Now Available!

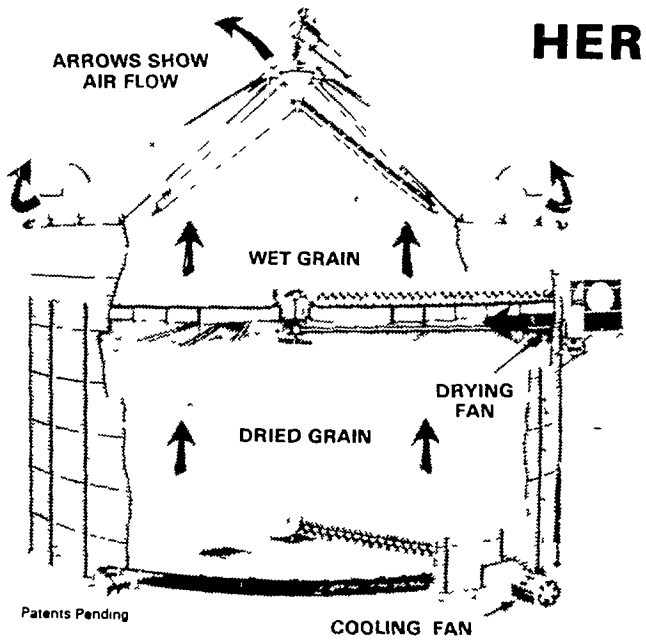
M-C DRYBINE™

The ENERGY SAVING IN-BIN DRYING SYSTEM



The new Mathews Continuous In-Bin Dryer is a combination storage drying and cooling bin designed to save you money It is efficient, fast, easy to manage and costs less to operate The drying process is fast, while the cooling process is slow, eliminating stress cracks and damage caused by fast cooling There is nothing else like it on the market The Mathews design requires no wet holding bin or separate bin for cooling

- **Saves energy** for profitable operations
- **Proven** high capacity results (357 bushels per hour)
- **Eliminates** the most common problems found in other in-bin dryers
- **Low** per bushel costs



HERE'S HOW IT WORKS...

As wet grain enters the top of the bin, it flows into the upper drying chamber as harvested, with no need for a wet holding bin This upper chamber holds up to 4 feet of wet grain (2250 bushels)

Every seven minutes, a continuous flow auger makes a complete revolution around the upper drying floor, drawing the dried grain into the lower cooling area

Hot air is introduced under the upper floor to dry the wet grain and to heat the surface of the grain that is distributed into the lower cooling chamber The air that is used for cooling the grain picks up heat during the cooling process This heated air is then used again in the drying process, saving on fuel costs

When not being used for drying, the bin will store 8500 bushels of grain

BIN DRYER TEST FOR FALL OF 1979

Ambient Temperature	43°
Plenum Temperature	190°
Static Pressure	1.5
Average Fuel Costs	51.9¢/gallon
Gallons LP Gas ('79)	1,420

Livestock market and auction news

Lancaster Weekly

(Continued from Page A2)

15 head Choice Grade 2 1000-1212 lbs. 70.00-72.00; Choice 2-3 875-1075 lbs. 64.50-67.25; Good 2-3 850-1000 lbs. 61.75-65.00.

COWS: Utility and Commercial 1-3 closed at 50.00-53.00, several early part of week 53.50-55.75, Commercial 3-4 48.00-50.00, Cutter 1-2 48.50-52.50, few 52.50-54.00, Canner and low Cutter 44.50-49.00.

BULLOCKS: Choice 1000-1350 lbs. 64.75-68.25; Good 1000-1250 lbs. 60.00-64.75.

BULLS: Yield Grade 1 1300-1800 lbs. 62.00-65.00, several early part of week 65.00-69.00 with a few at 69.50-71.75; Yield Grade 2 1000-1400 lbs. 58.00-63.50.

VEAL CALVES: Vealers mostly steady. Demand fair for calves returned to farm.

VEALERS: Prime 220-320 lbs. 128.00-136.00, few 136.00-140.00; Choice 140-290 lbs. 107.00-124.00, few 124.00-128.00; high Good and low Choice 130-250 lbs. 80.00-105.00, 90-115 lbs. 65.00-80.00, 70-85 lbs. 60.00-70.00, few Standard 60-90 lbs. 53.00-57.00.

RETURNED TO FARM: Bulk 85-115 lbs. holstein heifers 130.00-190.00, around 60 head 212.00-236.00; bulk 90-115 lbs. holstein bulls 85.00-125.00, around 150 head 125.00-130.50.

Omaha Cattle

Thursday, March 13
Report supplied by USDA

Compared high time previous midweek, slaughter Steers and Heifers were 75-1.25 lower, instances 1.50 off. Cows were 2.00-3.50 lower and bulls weak to 1.00 lower. Fleshy two-way steers sold 50-1.00 lower.

Four day receipts this week: 11,700; Last Week; 12,600; Year Ago: 12,500.

The fed cattle trade was characterized by a general air of bearishness as trading on carcass beef continued dull and movement of the finished product slow. The declines in live prices were enforced even in the face of modest marketings and a relatively light daily rate of slaughter. Most interests were competitive only for minimum numbers for immediate requirements. The overall finish of the steer and heifer supply was not particularly attractive with a large share good to average - Choice; mud was still a prevalent condition which made dressing percentages uncertain. Slaughter steers made up approximately 40 pct and heifers 40 pct cows comprised 11 pct and feeders 7 pct.

STEERS: Early, several loads Choice and Prime 3-4 1125-1225 lbs. 68.50, part load Choice 3 1200 lbs. 68.75. At midweek, Choice 2-4 1000-1275 lbs Bulked 66.75-67.50, part load 3 1160 lbs. 68.00; some mostly Choice but muddy or with large percentage 4 65.50-66.50, load 1428 lbs. 66.50. Mixed Good and Choice 2-3 1000-1250 lbs. 66.50-67.00. Good 2-3 62.50-66.00. Part load Choice 2-3 1386 lb. Holsteins 63.50, part load Good and Choice 1150 lbs. 61.50.

Fire destroys Brickerville barn

Firemen in a bucket loader shoot water over the remains of the Philip Seppi barn in Brickerville. High winds fanned the blaze and sent billowing clouds of smoke off to the East. Blaze has been called suspicious.

BRICKERVILLE — A fire which started at about 8 p.m. Tuesday night completely destroyed a barn located on the North side of Rt. 322 just East of Brickerville.

The barn was owned by Philip Seppi, 121 E. 28th Division Highway.

Over 100 firemen from half a dozen companies fought the fire, but the building was given up as a total loss within minutes after the blaze was discovered.

Seppi said his wife looked out the window and commented that it looked like there was a fire up the road a bit.

"It went just like a puff," he added.

High winds fanned the fire and sent billows of smoke off to the East. The winds also carried flames to the roofs of several neighboring homes. All of the smaller fires were extinguished immediately by firemen.

A neighbor first saw the blaze. Seppi said the neighbor told him it was not much of a fire until straw in a wagon caught and then the whole place went up in a flash.

Responding to the fire were men from Brickerville, Lincoln, Durlach-Mt. Airy, Brunnerville, Penryn, and Manheim fire departments.

Other area companies were on standby alert.

Traffic was rerouted for several hours from busy Rt. 322 through Brubaker Valley.

Investigators said the fire, which started in a small shed attached to the barn, was considered as being of suspicious origin.

Seppi said there was no electricity in the shed or in that part of the barn. But he said a neighbor was sure the fire originated in that part of the building.

The barn housed about 15 hogs. For a time rumor had it that the hogs had escaped the blaze. But unfortunately, Seppi said he figured only one of the animals got out of the burning building.

A number of small animals, cats and dogs, also were burned. A dog at the nearby tennant house was scorched.

Some farm equipment, grain and hay were lost in the fire.

Seppi said insurance appraisers were at the scene of the fire by the next morning.

But because of the suspicious origin of the fire no cleanup could begin right away until the state fire marshal had the opportunity to come to the farm and inspect the burned-out barn.

Seppi said he is unsure at the moment whether or not he will rebuild.—CH

Pork producers choose queen

ST. LOUIS, Mo. — The 1980 National Pork Queen Title has gone to Beth Coody, 18, daughter of Mr. and Mrs. Leon C. Coody, Bentonia, MS.

She was selected from a field of 19 candidates in coronation ceremonies last Thursday evening at the American Pork Congress in St. Louis.

First runner-up was Alicia Haynes, 19, Shongaloo, LA. The three other finalists were Paula Lynn Tenhouse, 21, LaPrairie, IL; Tanyia Greseth, 20, Wanamingo, MN and Kay Meyer, 20, Leipsic, OH. Miss Congeniality was Belinda Stephens, 20, Sapulpa, OK.

The new National Pork Queen received a $3000 scholarship from National Pork Producers Council and American Cyanamid as well as special presentations from Wolverine and Moorman Feeds.

pick pork

PUT MORE PROFIT IN YOUR ALFALFA.

Whether you grow for a cash crop or to feed your own livestock, you can't afford weeds in your alfalfa or clover field. They shorten stand life, lower protein content, lower TDN and reduce overall digestibility and palatability of your hay. In short, excessive weed growth just plain picks your pocket.

ORTHO Paraquat CL herbicide burns back weeds on contact. Apply Paraquat during the winter to dormant established stands. It's exceptionally broad spectrum and destroys weeds with extraordinary speed. Apply Paraquat with ORTHO X-77® Spreader.

DANGER: Paraquat is highly toxic if swallowed and should be kept out of the reach of children. To prevent accidental ingestion, never transfer to food, drink or other containers. Read the label carefully and follow all directions, danger statements and worker safety rules. Restricted Use Pesticide. Use all chemicals only as directed.

Red Rose Baby Beef elects officers

BY PAT KAUFFMAN

LANCASTER — Riding on the heels of a banner year, the Red Rose Baby Beef Club held its reorganizational meeting Wednesday evening.

A large crowd of hopeful youngsters and interested parents gathered at the Farm and Home Center to hear last year's big winner, Ernie Frey, give some pointers on showring success.

Also included in the evening's speakers were Sam Long, past club president, Ken Meck, speaking from the parent's viewpoint, and Jason Weaver summarizing the leader's views.

"Attend the meetings with your child," stated Meck. "You'll find that sometimes you pick up something your child misses, and sometimes he picks up something you missed."

Meck also stressed the importance of making even the very young members responsible for care of the animal and of involving them in some way in all aspects of the steer's care, even those which they presently are too young to handle by themselves.

"Children learn by example," said Meck, "Even though it's hard at times, learn to accept a judge's decision as final."

And lastly, Meck emphasized the importance of halter-breaking the animal as soon as possible to avoid some of the problems encountered as the steer grows larger.

Weaver noted that particularly for the new members, the leader is eager to help. He emphasized the leader's role as coordinator between the extension office and the club member.

One of the positive aspects of involvement in the club Weaver noted, was the personal growth and leadership development he saw in club members through their club work.

Max Smith, extension agent noted that this will be his 44th year of involvement with the club.

Elected to offices for the coming year were:

Sarah Brubaker, Lancaster, President; Judy Zimmerman, Ephrata, Vice-President; Deb Greider, Columbia, Secretary; Mary K. Longenecker, Lititz, Assistant Secretary; Wayne Hess, Conestoga, Treasurer; Tim Hess, Lancaster, Assistant Treasurer; Michelle Dean, Strasburg and Tony Eberly, Denver, News Reporters; Lori Good, Lititz and Jeff Hess, Strasburg, Song Leaders; and Becky Lefever, Manheim and Tom Good, Lititz, Game Leaders.

The club will have eleven leaders this year. They are:

Jay Nissley, Manheim; John Zimmerman, Ephrata; Fred Linton, Quarryville; Mylin Good, Rohrerstown, Marvin Nissley, Mt. Joy; Carl Longenecker, Lititz; Bud Dean, Strasburg, Elvin Hess, Strasburg; Larry Weaver, New Holland; Jason Weaver, Quarryville and Gerald Hess, Millersville.

Club officers from left to right front are: Deb Greider, Mary K. Longenecker, Michelle Dean, Lori Good, Becky Lefever. Back: Tim Hess, Jeff Hess, Wayne Hess, Judy Zimmerman, Sarah Brubaker, Tony Eberly, Tom Good.

Leaders from left to right are front: John Zimmerman, Fred Linton, Mylin Good, Marvin Nissley. Back: Carl Longenecker, Bud Dean, Elvin Hess, Larry Weaver, Jason Weaver, Gerald Hess. Absent when the picture was taken was Jay Nissley.

Interstate District working on the future

BY PAT KAUFFMAN

NEW DANVILLE — "The future can be anything you want to make it."

With this statement, James E. Honan, General Manager, Interstate Milk Co-op summed up his address to the Thursday luncheon meeting of the District V Inter-state Milk Co-op producers.

Noting that in marketing, "the people are changing, the pricing is changing, and the order relationship is changing," he emphasized the need to stay on top of current events which can influence the milk marketing future. Honan also recommended the producers make their thoughts known to their legislators.

Referring to the Pennsylvania Milk Security Fund bill currently under consideration, Honan suggested the problem was to get the representatives to understand the difference between a co-op and a milk dealer.

"The difference between a co-op and a milk dealer is that a co-op must take its members' milk whereas a dealer can turn down milk it does not need," stated Honan.

J.W. Groff underscored the need for advertising in the milk industry. Referring to a study on a number of milk drinkers, he noted that 20 percent of those people who enter a restaurant were found to be milk drinkers. Therefore, he noted if a marketing strategy was formed to encourage those people to order milk, there would be a big increase in milk sales. Groff emphasized that this was only one area and that other possibilities are great.

According to Honan, estimates for prices during the coming year were $14.50/cwt. by mid year, $14.80/cwt. by third quarter and $15.25/cwt. during the last quarter.

Class 2 milk should be around $12.75/cwt. by October, November and December, and the base price should be $14.25/cwt. by that period.

Speaking on price supports, Honan noted that a lack of price supports would hinder their negotiating position.

And on protein pricing, or component pricing, Honan stated that the biggest difficulty is establishing a value for protein. While it is relatively easy to set a value for fat which is used in butter and cheeses, protein value is a much more elusive value to establish.

County agent, Glenn Shirk, urged the audience to make strides to assure that the delicious product they strive to produce is still tasty when marketed.

Shirk noted that on occasion he has had the opportunity to taste school milk, and he stated, "If we want the children in the schools to enjoy and use our product, then it takes more than public relations. We need to furnish them with a tasty product."

During the banquet, Mr. and Mrs. Christ Hess, Pequea, were honored for their 25 year membership in the co-op.

Local officers were elected and are as follows:

Millersville local: Nelson Habecker, president; Glenn E. Burkholder, vice-president; Nelson H. Hershey, secretary-treasurer; Larry Harnish and Christ Hess, Jr., delegates; David McMichael and Wilmer L. Shertzer, alternates; and Melvin L. Shertzer, eastern regional hauling committee member.

West Lampeter local: John M. Harnish, president; James D. Shertzer, vice-president; Robert H. Gochenaur, Jr., secretary-treasurer; Arthur W. Breneman and J. Mowery Frey, Jr., delegates; and Donald Bare and Glenn P. Book, alternate delegates.

Witmer local: J. Robert Esbenshade, president; Mervin H. Bare, vice-president; Harvey E. Beiler, secretary-treasurer; J. Robert Esbenshade and John J. Landis, delegates; and Harvey E. Heller and Benuel S. Smucker, alternates.

Grange supports Farm Credit Act with certain reservations

WASHINGTON, D.C. — Proposed amendments to the Farm Credit Act of 1971 were discused here last Thursday by farm organization leaders testifying before the Conservation and Credit Subcommittee of the House Agriculture Committee.

Edward Andersen, Master of the National Grange, said several amendments contained in HR4782 are not acceptable to the Grange. He said the Grange is strongly opposed to any extension of economic power by lending institutions.

One amendment before the Committee would broaden the authority of the Farm Credit Administration banks to organize one or more corporations to perform functions and services for the bank, other than the extension of credit. The Grange feels this will be interpreted as giving the FCA authority to form insurance companies.

The Grange does not object to the FCA writing "credit life" insurance to cover a loan but opposes writing other life, property or casualty insurance. Andersen said he seriously questions the extension of the FCA into the insurance business. He feels this type of activity should be avoided as it is unfair competition and there is no evidence that it is needed.

Another concern relates to an amendment which would broaden the authority of the Production Credit Associations and Federal Land Bank Associations to permit the financing of processing and marketing enterprises which are part of farming, ranching or aquatic operatons of eligible applicants and borrowers.

The Grange questions the need for such increased lending authority as these operations are at the present time financed through Banks for Cooperatives in each FCA district. The Grange feels the proposed changes would permit the financing of farm-related businesses providing off-farm services and would waive the present concurrence of the Banks for Cooperatives.

The Grange fears that such new loan authority could be used to provide credit to businesses that would be in direct competition with family farms or used to finance an establishment in direct competition with a Bank for Cooperatives.

A final concern is that HR4782 would lower the percentage of farmer members of coopeatives borrowing from Banks of Cooperatives from 80 percent to 60 percent. The Grange believes it is in the long-range, best interest of farmer cooperatives to maintain the 80 percent farmer membership requirement for all cooperatives with the possible exception of rural electric cooperatives.

National Master Andersen said the Grange is in general support of HR4782 with these few exceptions. He said the most important new lending authority in the bill is the financing of agricultural exports through the Banks for Cooperatives, which the Grange fully supports.

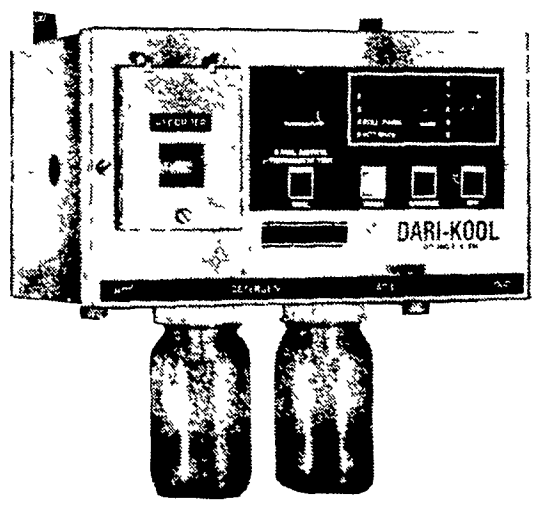
THINKING... OF BUYING A MILK TANK? DON'T DELAY! - CONSIDER TEMP-MATIC by Dari-Kool

The Tank with Features no other tank can offer

DARI-KOOL® BULK MILK COOLERS

WOULD YOU LIKE A TEMP-MATIC® SOLID STATE RECORDER/CONTROLLER IN YOUR MILK HOUSE?

Pump-shroud shown removed for detail



Featuring:

- Built-in recorder.
- No Problems with Interval times.
- Interval timer agitates milk 4 different times in one hour.
- Built-in warning system - A horn or light warning signal is given when milk temperature rises two degrees or when milk temperature drops to 34 degrees.
- Built-in automatic washer.
- Milk agitates 1½ minutes out of every 15 minutes.
- Automatic washer is built in.
- Full flood refrigeration system
- Can operate the tank manually in time of emergency.

Features:

- Temp-Matic shows the temperature and records it every hour.
- Identification light signals when the temperature being monitored rises above 45°, Falls below 34°, or when the controller is switched off.
- Solid-state six-cycle washing and sanitizing assures dependable, complete cleaning of the tank interior.

Letters To The Editor

Dear Editor:

I would respectfully ask for the opportunty to comment on some of the statements in your March 1 issue, on the Expo tractor pull.

I personally an aware of four large tractor pulling sleds within the state, with the Franklin County sled being one of the three larger, three-axle types. The sled which was designed and contracted for by our club in late 1975 was, to our knowledge, the very first of this type built anywhere in the world. We are naturally very proud of that fact—especially since it embodies many innovations new to sled building at that time. Some of these features are now in fact required of all sleds used at National Tractor Pulling Association pulls.

I do not concede that any of these three-axle sleds is superior to any other, since dimensions, weights, etc., are all relatively similar. For instance, while we cannot get the skid on our sled to float in the air a garden tractor did make a full pull with it at the 1977 Gratz fair. The sled was not transferring weight, obviously, and another tractor nudged the sled to start it rolling.

Total weight of the sled is over 58,000 pounds; maximum transfer to skidplate is 42,500 pounds. I know of three other sleds of this type here in the Eastern part of the nation, but outside Pennsylvania.

Our club was particularly happy to see stock tractors pulling at Expo '80, as we proposed the first stock rules to our state pulling association. Incidentally, two of the three classes were won by our members.

Respectfully,
Eugene Sellers,
Northeast Pa. Tractor Pulling Club
Trout Run

Dear Editor:

As you may know the National Beef Research and Educational Act has failed to achieve an affirmitive vote. On a State and National basis the majority of voters failed to approve the Beeferendum effort.

However, the industry debate did bring to the forefront issues that are a challenge to cattle producers and to consumers. Consumers are spending a smaller percentage of their income on Beef than ever before. The debate highlighted such problems as "Beef causes cancer", "Beef causes heart disease", and the increasing use of Beef substitutes.

The Beeferendum effort helped the consumer benefit from more information on the nutritional value of beef and more facts countering the food faddist push of the vegetarian craze. The farmer-producer gained needed information on the extremes of the cattle cycle and new ways to expand his market.

For the industry these needs are immediate and the Beeferendum effort may have sown "seeds of ideas" for a future harvest.

To those who helped with their time, energy, and finances, I say, "thank you." The Pennsylvania cattle industry owes you a debt of gratitude.

To those who felt it necessary to distort facts and promote misleading suggestions, I am sure their lives and businesses will reap the implications of their efforts.

To one and all of my fellow cattle producers I offer my hand in friendship and trust our trails will cross many times as we strive to improve our industry together.

H.H. Stambaugh
Chairman
Pennsylvania Beeferendum

Arson destroys Elstonville barn

ELSTONVILLE — Arson was listed as the cause of a $100,000 fire that destroyed a large barn along Rt. 72, about a mile north of Elstonville, Lancaster County, Wednesday night.

There is no other explanation for the cause of the fire since there was no electrical service to the structure, according to County Fire Marshall Dennis Gerhart, of the Lancaster State Police.

The barn was owned by Menno Ober, R4 Manheim, but was being used by Marlin Reiss, of Elstonville, who rents the Ober land for farming.

In addition to the barn, a tobacco shed was destroyed and a corn shed extensively damaged. Contents of the barn that were lost included a chuck wagon, two hay wagons and about 500 bales of hay.

Eighteen heifers in the barn at the time of the blaze escaped. The barn opened into an adjoining meadow and the animals ran from the flames.

The fire was discovered about midnight by a neighbor, Mrs. Earl Sinneger, who was returning home. When firemen arrived, the barn was completely engulfed in flames.

Besides fighting the flames, firemen wet down the home of Mrs. Audry Byers, just north of the barn.

The house was not damaged.

It was the second barn fire in Lancaster County in as many nights. Tuesday night a barn along Rt. 322 at Brickerville was gutted.

Another fire Wednesday night destroyed a large hay barn at the Delaware Valley College of Agriculture, Doylestown.

The barn had only recently been filled with feed, according to a college spokesman.

The fire broke out at 8:15 p.m. Investigation is continuing into the cause. An inventory of losses also is continuing.

Three nearby cattle barns were not damaged. Livestock were removed from the barns as a precautionary measure during the blaze.

Versatile

The versatile human hand, capable of threading a needle and making a hammer-like fist, has a skeleton framework of 30 small bones

Concrete silo, stone walls and smoldering skeleton are all that remain of a large barn destroyed by arson near Elstonville, Lancaster County, Wednesday night.

Ask the VMD

Leon Riegel Tim Trayer Edgar Sheaffer

A reader asks:

What considerations should I make when selecting new breeding stock for my hog herd?

Dr. Trayer comments:

The one most important fact to consider in the selection of new breeding stock, especially boars, is to start three months in advance

If you are selecting gilts from your own herd, you will have to start six to eight months in advance and that will start in the farrowing house

With any new stock added to the facility from outside your own herd, there are several critical considerations.

You should look at the person you're buying the animals from very closely, primarily their herd health program The old addage, "You can buy your problems" pertains as well to the swine selection as to anything else you might buy for the farm.

It is wise to select animals from a farmer that has taken the time to have his herd certified free from pseudorabies, also called mad itch, and brucellosis. Certification for these two dieseases requires either an annual blood test of all breeding stock or blood tests on ¼ of the breeding stock every 90 days, after an initial two bleedings within a 90-day period.

Find out about the farmer's vaccination schedule for the replacement stock. Whether it is for a boar, sow, or gilt, the following vaccination schedule is a minimum

Every time a sow goes through the farrowing house, she should receive leptospirosis vaccination, the five way strain And erysipelas vaccine should be administered at the same time.

Boars should be vaccinated twice a year with the erysipelas bacterin and pigs that are weaned between six and eight weeks of age should receive the vaccine too This should be boosted again when selecting out the gilts for replacement, or the boars.

The Lepto vaccine should be given to the boar prior to turning him in with the new breeding stock, or turning the gilts in. The gilts should be boosted with the vaccine every time through the farrowing house, and the boars twice a year.

Atrophic rhinitis history of the farm should also be sought out before buying hogs. This is a disease believed to be caused by a bacteria, Bordetella bronchiseptica.

If you see any clinical signs of atrophic rhinitis, such as bent noses with any deviations to the right or left or any blood in the pen coming from the noses, you should not buy any breeding stock from the seller unless this can be clinically proven not to be atrophic rhinitis.

Without these clinical signs of the disease, it will be hard to tell whether there are any animals infected.

One question you might ask the seller is whether he has taken the time to have a slaughter animal checked by his veterinarian and what was found.

What is usually done in a slaughter check by a veterinarian is: 1. observe the animals prior to slaughter for general health; 2. observe the slaughter line for any external abnormalities, such as excessive amounts of abscesses, bruising, and swelling; 3. watch the slaughter line for joint abscesses, adhesions of the lungs to the internal carcass, and overall disposition of the carcass as it moves down the line; 4. check livers for ascarid or round worm migrations; 5 visual exam of the internal parasitism of the internal gastro-intestinal tract; and 6. check some of the heads by cutting open the snout and looking for signs of atrophic rhinitis.

After this, a report is given back to the producer, along with any recommendations.

Another consideration in buying breeding stock is to ask the seller if there has been any lameness in the herd, particularly in the boars. This could be a sign of myco plasma infection in the herd, or general bacterial joint infection, either strep or staph, which usually occurs at a very early age from abrasion of the knees or improper dipping of the naval cord at birth.

If there is a question of the health of the breeding stock you are about to buy, you should get an independent opinion from your veterinarian.

The seller should be worming all pigs after weaning at 6 to 8 weeks of age, and repeating two weeks later. All breeding stock should be wormed a minimum of twice a year.

The seller should also tell you what wormer he is using and he should be rotating the produce he uses. If he does not rotate, he should have a fecal and carcass check done at least twice every year for signs of parasitism because one wormer does not get all the internal parasites of swine

Does the seller have a problem with lice and mange. If so, what is he using or doing about the problem.

Mange is a hard problem to treat because there are no readily available products that are effective against it. The most effective treatment, Lindane, has been on and off the market.

The seller should be able to give you general performance information. For boars, he should be able to give you information on his feed conversion, how the boar's individual performance compares to the rest of his stablemates and relatives.

If, after checking out the seller's health records, and performance records of the swine, you decide to purchase some of the breeding stock, the next step is to have the new animals blood tested, whether you're within the state or moving across state-lines. All new additions to your herd should be blood tested.

Blood testing should be done for pseudorabies, as a minimum, brucellosis, and it isn't out of line while your drawing the blood to check for leptospirosis.

Test before the animals leave the seller's farm, no matter what the status of the producer is, whether or not he is certified brucellosis free. And, retest after thirty days of bringing them home to the farm.

The animal should remain in isolation for those thirty days in the event of a positive result the animal can be identified without harming the rest of your herd.

Next week we will discuss the treatment of the new breeding stock once you've brought them home to your farm.

If you have a question you would like answered by the team from Valley Animal Hospital, send it to Ask the VMD, Box 366, Lititz, PA 17543. Questions will be kept anonymous on request.

Rural preservation conference set

WEST CHESTER — The Chester County Historical Society is sponsoring the first Annual Preservation Conference on the critical subject of rural preservation.

The two day conference held Friday and Saturday, March 21 and 22, 1980 on the campus of West Chester State College, West Chester.

Main focus will be on the conservation of open space and the maintenance of prime agricultural land.

The cost for the two-day conference, including lunchs, $35.

The speakers for the conference and themes for the workshops will address four basic issues which must be confronted in effectively implementing rural preservation programs. They are philosophical, political, legal, and practical.

From Dairy Herd Management Conference

Here are considerations with high moisture feed

BY SALLY BAIR
Staff Correspondent

UNIVERSITY PARK — Larry Chase, department of animal science, Cornell University, said high moisture corn is emerging as an important component of the feeding programs on an increasing number of herds. He called high moisture corn "one option to produce more concentrate energy."

Chase was speaking to dairymen at Penn State's Dairy Herd Management Conference.

Chase cautioned, however, that "management will be the key to success," and said it will take a lot of management time to get it to operate properly.

One big advantage of high moisture corn is that it is harvested at a higher moisture content than dry corn, which means a two-to-three week earlier harvest. This decreases field, weather and harvesting losses, and may increase yields. The whole process lends itself well to mechanization.

Since high moisture corn is being used on an increasing number of farms as the primary source of concentrate energy, and is often used as a substitute for commercial feeds, it may lower the purchased feed cost, Chase noted.

There are disadvantages to high moisture corn.

Chase said it is low in protein and minerals, which means "dairymen must do a sharper job of putting a feed package together." He said high moisture corn must be considered a concentrate feed that needs high mineral supplementation.

It also has a limited shelf life once removed from storage and it is difficult to market if there is excess.

High moisture corn should be harvested 60 to 65 days after silking. High moisture shelled corn should be harvested ideally when moisture content is between 25 and 30 percent, and high moisture ear corn should be harvested at a moisture content of 30 to 35 percent.

Chase pointed out that high moisture corn can be successfully stored in oxygen-limiting, conventional or horizontal silos. In one study, dry matter recoveries averaged 93 percent in oxygen-limiting silos and 87 percent in conventional silos. In an emergency, acid preservation has also been used successfully.

Chase said it is of utmost importance to select a storage structure based on herd size, so that a removal rate can be used which keeps spoilage to a minimum. He said good high quality moisture corn can be produced in any of these storage alternatives.

One of high moisture corn's advantages is that it can be stored and harvested in many ways.

How does high moisture corn affect milk production?

When compared on a dry matter basis there is no difference in the average daily milk production of cows on fed dry, ensiled or acid treated high moisture corn. Chase said, "You can get suitable production if managed properly."

Chase told the dairymen that high moisture corn can be incorporated into dairy rations in a number of ways. If the same amount is fed to all cows, it may be difficult to balance rations for proteins and minerals and may result in over-conditioned cows. Feeding equally means feeding 15 pounds of high moisture corn per cow per day or less, Chase said.

Feeding high moisture corn can be varied according to milk production. This, too, has some limitations, including the fact that it is difficult to feed in parlors. It allows cows to select feeds and may lead to palatability problems.

In this option it is best to place the high moisture corn and supplement on top of the forage and hand mix them.

If high moisture corn is mixed with the supplement, palatability and sorting problems are minimized. Nutrient utilization is improved and it provides a better control of nutrients actually consumed.

According to Chase, the ideal option for optimum utilization of high moisture corn is to blend it into a completed ration. This, he said, will minimize palatability and sorting problems and provide a more uniform flow of nutrients into the rumen which improves nutrient

How to make TMR work at your dairy

UNIVERSITY PARK — Total mixed ration can be a boon to many dairymen, but it is definitely not for every dairyman, according to Dawrin Braund, director of dairy and livestock research and development for Agway.

Speaking at the Dairy Herd Management conference at Penn State University last week, Braund said, "This concept and practice is not a camouflage for mediocre managerial ability and lack of attention to details. Research and field experience indicate that TMR requires above average managerial ability."

For the dairyman who is ready to give that attention, however, Braund says the TMR concept offers several advantages, including reduced labor costs, increased milk potential and feeding ease.

Doyle Waybright, Mason-Dixon farms, Adams County, told the group he uses Total Mixed Rations for their herd from calves to dry cows, with very good results. He gave specifics of the mangement skills they use to make the system effective for them.

According to Braund, the TMR concept involves the complete blending of grain and forage to obtain proper balance of nutrients and bulk density prior to feeding. This balanced feed is then offered to cows on a continuous free choice basis.

Braund said, "Each bite is balanced. The cow decides how much she will eat and how often it will eat. It is a 'casserole for cows' ready for them to eat when the spirit moves them."

There are some important management imputs which must be part of TMR for it to be a success.

"With poor management," Braund said, "a TMR program can be a disaster." Forage testing is a must, as are regular checks on dry matter content of silages.

Waybright agreed, "Testing forages it very important in our operation. We test every cutting of alfalfa and we test the first cutting several times."

Total mixing is another important factor so that there is no opportunity for a cow to select forage over grain or vice versa.

Braund noted that in traditional feeding methods grain feeding precision is limited because dairymen can't accurately predict the forage intake of individual animals. Furthermore, since cows may prefer one forage over another, they may be short on protein and overfed on energy

Grouping is another essential for a successful TMR program. It is most important to separate dry cows from lactating cows, Braund said.

Grouping makes possible a more effective use of grain feeding, and the forage-to-grain ration can be adjusted to more fully correspond to the production level and dry matter intake capacity of the group. According to Braun, grouping can result in increased income over feed costs by at least $50 per cow per year.

Research shows that grouping will also allow dairymen to get more milk out of first calf heifers. In one Agway trial, first calf heifers averaged nearly seven pounds more milk per day for the lacatation when grouped. This amounts to about 2000 pounds more milk.

Another advantage of grouping is that groups will be smaller in size, and it will be easier to detect heats, health and other problems. Also problem cows can be treated appropriately.

Braund said a side benefit of grouping is increased reproductive efficiency, by reducing days open. This results from meeting nutrient requirements better when on a TMR program.

After separating the dry cows, Braund says the most important factor in grouping is production levels, with some consideration given to first lactation heifers, body condition and fresh cows.

A reasonable minimum size per group is from 25 to 40 cows, depending on total herd size, barn design and milking facilities. Three production groups are easiest to work with - high, medium and low.

In production groups, the ration should be balanced to a high of five pounds higher than the group average, but no higher than 70 pounds. The maximum spread between groups should be 20 pounds.

He pointed out that high producers will eat twice as much feed as lower producers and said it is impossible to balance a ration for the highest producers and keep healthy cows. Braund stressed that the feeding must be truly free choice, so that there is feed in the bunk whenever a cow wants to eat it.

Once-a-day feeding where possible is advised for the TMR program, which will result in reduced labor time. Feeding TMR more than once a day had no effect on average milk production or dry matter intake. Feeding more frequently than once daily encouraged more cows to come to the bunk and eat at each feeding, but cows didn't stay as long as when fed once per day. Milkfat percentage was unaffected by frequency of feeding.

When dry matter content of feed changes by more than five percentage units, the TMR mixing schedule should be adjusted, Braund noted.

In addition to the importance of testing forages, Waybright told the dairymen it is important to harvest the forages at their optimum. For Mason Dixon Farms that means harvesting at 18 percent crude protein.

"If you let it go too long," Waybright said, "you sacrifice essential protein. Dairymen need to concentrate their efforts in getting forages into the silo at their optimum."

Explaining their TMR program, Waybright said, "We find it very advantageous to feed it from day one." He said they feed 65 percent grain and 35 percent timothy hay with molasses for palatibility until the calves are five months, adding "Calves accept it readily. We have had no bloating and our calves chew their cud at a remarkably early age."

In the Waybrights' program, chopped hay is fed to calves because it "helps them develop bloom faster" Increased fiber is fed to dry cows and heifers, Waybright said.

The cows are divided into three production groups, with the highest group receiving 50 percent grain on a dry matter basis; the medium group, 35 percent grain; and the low group, 25 percent grain.

Trace minerals and vitamins are custom blended for the Waybright herd and bicarbonate of soda is supplied alongside salt. "It is amazing how they lick it up," Waybright said.

A control for flys is also fed in the ration, something which Waybright said helps immensely.

One of the biggest problems with their feeding program, according to Waybright, is the fat cow syndrome. To avoid this they monitor the groups carefully and move cows from high to medium production groups as necessary.

In a survey of 150 dairymen in the Northeast using TMR, Braund reported that 70 percent increased income over feed costs. Fifty-one percent also said they expected reduced herd health problems and no one reported an increase in health problems.

Braund said the adoption

High moisture feed

(Continued from Page A20)

ılızation. It makes it much ısier to provide a balanced tion.

Chase stressed, however, ıat the system of feeding is ot as important as the ıanagement of the system.

Since forages are the basis any dairy operation, nase said it is important to onsider forage quality, uantity and intake. "You hould maximize forage ıtakes and maximize the ability to produce and feed forage." Forage testing, he said, is essential.

He told dairymen it is important to develop adequate supplement to balance the forage. Since high moisture corn is used in many cases as a substitute for purchased feeds, it is imperative to provide adequate mineral and vitamin supplementation.

He said areas to watch include energy-protein balance, the total ration solubility level, in addition to vitamins and minerals. "Nutritional management is critical here," Chase concluded.

The use of wet, fermented feeds offers new challenges in feeding management, according to Chase. Frequency of feeding is a prime consideration, since more frequent feeding improves the utilization of nutrients in the rumen.

When using high moisture corn and protein supplement, Chase said, it is advisable to feed them together rather than separately.

Sometimes added buffers are necessary to stabilize the rumen when wet, fermented feed is used, he said.

Supplemental protein should be selected according to both solubility and degradation characteristics, and perhaps more than one protein source will be advantageous in ruminal protein utilization.

An important consideration in choosing to feed high moisture corn is economics.

Chase said, "Ask questions first before going into it. Is it your purpose to reduce purchased feed costs? Must you rent land or buy additional land?"

Other considerations include the storage to be used and its costs and whether more equipment and labor is necessary to harvest, store and feed the high moisture corn versus other options.

He said, "Someone must put in more management time to use it correctly and to readjust the ration. It can take a lot of time to operate it correctly."

Larry Miller, Penn State dairy specialist, left, introduced program speakers at the Thursday session of the Dairy Herd Management Conference. Included, from left, are Darwin Braund; Doyle Waybright; Larry Chase; and Richard Adams.

Twin Valley FFA presents awards

ELVERSON — The fifteenth annual Parent Member Banquet was held Friday in the Twin Valley cafeteria.

Following the ham dinner, awards were presented to the 1980 Keystone farmers, Lewis Kohl, Thomas Kirk, and Howard Griest.

Receiving top awards Friday at Elverson were: Thomas Kirk, Honey Brook, Star Agribusinessman; Howard Griest III, Honey Brook, Star Chapter Farmer; Pam Trostle, Mohnton, Star Greenhand; Scott Stoltzfus, Elverson, 1st Amateur PSU Livestock Judging.

The three chapter stars for 1980 were announced. They were: Pamela Trostle, daughter of Ronald Trostle, Green Hills, Star Greenhand; Thomas Kirk, son of Robert Kirk, RI Honey Brook, Star Chapter Agribusinessman; Howard Griest III, son of Howard Griest Jr, R1 Honey Brook, Star Chapter Farmer.

Jennifer Snyder received a cash award of $100 from Meadowwoode Farm to help finance FFA projects.

Foundation medals for excellence in specialized areas were presented as follows:

Thomas Kirk, ag mechanics and ag sales and service; Howard E. Griest, III, beef production and public speaking; Roger Stoltzfus, crop production and dairy production; Ronald Lilley, fish and wildlife management; Linda Robinson, floriculture; Martin Miller, forest management; Sue Ford, horse proficiency; Tom Hornberger, livestock production; Wade Bernard, nursery production; Donna Devine, ornamental horticulture and outdoor recreation; Tim Stoltzfus, ag production and swine production; Mike Beam, poultry production; Mike Williams, sheep production; Steve Snyder, soil and water management.

Francis Wood, Assistant Superintendent at Twin Valley was recognized with a plaque for his contributions to the ag program. Wood was responsible for the introduction of the Vo-Ag FFA program at Twin Valley.

Receiving awards for their placings in the project book competitions were: Tim Stoltzfus, Keith McVaugh, Tom McDermott and Tom Kirk. Lorri Brynan received a trophy for her first place in the county scrapbook competition.

Also gathering trophies were: Roger Stoltzfus, first place in Berks County silage; Tim Kurtz, eighth place in the state dairy judging forum; Steve Snyder, S.E. Pennsylvania Ayrshire calf award; Steve Kearns, first place county heifer project book; Tom Kearns, Berks County Star Agribusinessman, 1979 also for first place in the county project book contest; Martin Miller, first, overall in S.E. Pennsylvania wildlife contest; and Don Kercher, winner of Berks-Lebanon-Schuylkill FFA dairy foods contest.

Five members received trophies for their placings in the state judging contests last June. They were: Tom Snyder, silver medal in rifle range; Donna Devine, bronze medal in state interview contest and first in Berks-Lebanon-Schuylkill FFA meats identification contest; Linda Robinson, silver medal in state FFA area pleasure horse judging and first place in Berks County horse record books; Scott Stoltzfus, silver medal in state livestock judging and first place amateur livestock judge at Penn State last Spring.

Eight members also received recognition for their state project books. They were: Lorri Brynan, gold medal for fifth place chapter scrapbook; Tom Kirk, gold medal for first place; Tom Kearns, gold medal for third: Tim Stoltzfus, Steve Kearns and Eric Wright, silver medals; Tom Hornberger and Ken Sweitzer, bronze medals.

Conservation banquet Thursday

LANCASTER — Tickets for the Lancaster County Conservation District's annual banquet will be available until 4:30 p.m. Monday, March 17, at the Conservation District Office in the Farm and Home Center.

The banquet will be held at 6:30 p.m. Thursday, March 20, at the Good and Plenty Banquet Hall, Smoketown. Tickets cost $6 each.

Following the banquet, awards will be presented for outstanding conservation cooperation and storm water management, along with the Maurice K. Goddard forestry award.

Speaker will be Graham T. Munkittrick, State Conservationist of the USDA Soil Conservation Service. He will discuss a number of topics, including erosion control, farmland preservation, non-point pollution control and how the Soil Conservation Service is assisting the Lancaster County Conservation District and the landowners of Lancaster County.

County to run manure management tours

LANCASTER — A Manure Management meeting for dairymen will be held 9 a.m. to 3 p.m. on Monday, March 17 at the Farm and Home Center, Lancaster, to discuss manure handling systems and how to manage manure for maximum benefits.

As a follow up to this meeting, tours and demonstrations have been scheduled to give dairymen an opportunity to observe systems and equipment in operation. Tour dates are Wednesday and Thursday, March 19 and 20. The public is invited to attend.

As inflation drives fertilizer prices upward, it also increases the value of the manure produced on the farm. Farmers want to manage their manure properly to get the maximum fertilizer value from it. Farmers are also giving very serious consideration to systems that will reduce labor and fuel consumption and reduce the wear and tear on expensive machinery equipment.

These meetings, tours and demonstrations are being conducted to inform dairymen about alternative methods and equipment.

On March 17, gravity flow systems will be discussed by Richard Guest, Cornell Agricultural Engineer. He, along with Penn State Agricultural Engineer, will update farmers on the production of methane gas (for fuel) from manure. David Matthews, Agway Agronomist, will report on his work measuring crop response to various kinds of manures, and to manures stored in a variety of different ways and applied in different ways and at different times of the year.

Soil conservationists will discuss earthen bank storages, proper sizing of storage facilities and proper application techniques. Guidelines for planning manure systems, and safety considerations will also be included. Different systems being used in the county will be shown, including systems that require no electricity.

March 19 Tour

Four farms in southern Lancaster County will be toured on Wednesday, March 19, and a variety of loaders, pumps, agitators, spreaders and injectors will be demonstrated. The tour schedule is as follows: 9:30 - Earl Neff farm, one mile north of Quarryville on Stone Road. Earl has a tie stall barn and the manure is rammed up grade to a treated plank storage, where it is removed with a front end loader.

The Dale Herr farm, 4 miles southeast of Quarryville and one half mile northwest of Route 472, will be visited at 10:30. Alley scrapers and barn cleaner convey manure from his free stall barn to the center of an earthen bank pond. A variety of equipment will be demonstrated at this farm.

At 12:30, the tour will arrive at the Robert L. Kauffman farm, located on Prowls Hollow Road, off of Route 272 about 5 miles south of the Buck. Here, a picket fence, earthen bank unit stores manure from his tie stall barn, his free stall barn and from his feed lot. Liquids drain into an earthen bank pond. A variety of equipment will also be demonstrated at this stop.

A flushing and irrigation system will be featured at 2 p.m. at the Red Knob Farm owned by Henry Young and Sons, and located 2 miles south of Wakefield off Route 272.

March 20 Tour

Five farms in northern Lancaster County will be toured on March 20. The first visit will be 9 a.m. to Glenn C. Hershey, 2 miles east of Intercourse and 3/4 mile north of Route 340 on the New Holland Road. Deep, wide, grated gutters in Glenn's tie stall barn are automatically self-flushing - no cleaner, no scraping, no water! An exhaust fan in the outside, buried pit prevents odors from backing up into the stable.

John Groff has a similar barn. He flushed his gutters with water and irrigates the manure. He is located on Prospect Road, 2 miles south of the Landisville-Salunga exit of Route 283 and will be visited at 10:30. Different irrigation pumps and nozzles may be demonstrated at his farm.

About one-half mile southwest of John's, on Pinkerton Road, is a very simple, low cost earthen bank, picket fence system on the farm of Moses Good. The tour stops there at 11:30. He has a tie stall barn.

Robert H. Kauffman on Bossler Road, 2 miles south of the Rheems exit of Route 283, has a springy meadow and a stream near the end of his tie stall barn. His stable manure and lot scrapings are pumped into a Slurry Store unit. The tour arrives there at 1 p.m.

At 2 p.m. the final stop will be the Noah Kreider farm on Indian Village Road, about 2 miles east of Manheim. Noah as two systems. Manure from one free stall barn is scraped into a pit and is loaded out by gravity through a hydraulically operated gate. His other barn is completely slatted, requires no scraping, and the manure is pumped out as a liquid.

Maryland dairy department names two new members

COLLEGE PARK, Md. — Two new College of Agriculture faculty members have joined the department of Dairy Science. Both hold the rank of assistant professor.

One is Robert R. Peters, a lactation physiology specialist. The other new staff member—a specialist in cattle nutrition—is Richard A. Erdman.

Peters will primarily be an extension specialist, with some research duties. He will have responsibility for the development and implementation of an educational program related to the prevention and control of mastitis and efficient milking management.

At Michigan State where he earned his Ph.D., Peters conducted research demonstrating that day length has a definite effect on the amount of milk produced by lactating cows and the growth rate of maturing dairy animals.

Peters has extensive experience working with dairy cattle, having grown up on a dairy farm in western Minnesota. He was also a 4-H member for nine years and a member of the Future Farmers of America for three years.

His co-worker, Richard Erdman, will be involved in teaching courses in dairy cattle nutrition and conducting research on improving the efficiency of feeding dairy cattle.

As a graduate student at the University of Kentucky, Erdman did research evaluating buffers in the diets of dairy cattle and their effects on feed intake and milk production. In addition to his research, Erdman also coached the inter-collegiate dairy cattle judging team.

Like Peters, he gained experience with dairy cattle on the family farm.

Legislative roundup

(Continued from Page A1)

Wednesday morning's breakfast hour.

The 50 Grangers, mostly members of the legislative, agricultural, dairy and energy committees, had their congressional breakfast Tuesday morning.

Both Schweiker and Senator John Heinz attended.

Grangers learned that President Jimmy Carter's proposed across-the-board budget cuts may hurt USDA research programs. One program facing a cutback is research on strains of wheat and corn which can fix nitrogen. Indication was that the wheat project is nearing a major breakthrough.

Also facing the axe is the school milk program. Funding may have to come for such programs from the local level.

The CNI dairy order hearings, which many dairy leaders seem to consider nearly dead received new life, Grangers learned.

Alfred Kahn, Carter's inflation advisor, seems to have taken an interest in the CNI proposal so now it seems certain that CNI's ideas will get as far as the hearing stage, at least.

Congressman Ertel's remarks to PFA at Wednesday morning's breakfast began with the windfall profits tax measure which he said would definitely be law within the next few weeks. Although aimed primarily at the oil industry, the measure contained a number of provisions that would be felt directly by farm families, Ertel said.

The measure would repeal the carry-over basis method of calculating inheritance taxes. With this method estate taxes would be figured not on the value at the time of death, but on the value at the time of a property's acquisition. For many farmers, the carry-over basis would be not only expensive, but almost impossible to figure for farms that have been in the same families for generations.

While the carry-over basis became law in 1976, with the backing of the IRS, pressure from the public and from Congress has prevented its use so far.

Another provision of the windfall profits bill would change Social Security regulations to allow farmers harvesting wheat the year before their retirement, but not selling it until the year after, to collect the income from the sale without harming their Social Security status.

And a small savers' provision in the next tax measure would exempt from taxes the first $100 in interest payments on bank savings accounts.

Ertel spent most of his time talking about trucking regulatory reform. He pointed out that while consumers' food prices have risen very little, or in some cases dropped, over the last 12 months, the cost of transporting food to market has gone up 20 percent.

Transportation costs account for some 10 percent of the cost of food, so any increases in retail food prices would be eaten up by truckers before it reached farmers, Ertel pointed out.

A vigorous supporter of deregulating the trucking industry, Ertel is convinced that freight costs would go down if the Interstate Commerce Commission was given less power over the industry.

The hidden costs of regulation add up to $35 to $100 billion a year, Ertell said. That figure includes the salaries and other expenses of the 2000 ICC administrators, and the even higher price tag of lawyers who specilize in appearing before the ICC in rate review cases.

If any truck could go by any route to any town hauling any commodity, neither the ICC administrators nor the lawyers would be needed.

As an example of wasteful truck routes, Ertel cited a northern Maryland trucker with rights to serve Pittsburgh The trip to Pittsburgh, by the most direct route, is 183 miles. But the trucker is allowed to serve Pittsburgh only by first sending his trucks to New Jersey, a wrinkle which adds nearly 300 miles to the round trip.

Unfortunately, according to Ertel, the confusion in rates makes this situation far from unusual in the trucking industry.

Since everything that farmers sell and buy is hauled by truck, Ertel said the agricultural community has a big stake in pushing for trucking reform.

Lancaster County's delegation to the PFA Congressional visit included, left to right, seated: Helen Wivel, Phyllis Enslow, Tom Plank (Congressman Bob Walker's staff assistant), Jim Hess, Ginny Hess, and Marian Brenneman. Standing: Richard Haas, Bill Enslow, Elvin Brenneman, Mary Ann and Michael Grove.

Legislative scorecard page C-18

Congressman Allen Ertel, of Dauphin County, explained his views on trucking regulation of 260 PFA members in Washington Wednesday and Thursday to visit their Congressmen.

Make TMR work

(Continued from Page A21)

rate of TMR program is increasing because it is a sound concept, supported by effective research and technical leadership. He pointed out that it is being used increasingly in confinement barn situations

Braund said, "TMR will play a major role in the design of dairy feeding programs and housing systems in the future." He said the concept is economically sound and will be successful with good management.—SBB

Cattlemen meet

(Continued from Page A1)

association from a group of eight contestants.

Laura hails from Beaver County, near the town of Clinton. She said she is not actually from a farm, but she has gotten involved in agriculture mostly from Penn State's college of ag.

Laura is studying to become a veterinarian, hoping to have a mixture of large and small clients in her practice. As far as where she hopes to study veterinary medicine, she smiled and said she didn't want to say at this point.

Laura Weinberger, Clinton, was crowned the Pa. Cattlemen's Queen for 1980 by last year's queen, Karen McCullough.

Laura has had experience working with large animals. She has two Morgan horses of her own, a mare and a foal.

At Penn State, Laura is a member of the Block and Bridle Club. She has participated in the annual Little International since she was a freshman.

In her first year as an exhibitor, Laura showed a Hereford heifer. Last year, she said she decided to show a horse.

But she eventually got to show all of the species in competition for showman of the year. Her smile was well-earned when she said she was the reserve grand champion showman at last year's show.

Laura received her crown from last year's queen, Karen McCullough, Mercer.

The first runner-up was Joanne Lynn Hicks, Germansville, with Tracy Higgins, Chadds Ford, as the second runner-up.

Speaking at the banquet was Glen Klippenstein, co-owner of Glenkirk Farms, Maysville, Mo.

Klippenstein was a 1959 animal husbandry major at Penn State. He said he had seven people he considered to have influenced his life, with Penn State's Dr. Thomas King and Professor Glenn Kean having a spot on his list.

Klippenstein's farms are in the purebred beef business. He said they raise Polled Herefords, Angus and Hereford cattle.

"Actually," he said, "we're in the bull business. We raise about 900 calves every year and sell about 350 of them as bulls. We've sold to every state in the nation but three, and to many other countries."

Concerning the current trend to larger framed beef cattle, Klippenstein stated, " I like adequate frame, but if it goes beyond a certain point, we give up functionality. We lose fertility, milkability— and those are too important."

He concluded that the cattlemen have the responsibility to cull out the trash and produce a better seed stock. As a purebred breeder, he closed by saying, "My only reason for being in business is to support the commercial cattlemen by producing the best possible animal."

York Holstein Association talks breeding, feeding

DELTA — Paul and Kathy King's Kingway Farm was the setting of a recent barn meeting held by the York County Holstein Association Tuesday.

Starting off the afternoon, King went down to the barn and talked about each of his cows.

Kingway Farms has a rolling herd average of 16,500 milk and 650 fat, and an average of 106 percent BAA. King feels that to develop a top herd of cows, you need to bring in new blood

He suggests not only using good bulls, but buying cows from other sources to induce new maternal lines.

Speaker for the afternoon was Al Lithgow of the X-tra Factors Corporation, Ephrata. X-tra Factors Corporation is a nutritional consulting firm.

Lithgow started out by stating the dairy cow originally produced just enough milk to feed her calves. Now man has turned her into a factory that produces enough milk for many People.

"Even though this is true," stated Lithgow, "Dairy cow nutrition is the most lacking nutrition of all livestock."

Lithgow then discussed how to feed cows for a 20,000 pound herd average. The main things to consider, he said, are good management, and a well-balanced feeding program.

Make sure there is some kind of a buffering agent in your feed such as bicarbonate of soda, sodium benzonate, or a yeast culture, he advised.

Minerals are also very important. Farmers need to test their feeds and roughages to see the mineral content and then plan accordingly for minerals to be fed.

A well-balanced ration will help your cows to produce more milk.-PG

PENNSYLVANIA AGRICULTURE

PA

WE'RE GROWING BETTER

Barley named

(Continued from Page A1)

designated farmlands for use as highways, developments, or for disposal of solid or liquid wastes.

The Board will review such plans and see if the land is suitable for the proposed use or whether other less valuable or non-agricultural land is available for the project.

Both Barley and Benner must have their nominations approved by the State Senate.

According to the Governor's Office, the nominations have been entered on the Senate calendar.

Barley said he was working this week on completing the necessary papers, including a financial disclosure statement, required for the position.

He said Hallowell mentioned the possibility of his serving on the Board and he had agreed.

"I feel it is an important area. When asked to contribute, I was willing to do so," Barley said.

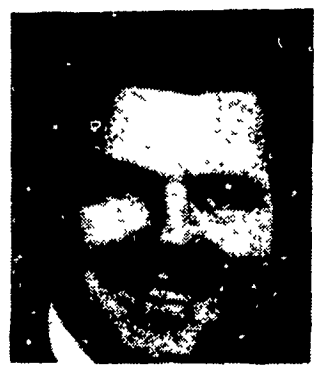
The Barley operation, where John farms with his brother Abram, was threatened in 1977 by a landfill. An active legislative and media campaign eventually saved the farm.

This Board will review projects such as the one which threatened the Barley farm.

"Naturally, since we were involved with this sort of thing, I decided to serve," Barley said.

The members of the Board, who serve without pay, will review any proposed farmland condemnation by the Commonwealth.

Barley said he does not figure PennDOT will be too



John Barley

busy with new construction because of the present economic slowdown.

Although he did not see the road construction area as a busy one, he added he really was not sure of how much of his time the Board would require.

In addition to experience fighting a landfill on his home farm, Barley brings a broad background as a dairyman since 1963.

He is co-chairman of the political education program of the Lancaster County Farmers' Asscciation, director of the Lancaster County Holstein Association, and former district president of the Inter-State Milk Producers Co-op.

The Barleys have been recognized as Master Farmers.

John Barley's fellow nominee, Charles Benner, is a 39 year old dairyman who has been farming with his father since 1958 in a partnership at Mt. Pleasant Mills Farm.

Benner has served as president of the Snyder County Farmers Association and the County Extension Service.

He also has been an officer of the County Holstein Club, the Snyder unit of Northeastern Breeders Association, and his DHIA

He brings experience in planning from his participation as agricultural representative in Snyder County on the Susquehanna University rural need committee and as a PFA program evaluation committee member.

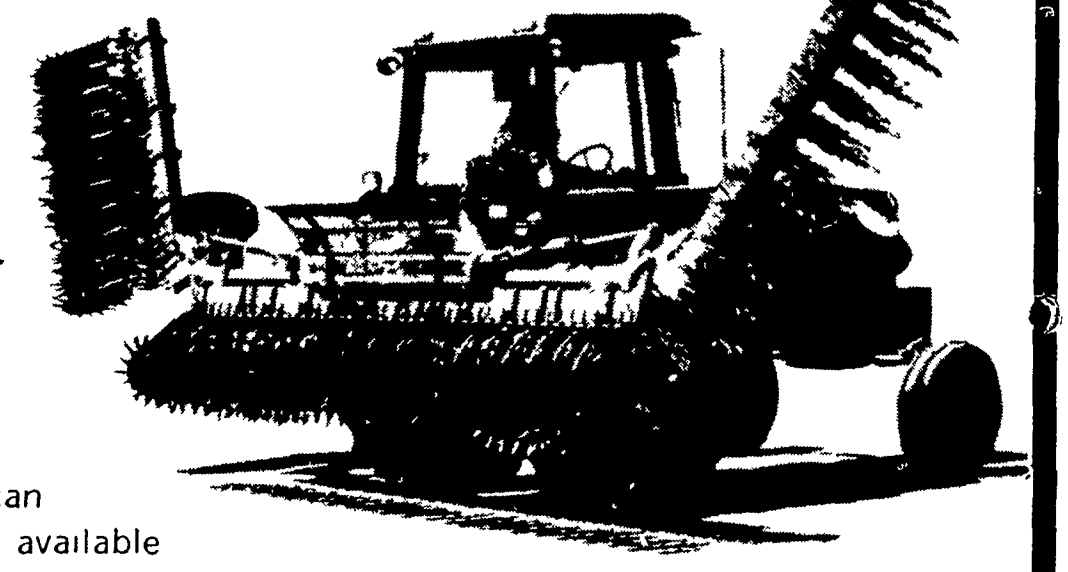
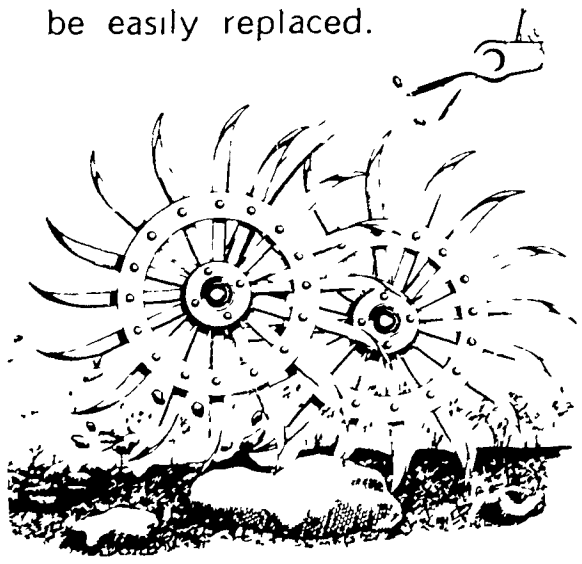
THE MOST ADVANCED DESIGN IN ROTARY HOES IS BY M&W!



The M&W Rotary Hoe controls weeds better because each wheel works independently, free to follow the ground contour without being effected by a neighboring wheel. Spring loaded arms assure maximum ground contact. Maintenance is kept to a minimum with replaceable, permanently lubricated ball bearings on each wheel and self sharpening forged teeth can be easily replaced.



Each wheel is mounted on its own arm, free to follow the ground contour for maximum weed control and crust busting

With rigid models available in 15', 21', 28' and 30' widths, and hydraulic fold models in 21', 25' and 30' widths, M&W has a size for every farm. Standard features such as the M&W E-Z hitch make the M&W Rotary Hoe an even better investment. Take a closer look at the most advanced design in rotary hoes today at your nearest M&W dealer or write for more information.

Farm family scrapbook

(Continued from Page A1)

half-way up. There's a good view of TMI from the top, but they were wondering if it was worth it."

Friday, March 30: "Today it was a New York Times' man who wanted a cow in the field to photograph the towers in the background."

Nissley raises Holstein steers and fortunately had one specially tame that could be called upon for the photo.

"I let the steer out in the field," Nissley said.

"At first, he was real frisky, jumping and running around. The photographer couldn't understand why the animal just wouldn't hold still for the photo. Finally he calmed down enough and I held him while the picture was taken."

Nissley also did quite a bit of hauling an empty manure spreader around the field that looks down on the power plant.

"The photographers wanted some action in the field," Nissley said.

"I just drove the tractor back and forth pulling the empty spreader. They waved their arms this way and that like a movie director trying to line me up with the towers."

The scrapbook continues with Mrs. Nissley's entry for Saturday, March 31:

"I wanted to go to Uncle Henry's to spend the day but Daddy didn't think it was necessary so we stayed home. We went down to the little tenant house and painted the kitchen and laundry. But we kept the radio on constantly."

Saturday night: "We feel very much alone. It was dark all around us and the helicopters were flying over every 15 minutes."

The Nissleys explain that this was a low point for them during the first week. Many neighbors had evacuated and their darkened houses were constant reminders.

Sunday, April 1: "We had a wonderful service at Good's Mennonite Church, committing everything to God and asking Him to give wisdom to those in authority and to keep us safe.

"In the afternoon, President Jimmy Carter came to TMI and we went over to see him."

Pasted in the Nissley scrapbook is a blurred photo of the president's limo as it sped by the onlookers.

Sunday night: "They were still making it sound like we might have to evacuate so we packed a suitcase."

Monday, April 2. "Things began to sound better so we stayed."

The family had planned to go to Juniata County if evacuation had been ordered. The 50,000 hens were on automatic watering and feeding, but there was still the daily problem of packing the eggs, requiring someone to return to the farm.

Tuesday, April 2: "As the days ahead unfolded. we had news reporters about every day who took pictures and asked questions."

Some Brazilian reporters particularly were remembered by the family.

"They wanted to visit the chicken house," Nissley said.

"They had never seen anything like it and seemed to be more amazed with it than the accident."

Just about a year has passed since the accident and Nissley encounters regular reminders. He doesn't need to follow the news to be aware of them, either.

"I drive school bus and watch the plant's parking lot as I go by," he said.

"If there are a lot of cars in it, I know the reporters are here and something is going on."

When he's out in his fields, Nissley only needs to glance overhead. Eighty of his 230 acres have power lines above them.

"When I'm pulling a wagon and it's damp, I watch myself," he said.

"Jumping off the tractor and touching the wagon can give a shock that you really feel.

"When I make a round of the fields, I pass under them eight times.

"Sometimes at night you can really hear those lines. It sounds just like a frying pan."

Looking back, Mr. and Mrs. Nissley have somewhat conflicting views about the plant.

"I'm not really fearful of it," Nissley said. "If we want the power, I guess we need them. But now let them be more cautious, put more safeguards in them and build them away from population centers."

Mrs. Nissley has different strong feelings.

"I don't like it," she said.

"I wish they would close it down and never open it. There's the problem of getting rid of the wastes, too

I don't think that it's the type of thing we should give to our future generations

Speaking of generations, quite a few of the Nissley family have lived on that land.

Grandson Jeffrey is the eighth generation.

A lot of family history has gone into the land, but none compares to that week or so about a year ago recorded in the Nissley scrapbook for 1979

Family scrapbook brings back vivid memories of the week following TMI accident for Mr. and Mrs. Clair Nissley, of Dauphin County.

Brooks End holds spring sale

BEAVERTOWN — Brooks End and Par Kay Farms, Beavertown, PA. held their annual Spring Sale on March 7.

A total of 181 head sold for $52,930, for an avg. of $292. Also 121 head of pure-bred boars and gilts averaged $349.

Horse behaviour to be studied

CHAMBERSBURG — A short course, intended for anyone of high school age and above who is interested in the Behavior of Horses will be held; 6 sessions starting March 26. Topics include: maintenance behavior, social behavior, communicating behavior, sexual behavior, mother-young relationships, and play.

Instructor for the sessions will be Ronald Keiper, Associate Professor of Biology, at Penn State. Keiper has done extensive research with the wild ponies on Assateague Island.

The sessions will be held at the Chambersburg Area Senior High School, Wednesdays from 7:00-9:00 p.m.

Cost is $24.00 per person which includes all course materials.

For more information call (717) 749-3134.

Goat Gang 4-H Club meets

FLEMINGTON, N.J. — The January meeting of the Goat Gang 4-H Club was held at the home of their leader, Anna Hartman, of Stockton.

The club is presently planning to bring goats for a 4-H program to the Hunterdon State School.

BANVEL®

Distributed By

P. L. ROHRER & BRO., INC.

SMOKETOWN, PA PH 717-299-2571

In minimum till corn... "Banvel® does a better job."

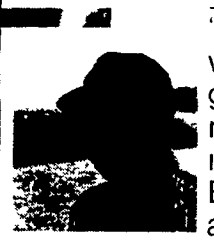
herbicide

Wayne McGinnis, White Hall, MD

"Since we started using Banvel* herbicides six or seven years ago, we hardly ever see morningglory anymore We get very good control of thistle. Compared to 2,4-D, Banvel does a better job It gives a broader range of control of some of the more resistant broadleaves " Wayne McGinnis, White Hall, MD 600-700 acres of corn

"Go in with a half-pint of Banvel and a half-pint of 2,4-D With Banvel, control has been excellent Since we started this program, we just don't see weeds at harvest " Fred Duncan, Broad Run, VA 1000 acres of corn

"Old 2,4-D has been a standby for years But Banvel herbicide with 2,4-D gives much better control with Banvel herbicide and 2,4-D we're getting weeds we did not get with 2,4-D alone . . Banvel herbicide looks like the most economical way to control problem weeds " John 'Buddy' Burner, Luray, VA 150-200 acres of corn



"Canada thistle is our biggest problem . . we went to Banvel herbicide because we got twisted corn with 2,4-D. You have more tolerance with the weather. Banvel is a lot safer than the old 2,4-D." Breck Debnam, Chestertown, MD 2400 acres in corn

Successful minimum-till corn producers depend on Banvel* herbicide to stop tough, resistant, late emerging broadleaf weeds such as seedling Canada thistle, morningglory, pigweed and lambsquarter Tank-mixed with atrazine, Banvel knocks out horsenettle or combined with 2,4-D, it will stop velvetleaf, Canada thistle and many more.

Follow the lead of other successful Banvel users who have learned that Banvel herbicide is a much needed "success" ingredient for higher minimum-till corn yields.

*Banvel is Velsicol s brand name of dicamba herbicide
Velsicol reminds you before using any pesticide, read the label

State poultrymen gear up for annual fund raising banquet

LANCASTER — Danny Davis and the Nashville Brass will be entertaining at the Pennsylvania Poultry Federation Annual Fund Raising Banquet on April 10, 1980, at the Host Farm in Lancaster, Pennsylvania.

With 1446 in attendance last year, over 1600 are expected this year as the largest poultry banquet in the Northeast continues to be the biggest attraction since caged rearing.

Many explanations have been offered for this Pennsylvania phenomenon from supporting the important work the Federation does for the industry to the gala atmosphere of the banquet itself. But in some instances, the massive numbers of people have just prompted others not-to-be-left-out.

The Co-Chairmen of the Banquet, Bill Carlin, Hubbard Farms; Bob Graybill, Pennfield Corporation; and Dale W. Weaver, Victor F. Weaver, Inc., report they are better prepared for the crowds this year than in the past.

The banquet was reorganized for 1980 utilizing a larger area for the social hour and two banquet rooms. Attendees are together for the social hour then report to the banquet room of their choice for the remainder of the evening.

The program, meal and entertainment will be identical in both banquet rooms. This is accomplished by the performance of two different magic acts while the two name entertainers refresh and exchange rooms.

The Co-Chairmen commented that the banquet has been moved three times to accommodate larger crowds. However, this year they are prepared to handle 2000 people if necessary and the two banquet rooms should give everyone more comfort than in the past.

When asked what they will do if the banquet eventually goes beyond 2000, the Co-Chairmen said, "Quite frankly, we have no idea."

For ticket information, various poultrymen throughout the state can be contacted or the Pennsylvania Poultry Federation at 500 N. Progress Ave., Harrisburg, PA 17109, or telephone 717/652-7530.

GIGANTIC SELECTION In Lancaster Farming's CLASSIFIEDS

The Vicon KM-240 cuts and conditions the tallest, tangled, wettest, heaviest, hay This new mower-conditioner eliminates a pick-up reel, so you can put up more hay — FASTER With a working width of 7'10", it can mow twice as much area in a day as most competitive models Most competitors use a pick-up reel, which limits ground speed, adds maintenance problems and allows leaf loss

The Vicon six-disc cutter bar feeds your crop directly, stem first, into rubber rollers that condition green hay or wet grass It dries faster and bales easier, saving time and labor

Vicon

The KM-240 has no chains, no belts, no sickle bar If you need only a mower, look at the Vicon CM-165 (4 discs – 5½' working width) or the CM-240 (6 discs – 7'10" working width) Both make clean cuts in heavy grass or tangled crops

Ask your dealer to show you the Vicon KM-240 mower-conditioner Cut your hay-making down to size with VICON — the top cat in mower-conditioners

Lancaster 4-H clubs set several meetings

LANCASTER — The newly formed Lancaster County 4-H Sheep Club 4-H club will meet on March 17, 1980 at 7:30 p.m. in the Farm and Home Center.

Docking lambs will be the topic of discussion and election of 4-H club officers will be the evenings program.

4-H Club Leaders, Dorothy and Clyde Brubaker, Lancaster, and Robert and Ann Rohrer, Quarryville, invite all interested people.

On March 19, 1980 at 7:30 p.m. 4-H'ers and families wanting to host Wisconsin 4-H exchange members are asked to attend this important planning meeting, in the Farm and Home Center.

Lancaster County 4-H'ers who traveled to The Dairy State last summer will have the opportunity to host those 4-H'ers this summer.

There will be a brief business meeting of County Council to finalize plans for future county-wide 4-H programs: 4-H Fun Night, 4-H Teen Retreat, Roller Skating Party and 4-H Officer's Training.

All 4-H members, families and friends are invited to the swim party on March 29 at Golden Meadows, from 7-9 p.m. The cost is $2 per person.

A 4-H adult leader training session will make leaders aware of all the opportunities available to 4-H'ers and leaders.

All 4-H leaders are encouraged to attend the workshop on Monday, March 31, 7:15 p.m. at the Farm and Home Center.

"Leaders and the News" will be the closing event of the evening.

Lancaster County 4-H is offering a new project this year - 4-H Roller Skating. Classes begin on March 29, from 10-11 a.m. at Overlook Roller Rink. It will run for 9 weeks.

Learn the skills of this popular sport by enrolling in this 4-H club.

Anyone between the ages of 8 to 19 years is eligible to join.

The cost is $1.50 per class. 4-H leaders can skate for free.

Pre-registration deadline is March 22. Call Nancy Meyers, 4-H Agent 717/394-6851 or write to: Lancaster Co. Extension Service, 1383 Arcadia Rd., Room 1, Lancaster, PA 17601.

General Features:

- Integrally cast cylinders with inserted and removable wet type cylinder liners
- Light hypereutectic alloy pistons
- Extra-resistant steel connecting rods alloyed with special alloy head bearings
- Surface hardened steel crankshaft
- Drop-forged, casehardened and tempered steel camshaft
- Anti-friction cast-iron tappets alloyed
- Cast-iron tunnel type crankcase
- Rotary injection pump with mechanical governor
- Force-feed lubrication with built-in circuit and lobe type pump
- Diaphragm pump feed
- Oil and fuel filters with integral type element.

Special structure and patented engine with consequent increases in performance and easier operation with low weight/output ratio low smoke emissions.

Engine based on a design "modulus" formula which allows a maximum parts standardization and interchangeability.

24 HOUR SERVICE

Farmers cited for dairy production

LANCASTER — Dairymen from nine counties in Pennsylvania and five counties in Maryland were among nearly 100 customers honored Wednesday by Pennfield Corporation at their ninth annual dairy awards luncheon.

The program, which was held at The Historic Strasburg Inn, honored customers with high herd production, high increases and high record cows. Under Pennfield's 1980 standards, a herd was eligible if, according to official DHIA records, it produced more than 17,000 lbs. milk and/or 625 lbs. butter fat.

Herds with an increase of 1000 lbs. of milk or more per cow over the last year or herds with an increase of 50 lbs. of butter fat per cow over the last year were also honored.

To qualify as a high record cow, the following requirements had to be met: Holstein - 1050 butter fat and/or 26,000 lbs. milk; Brown Swiss - 750 lbs. butter fat and/ or 19,000 lbs. milk; Ayreshire, Guernsey, or Jersey - 750 lbs. butter fat and/or 16,000 lbs. milk.

(Turn to Page A37)

Lancaster County dairy farmers honored by Pennfield Wednesday were (back row left to right): Robert Book, Rocoma Farm, Leola; Donald Bare, Double Spring Farm, Lancaster; Peter Witmer, Penn-Del Farms, Lancaster; Donald Breneman, Romella Farms, Lancaster; Curtis Hess, Wye Oak Farms, Strasburg; and Art Breneman, Willow Bend Farm, Willow Street. Shown in front are John Brackbill and Dick Ibach of Good's Feed mill, distributor of Pennfield Feed.

Dairy winners from Chester and Lancaster Counties include (front row left to right): Peeple, Pep-L-Lea Holsteins, Oxford; Simon Zook, Meadow Oak, Oxford; Paul Ranck, Harlen Farms, Cochranville; Robert Hershberger, Center Springs, Quarryville; Clarence and Barry Neff, Quarryville. Back row: Mrs. Robert Pepple, Patty Edwards, Herdswoman, Pep-L-Lea Holsteins, Mrs. Simon Zook, Elvin Ranck, Pennfield Area Manager Peter Knutsen, Mr. and Mrs. David Troop, Cochranville; Mrs. Robert Hershberger, Nelson Young, Timberlawn Farm, West Grove, and Richard Staner, Crumdale Farm, Berwyn.

Honored for outstanding dairy production were (front row left to right): Galen Hostetter, Gap; Greg and Jay Landis, Pataja Farms, Lancaster; Robert Rohrer, Washington Boro; Jess Balmer, Gordline's Farm, Lititz; Kenneth Myer, Elizabethtown; C. Robert Kilgore, Airville. Back row: Mr. and Mrs. G. Hershey Hostetter, Gap; Mr. and Mrs. Norman Hershey, Springgarden Farms, Gordonville; Pennfield Area Manager Steve Leiser; Mr. and Mrs. Nelson Habecker, Charnelle Manor Farm, Lancaster; Paul King, Kingway Farm, Delta; Mr. and Mrs. Harold Bair shown with son Ronald; Swan Road Dairy Farm, Chester; and Robert Kilgore.

AGRICULTURE DAY MAR. 20

STANFORD'S

Lancaster

Brand

Alfalfa

New profit-maker for farmers who grow alfalfa in the mid-Atlantic area!

Here is the alfalfa you've been looking for! It has all the characteristics to help you harvest a better, more profitable alfalfa crop.

PUT IT TO WORK ON YOUR FARM

for High Yields
Lancaster produces high tonnage of protein rich haylage or hay cutting after cutting.

for Disease Resistance
Lancaster has resistance to bacterial wilt and good tolerance to both Anthracnose and Phytophthora root rot (wet foot disease).

for Long Stand Life
This wide spectrum disease resistance in a North American type alfalfa gives Lancaster wide adaptation, hardiness and a long stand life.

for Profits
This high yield potential, disease resistance and long stand life in Stanford's Lancaster brand Alfalfa will provide the profit potential you've been looking for.

Plant Lancaster Brand Alfalfa this spring.

809 North Bethlehem Pike / Spring House, PA 19477

Gingerbread barns put the icing on Elizabethtown Young Farmers banquet

MT. JOY — Sugar and spice and everything nice, that's what gingerbread barns are made of.

With fifteen batches of gingerbread, twelve pounds of confectioners sugar and a hundred hours of work, three energetic women fashioned centerpieces that stole the show.

The occasion was the fifth annual banquet of the Elizabethtown Young Farmers Association. And the women were: Nancy Garber, Joyce Shultz, and Patty Hudson.

See related story, Elizabethtown Young Farmers banquet page C30.

The idea came to Nancy Garber while she was searching for something unusual to use as a centerpiece for the annual banquet.

Nancy had seen Patty present a program to the Rheems Elementary School. Nancy approached Patty, proprietor of Pattycakes bakery which specializes in gingerbread houses, about the project.

Since funds were limited, Nancy prevailed upon Patty to allow herself and a friend, Joyce Shultz, help make the fifteen barns which would be needed for centerpieces.

Each barn was slightly different from every other barn. When viewed in a group, it looked like a winter-clad farm community.

Every individual barn was complete with details such as crosspiece doors, windows, pretzel stick barnyard fence, farmer and his livestock.

Shown from left to right are Patty Hudson, proprietor of Pattycakes, Nancy Garber and Joyce Shultz.

Patty created a suitable pattern which included a simple two-story barn complete with pretzel barnyard and a horse and cow.

An additional 290 tiny gingerbread boys and girls were baked and decorated to stand by the barns and to be used as decorations in the cupcakes for dessert. Fifteen of the boys on the cupcakes matched a boy on the barn, and those people who found a matching boy at their place at dinner won a gingerbread barn as a door prize.

This was not a first attempt at a barn for Patty. Just a month earlier, Nancy had asked her to recreate their barns and outbuildings including silos as a gift to her husband for his birthday. Working from photographs and suggestions by Nancy, Patty made a very personalized "Garber barn."

Eleanor DeLong, a Quarryville cake decorator, also donated time to help complete the structures.

The results of all of their labors were fifteen sturdy gingerbread barns laboring under their snowy loads of confectioner's snow which served as lively conversation starters for a room full of appreciative farmers.

Dairy Awards

(Continued from Page A37)

York and Fulton County winners included from left: Leo Rutter, Rutter Bros. Dairy, York; Mr. and Mrs. Martin Grey, Sinking Springs Farm, York; Pennfield Area Manager Eugene Schlosnagle; Mr. and Mrs. Wallace Mellot, Wallymae Farms, Harrisonville, and George Rohrbaugh, Manager of Leader Farms, York.

Maryland customers honored, representing Washington, Montgomery and Frederick Counties, were from left: Mr. and Mrs. Lee Worthington, Fair Oaks, Smithburg; Ken Davis, Pennfield Sales Representative; Richard Poole, Area Manager; Harold King, Kingstead Farms, Damascus, and Mr. and Mrs. Robert Zimmerman, Janessa Holsteins, Mt. Airy.

Representing Cecil and Kent Counties among the Maryland winners (front row left to right): John Peoples, Jr., Cherry Valley Farm, Rising Sun; Robert England, Zee-M Dairy, Northeast; Thomas Mason, Fawnwood Farm, Chestertown, and William Haines, Rising Sun. Back row: Mr. and Mrs. William Fell, Fell Farms, Calvert; Alfred Crother, Rising Sun; Peter Knutsen, Pennfield Area Manager, and Mr. and Mrs. Blair Yurkanin, Elm-Brook Farm, Colora.

Mr. and Mrs. Frank Graybill, Restful Acres Farm, Hershey, representing Dauphin County in the award ceremonies, shown with Robert Gregory.

Lancaster Holstein club to tour Bedford, Blair

LANCASTER — The Lancaster County Holstein Tour will be held March 27, and will travel to Bedford and Blair Counties. The tour will leave at 8 a.m. sharp from the Farm and Home Center.

Members will visit MarCove Farms, owned by Mr. and Mrs. George Bridenbaugh.

They have an 18,000 pound herd average with 620 fat on 66 head. It is the home of Dunwood Chief Carmel, who is projected to have 24,000 pounds milk and 1,000 pounds fat this year.

Next stop will be the Ken Mowery farm where they milk 205 head of cows with 16,500 pound herd average.

Then farmers will hop over the mountain to Singing Brook Farm owned by Mr. and Mrs. Obie Snider. They milk 125 head, with a herd average of 17,000 pounds.

The last stop is the home of Polled Holsteins, Burket Falls Farm, owned by Mr. and Mrs. Dave Burket.

Dinner will be at Chilcoat's Restaurant and it will be a family style meal. Bring a bag lunch with you. Tour is expected to return about 9 p.m.

The tour and meal will cost $20. Please make checks payable to the Lancaster County Holstein Club and mail to Jere Skiles, R2, Narvon, Pa. 17555. Reservations must be made by March 20.

Decision opens door for increased milk promotion budget

LANCASTER — A final decision has been issued that will allow dairy farmers operating under the Middle Atlantic federal milk marketing order to use a larger share of their milk payments for advertising and promotion, it was announced by officials of the United States Department of Agriculture.

A poll will be conducted by the market administrator of producer cooperatives to determine whether producers approve the amended order and the amended advertising and promotion program. October, 1979, is the representative period for determining voter eligibility.

P.R. Smith, assistant secretary of agriculture for marketing and transportation services, said that the decision, if approved in the poll, will change the way assessments for advertising and promotion are calculated.

Assessments — now on a fixed rate schedule — will be based on the average price that handlers pay farmers for their milk. The new rate will be one percent of the weighted average prices during the 6-month period ending September 30 of the preceding year.

Smith said the change will increase assessments to 12 cents per hundred-weight for 1980 — up from the current 7 cents. This increase, he said will have no effect on the retail price of milk which consumers pay.

Another change will be that producers who don't wish to participate in the advertising and promotion program will have to file a request for a refund only once a year rather than each quarter. Also, producers will be able to receive refunds monthly rather than quarterly.

The decision also will establish a late-payment charge on overdue payments to producers, cooperatives, and the market administrator.

Another change will require the market administrator to make payments due handlers from the producer-settlement fund on or before the 16th rather than the 17t day after the end of ea month.

The decision is based evidence gathered at public hearing last July Philadelphia.

Changes in the fundi rate were proposed b Pennmarva Dairymen Federation, Inc., whic represents most of t producers supplying t market. Officials with t cooperative said the ra increase was neede because costs of operati the advertising program a increasing constantly.

PUBLIC AUCTION

OF CATTLE — HORSES — HOGS — FARM EQUIPMENT — HOUSEHOLD

TO HOG PRODUCERS
(PRESENT AND FUTURE)

WEDNESDAY, MARCH 26
AT 12:00 NOON

A SPECIAL LUNCHEON
AT THE HOLIDAY INN EAST,
Located off Rt. 30 East of Lancaster

AFTER LUNCH . . . A SHORT SEMINAR AND DISPLAYS OF HOG BUILDINGS AND EQUIPMENT

A persons' knowledge is only as good as the source. Therefore we have obtained the leaders in the hog industry to provide you with the latest information to help you be more profitable in the 1980's.

THE FOLLOWING TOPICS WILL BE DISCUSSED

TOPIC #1
Challenges facing the hog producer in the 1980's.

TOPIC #2
NEW SOLAR HOG HOUSE
A producer in Petersburg, Iowa says "We are sold on the modified open-front concept." Even in -22° weather, the Hog Unit inside was 68°.

TOPIC #3
How to obtain excellent ventilation in farrowing, nursery and finishing units - President of AAA Association of Michigan.

TOPIC #4
The outlook for 1980. Also what requirements you can expect for loan applications in 1980. Farm Credit Service - Ron Bard.

York potato growers discuss potato beetle, pyrethyroids

BY PATRICIA GREEK
Staff Correspondent

STEWARTSTOWN — The annual York County Potato Growers meeting was held last Thursday, at the Centre Presbyterian Church, Stewartstown.

The morning session began with a panel discussion on the Colorado potato beetle, its effects and control. Panel members were Clair Flinchbaugh, Felton; Jack Thompson, Glen Rock; and Morg Price, York with County Agent John Smith acting as moderator.

According to Smith, the problem with the Colorado potato beetle started about two years ago, but really became bad last year. At this point, York County received temporary emergency clearance for spray materials to help out.

The panel all agreed that without the pyrethyroids they were allowed to use, the potato crop would have been ruined.

Stan Gesell, a Penn State entomolgist then talked about where farmers stand on the use of synthetic pyrethyroids.

Gesell stated that it will be more difficult this year to get any synthetic pyerthyroids. The Environmental Protection Agency may not issue these three pyrethyroids to many areas of the U.S.

Gesell stated that all potato farmers everywhere will need to write their Congressmen about these Pesticides. "We'll need all the support we can get," he remarked.

Next Gesell discussed how to use these Pyrethyroids.

"Don't depend on them too heavily," he emphasized, "Don't use them any more than is necessary as there aren't any new pesticides coming along."

The most critical point for the potato plant is from blooming to three weeks after bloom or from late June till the end of July. Temic is an effective pesticide for good control till the end of June.

After the Temic runs out, two applications of Vidate, about one week apart work well.

Gesell stated that one aphid per leaflet in July is more critical to the potato plant than six aphids per leaflet in August. This is the time that the leaflets are just developing.

Next on the program was Richard Cole, also of Penn State, speaking on "Blueprint for the 80's".

According to Cole, potato growers should be attempting for quality yields and a fixed price. On the whole, Pennsylvania potato growers have four major problems.

He said the first is cost of production is way too high. Growers need to utilize the inputs more for higher quantities and qualities.

Quality is another concern. The long-term chipping potato just simply isn't being grown in this area.

In production, growers are limited in production by several potato diseases and aphids.

Last, but not least, marketing in today's potato market is complex and unstable.

Cole quoted "This area of York and surrounding counties have 5500 acres of potatoes with a crop value of $6.5 million per year."

Cole then discussed potato varieties.

Top yielding last year in the State were Kennebec, Buckskin, ND 8891-3, and Penn 71. Varieties with the top specific gravity and good chip color were Atlantic with a gravity of 1.087, BelRus, Belchip, and Norchip.

Concluding the meeting, was the election of two new directors. Elected were Lamar Newhouse and Marlin Brown.

Davidsburg 4-H Club to meet

DOVER — The February meeting of the Davidsburg 4-H Club was held at the 4-H Center.

Dates to remember are: 4-H Auction - March 28, County Council - March 5, Family Night - March 15, 7:00-10:00 p.m., Demonstration Day - May 14, and next Davidsburg 4-H Club meeting - March 20.

The club will be selling ham & cheese sandwiches. The Davidsburg Club will be helping the Thomasville Club with a petting zoo at the York Hospital Fete May 16-17. The club also voted to have another annual clean-up drive.

After the meeting, projects were explained: Foods, Joan Shermeyer; Ceramics, Pat Rauhauser; Leathercraft, Emily Livingston; Handyman, Paul Eyster; Sewing, Eleanore Eyster; Knitting and Crocheting, Darlene Spahr; Gardening, Richard Spahr; Jean Painting, Painting; and Cake Decorating, Aileen Detter; and Pet Care and Livestock, George Livingston.

Horsing around at New Holland special auction

BY PAT KAUFFMAN

NEW HOLLAND — They came by buggy, by car and by foot. They came to buy, to look, and to spend the day. But they came...to the Friday New Holland horse sale.

The special Friday horse auctions at the New Holland Stables are very different from the regular Monday horse auctions here.

Broad brims and clouds of cigar smoke were the first indicators of the difference to greet the visitor. And farther inside, the predominence of bays, chestnuts and sorrels, the length of the ears and the breadth of the backs told the story.

The goods offered for sale here were the backbone of the plain man's livelihood. They were not the quick stocky quarter horse, or the gray sloped shoulder hunter or the occasional thoroughbred. These animals were the sixteen hand Saddlebreds, the matched mules, the giant work horses.

In the stands, spectators and bidders, mostly male, assesed the animals one by one as they entered the ring and the seller hawked his wares. They checked the mouth, they watched the rhythm of the feet for flaws, they kept a wary eye on fellow bidders.

Buyers and lookers cram the alleys at the Friday auction. Mules and work horses were in the most plentiful supply with only a scattering of driving horses.

Behind the stands, they pressed through crowded aisles, scanning the goods, checking pedigrees, skimming the legs with their hands, talking Dutch to their friends, waiting for the horses they'd decided on to be brought in.

This was a day for decisions. There were fields to be plowed soon and many mules for their carriages to travel. Here the horsepower burned hay.

While movement in the stables was mostly slow and resolute and the horses stood rump to rump with astounding patience, the signs warned buyers to enter at their own risk and spectators to stay clear. And the familiarity of these people with the beasts here hit home as an otherwise quiet, slow-moving Amish gentleman leaped nimbly with a shout out of the path of a hoof.

What ladies there were, talked animatedly in the stands to friends they could not call on the phone. And business associates settled outstanding hay bills, quoted prices on supplies needed, or detailed stock they had for sale at home. To all of them, the special auction was more than a sale, it was an ingathering, a time to renew acquaintances, a social function.

Sprinkled among the plain sects were "English" people, mostly in their later years. Some came to reminisce with friends on bygone days, some came to buy a horse to till the garden and plow the little field. Some came for something to do.

A few buyers came longer distances to purchase the large horses for pulling specialized parade and ceremony vehicles.

While the candy vendor said horse prices were down, Paul Snyder, auction manager, said that generally speaking the higher-priced horses were not there, and that prices for the qualities available were steady.

Attendance was not as heavy at this recent special auction. Veteran auction-goers stated that most farmers who use the animals have already purchased their pulling stock.

The top price for the day was a pair of work horses which brought $3900.

The next special horse auction is scheduled for Friday, April 11.

Prices paid Friday were as follows:

There were reported receipts of 235 head of horses, mules and ponies. Market: steady.

Load of driving Pa. 725.00-900.00 singles. Load of driving TN. 950.00-190.00 singles.

LOCAL: Work horses 650.00-1400.00 singles; mules 600.00-1200.00 singles, 1675.00-2500.00 pairs; Driving horses 600.00-1325.00.

Load of work horses, Mich. 950.00-1550.00 singles, 1700.00-2500.00 pairs; Load of Canadian work horses 1200.00-2500.00 singles, one pair 2575.00; Load of TN. work horses 900.00-2000.00 singles, 2400.00-3900.00 pairs; Load of TN. mules 925.00-1175.00 singles, 2000.00-3100.00 pairs.

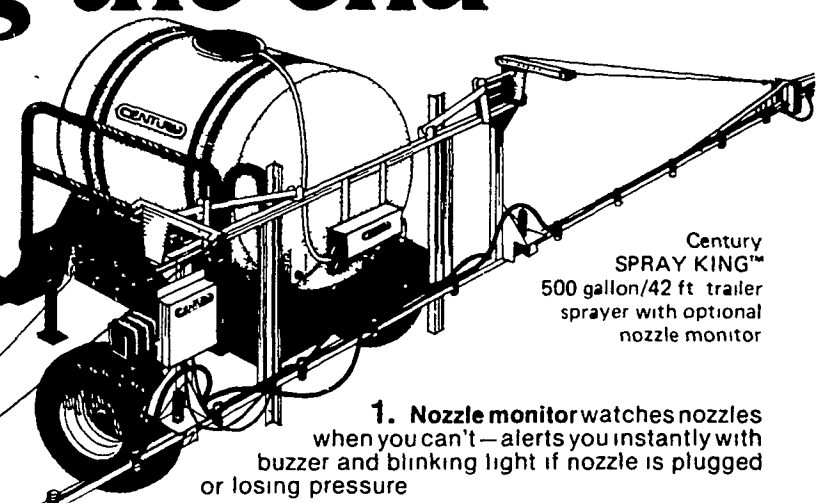
Announcing the end of costly hit-or-miss spraying.



Century SPRAY KING™ 500 gallon/42 ft trailer sprayer with optional nozzle monitor

Century helps assure accurate spraying with all these available advantages:

1. **Nozzle monitor** watches nozzles when you can't—alerts you instantly with buzzer and blinking light if nozzle is plugged or losing pressure

2. **No-drip nylon nozzles** prevent under or over application—keep herbicide from dribbling onto ground, burning crops Won't rust or corrode Wear four times longer than aluminum or brass

3. **Large ⅝-inch E.P.D.M. jumper hose** increases flow to outer nozzles—provides even pressure and proper output

4. **Heavy-duty 1½-inch square tubing** on all booms gives greater, longer lasting strength than round tube booms

5. **Two-speed fast pressure control** lets you increase or decrease pressure quickly, easily as you spray

This spring, get accurate weed control with these features and more See your Century dealer Or write for free 1980 catalog

Don't trust spraying to luck. Trust Century. CENTURY

Md. to hold open house on beef and bull trials

SYKESVILLE, Md. — This year's tenth annual statewide sale of performance-tested bulls has been turned into a bull preview and open house at the University of Maryland's beef cattle research farm near Sykesville.

The Saturday event is scheduled March 22, reports William A. Curry, extension animal science specialist at the College Park campus. An informal, open-air program of talks and demonstrations will get under way at 9:30 a.m. in the corral area near the center of the research farm.

About 18 bulls with good herd size prospects will be available for inspection by prospective buyers, beginning at 11 o'clock. Purchase arrangements can be made by private treaty with individual consignors.

Curry notes that 27 young bulls, representing six beef cattle breeds, will have finished their 140-day feedlot trial just two days before the open house.

A 112-day progress report based on February 21 weights shows one Angus bull with an average daily gain of 4.24 pounds and another with an average daily gain of 3.71 pounds. Both were consigned by Maryland breeders.

The latter bull leads the list in the category of weight per day of age–3.25 pounds–and estimated 365-day weight–1,236 pounds. Second in this category is a Simmental bull consigned by a Pennsylvania breeder. His marks are 3.21 pounds and 1,206 pounds, respectively.

At noon, the action will shift 4.5 miles northwestward to the Eldersburg Community Center. Here, lunch will be served at nominal cost by members of the Maryland Junior Angus Association. And the Maryland Cattlemen's Association will hold its annual meeting in the library.

To find the University of Maryland beef cattle research farm, go north on highway 32 from U.S. highway I-70. After crossing the Patapsco river (south branch) bridge on the Howard-Caroll county line, proceed four tenths of a mile and turn right on Marriottsville road at the east edge of Sykesville.

Then go 1.2 miles and turn left on Slacks road; proceed one mile to the corral area. Signs will be posed at strategic locations to help guide visitors.

Grangers decry state move to furlough chaplains

HARRISBURG — Charles E. Wismer, Jr., Master of the Pennsylvania State Grange, denounced the Pennsylvania Department of Public Welfare's move to permanently furlough all its institutional chaplains in Harrisburg Wednesday.

"It is interesting that a Department that concerns itself with handing out dole money to feed the hungry poor and unemployed puts such a dollar value on the work of God," Wismer said.

The furlough of the institutional chaplaincy staff was accomplished as a result of a requirement by Governor Thornburgh for the Department of Welfare to divest itself of 1000 positions.

As a result, the Department of Welfare announced that it would be replacing its full-time chaplaincy staff with chaplains on a contractual basis.

Wismer, spokesman for the 48,000-member rural organization, noted the move "speaks of a curious detachment from spiritual considerations from such a charitable bureaucracy."

Criticizing the cost-cutting move, Wismer questioned how contractual chaplains could be successfully integrated into therapy programs.

"Clergy not intergrated into the treatment team of an institution would find it difficult to participate in therapy programs–especially if they are not specially trained and experienced," he stated.

The State Grange Master further pointed out that he believed that part-time institutional chaplains might actually be dysfunctional to the therapy goals of the hospitals.

"If they are not part of the patients' normal routine, they might be regarded with distrust, and create negative consequences in terms of long range therapy."

J I Case Needs a Few New Dealers

We are looking for enterprising business men who understand agricultural equipment retailing We being the J I Case Company Founded in 1842 Case now has over 3 000 dealers world wide and an unsurpassed reputation for product quality reliability and current growth

If you think that the farm equipment business requires involvement with many different product lines, you'll find Case an interesting exception As a Case Tractor Specialist you concentrate on *one major product line* agricultural tractors and related tillage tools, because Case builds nothing but tractors for the farm market

Case Dealers sell twelve basic tractors 43 to 300 horsepower Five models are under 90 horsepower, four are the exciting new 90 series - 108 to 180 horsepower and our three big four wheel drive tractors lead the booming 4WD market

High potential marketing areas are available now Profitable Case light construction and outdoor power equipment contracts may also be available As a Case Tractor Specialist you would benefit from liberal financing policies, attractive consumer terms and time-proven Case Rental Systems

Case product and policy advantages, when combined with your own aggressive sales and management abilities, will afford you the opportunity to realize an excellent return on your investment

Are you interested? Please contact
W.M. KIMBROUGH

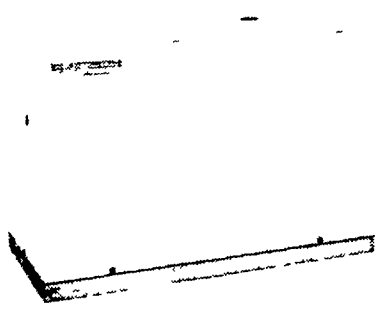
MUELLER HAS A FRE-HEATER® TO FIT YOUR EVERY NEED!

MODEL "18-B"



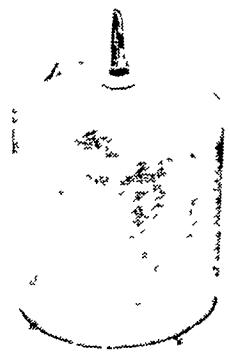
With Self Contained Compressor

One-Year Warranty

MODEL "18-C"

Converts Your Air-Cooled Refrigeration Unit To Produce "Free" Hot Water

One-Year Warranty



MODEL "D"

The Mueller Model "D" is designed for the dairyman who doesn't particularly need the very large volumes of hot water that can be produced by the Fre-Heater "18-B" and "18-C," but who wants to take advantage of the energy-saving and money-saving features of the Fre-Heater.

TWO-YEAR WARRANTY

MUELLER FRE-HEATERS FOR THE DAIRY FARM

EXPLANATION OF MUELLER FRE-HEATERS

Milk coolers on modern dairy farms remove heat from milk promptly after it is produced. To accomplish this requires refrigeration machines and they are generally of the air-cooled type. Air-cooled condensing units literally "throw away" this valuable heat.

On these same farms, large amounts of hot water are needed for prepping the cows, washing the milk cooler, the pipeline milker, other equipment, and the milking parlor itself. It is also advantageous to warm drinking water for the cows in winter.

The Mueller Fre-Heaters conserve energy by capturing the heat normally wasted — it provides FREE hot water!

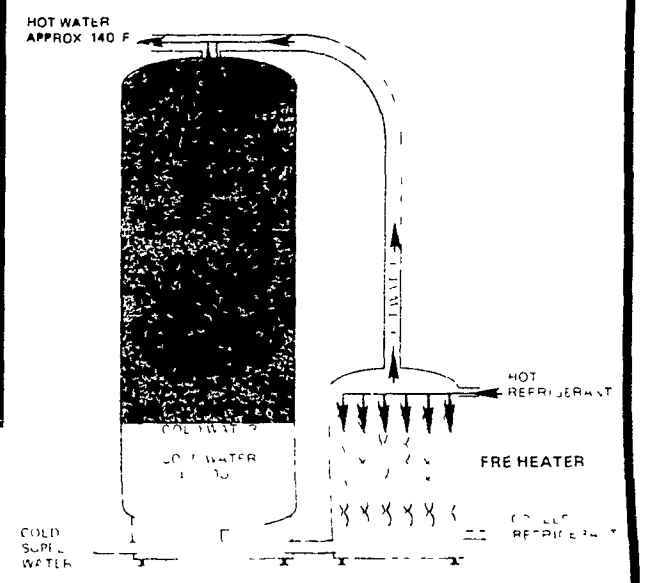
The Mueller Fre-Heater, a heat exchanger, captures the heat resulting in the milk cooling process and uses it to heat water for the dairyman's use. The stainless steel heat exchanger in all models utilizes Mueller Temp-Plate, a patented heat transfer surface used in more than 70,000 Mueller Milk Coolers® around the world. This heat transfer function saves valuable energy and dollars.

Mueller offers three models of Fre-Heaters to meet the specific needs of the individual dairyman — the Model "18-D," Model "18-C," and Model "D."

The heat from milk is transferred to the refrigerant, which must be cooled prior to recirculation for further cooling of the milk Mueller Fre-Heaters transfer this heat to water, providing FREE hot water for use on dairy farms

FRE-HEATER PRINCIPLE

Models "18-B" and "18-C"

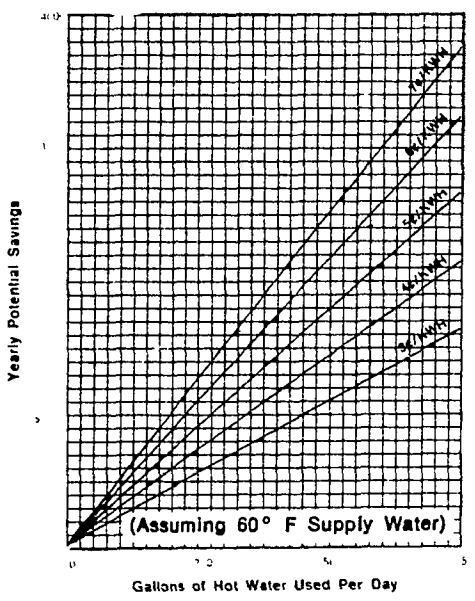


FRE-HEATER ENERGY DOLLAR SAVINGS

Models "18-B" and "18-C"

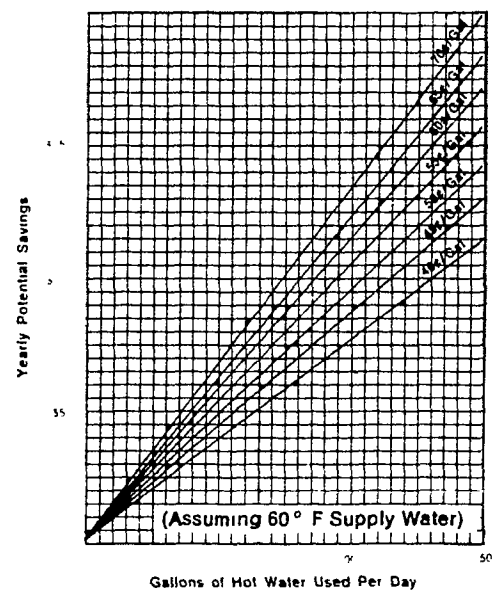
ELECTRIC WATER HEATING

(Assuming water usage does not exceed Fre-Heater output)



PROPANE WATER HEATING

(Assuming water usage does not exceed Fre-Heater output)



Your potential savings from Fre-Heater operation will depend on the quantity of hot water used, amount of milk cooled, and your present cost to heat water

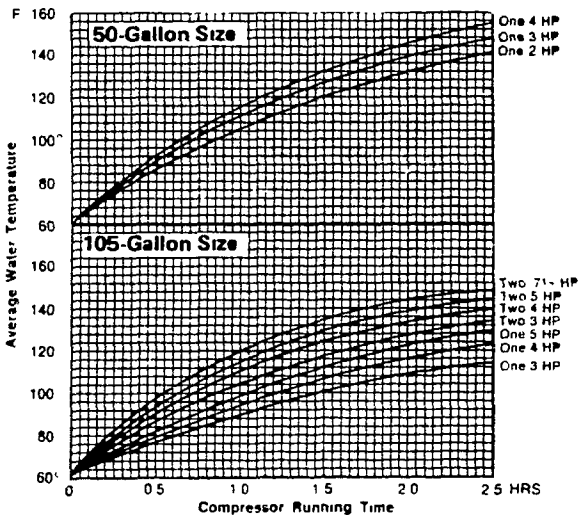
We have prepared two charts to help you determine your savings — one for heating water with electricity, and one for propane heating

First, estimate the amount of hot water you need daily Locate that figure on the bottom of the proper chart Draw a line upward to the rate you currently pay, or expect to pay, for heating water From that point, draw a line to the left of the chart This figure will be your approximate annual savings

As energy costs continue to escalate, so will your savings!

ESTIMATED WATER TEMPERATURES PRODUCED BY MODEL "D"

Average Water Temperature vs Time



Calculations Based On:
1 60° F Cold Water Not Flowing
2 90° F Ambient Temperature
3 10° F Superheated High-Temp Units

The temperature of hot water the Model "D" Fre-Heater generates will vary, based on running time and size of the refrigeration system, as shown in the chart

Chart shows 'average" temperature of water The water in the upper portion of the tank will be approximately 20° F hotter after 2 hours running time

IMPORTANT TAX SAVINGS

All models of Mueller Fre-Heater qualify for Investment Tax Credit and Energy Investment Credit, which means in the year of purchase a savings of as much as 20% of total purchase and installation costs, applied directly as a tax credit, not just a deduction on your federal income tax return.

DE LAVAL™
MANURE SYSTEMS
Manure - Liability or Asset?
We have the equipment and experience to convert what is often a major liability into a valuable asset.
- Mechanically automated manure scraping equipment
- Transfer systems to move manure to storage or field
- Processing equipment to remove odors from stored manure
- Separators and dryers for easier handling and sale of finished manure products

Let us convert your manure liability into a manure asset.

NOTICE

UNITED STATES DEPARTMENT OF AGRICULTURE SOIL CONSERVATION SERVICE CHICKIES CREEK WATERSHED, PENNSYLVANIA. Notice of Intent to Prepare an Environmental Impact Statement. Pursuant to Section 102 (2) (c) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Regulations (40 CFR Part 1500-1508); and the Soil Conservation Service Rule (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environment impact statement is being prepared for the Chickies Creek Watershed, Lancaster and Lebanon Counties, Pennsylvania. This action may involve the use of new innovative nonstructural items such as repositioning, floodproofing or acquiring properties within the 100-year flood plain. Also, a flood warning system may be installed and an accelerated conservation land treatment program may be included. Mr. Graham T. Munkittrick, State Conservationist, therefore determined that the preparation and review of an environmental impact statement is needed for this Federally-assisted action. The action concerns a plan for watershed protection and flood prevention. Alternatives under consideration to reach these objectives include systems for conservation land treatment, nonstructural measures, impoundments, channel improvements and diking. A draft environmental impact statement will be prepared for the entire project and circulated for review by agencies and the public. The Soil Conservation Service invites the participation and consultation of all agencies and persons with special expertise, legal jurisdiction, or interest to assist in the proposed action.

A public meeting was held in the watershed on December 6, 1979, which described the alternatives and various levels of developing the proposed nonstructural action. The sponsors of the project met with the Soil Conservation Service on January 17, 1980, concerning the scope of the evaluation of the proposed action and their participation in the project.

Further information on the proposed action or preparation of the environmental impact statement may be obtained from Mr. Graham T. Munkittrick, State Conservationist, Soil Conservation Service, Federal Building and U.S. Courthouse, 228 Walnut Street, Harrisburg, Pennsylvania 17108, telephone number (717) 782-2202. Graham T. Munkittrick State Conservationist. (Catalog of Federal Domestic Assistance Program No. 10.904, Watershed Protection and Flood Prevention Program - Public Law 83-566, 16 U.S.C. 1001-1008.)

BUYING A TRACTOR OR SELLING A FARM...

both have more in common than first meets the eye. When you are purchasing farm equipment, you compare various makes and models, as well as the service of the dealer and the reliability of the manufacturer to make certain that you are getting the most value for your dollar. Likewise, when selling a farm, you want to make certain that you are getting the most value for the commission dollars you are spending. AT KISSINGER, LEONARD & ASSOCIATES Farm and Land Department, we invite you to compare the complete line of services provided including a comprehensive advertising program and full time sales associates who sell only farms and land and are thoroughly knowledgeable with the most modern farming practices and agricultural lending requirements. There is a difference! If you would like more information without any obligation, please call any of the Farm and Land Department Sales Associates listed below.

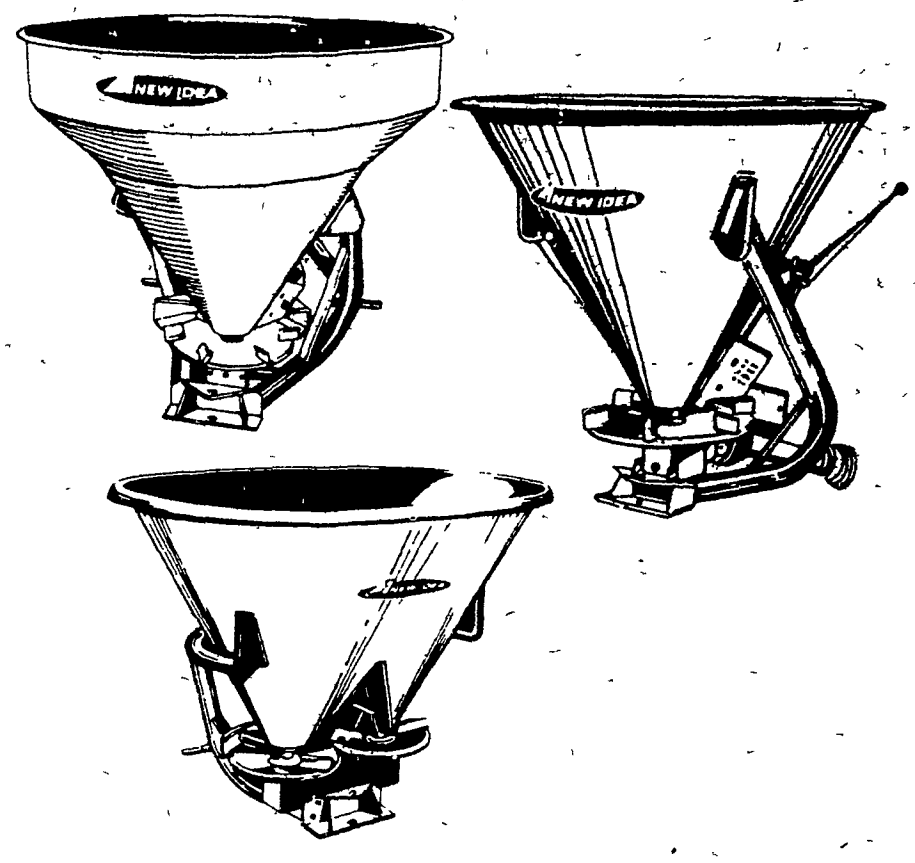
THE LOW COST - VERSATILE SPREADERS

CHOOSE FROM THREE NEW IDEA SPINNER SPREADERS

This is the way to fertilize or seed at low cost. Choose any one of three versatile spinners that spread fast, uniformly and accurately. 8.5, 11.3 and 17 bu. sizes . . . 3-point hitch . . one-man hookup . . . low maintenance. It's your answer to low-cost broadcasting.



THE BIG ONES ARE HERE to help you spread it faster, with fewer trips to the field, and with more convenience, quality and reliability.

There are two new BIG ONES, Model 244 and Model 245. With both you get quality construction, rugged durability and big capacity. The Model 244 is 325 bushels big. The 10-Ton Model 245 has a whopping 375 bushel capacity. Now that's really BIG. See THE BIG ONES today at your local Avco New Idea Dealer.

Meet the Lancaster County Apple Queen

BY SHEILA MILLER

ELIZABETHTOWN — With the first flights of geese winging their way over the North Atlantic flyway, most people in Lancaster County begin to think Spring.

One person in particular who is anxiously awaiting the sound of robins chirping and the tiny crocuses turning their heads toward the warming sun is this year's Lancaster County Apple Queen, Sandra Gooding.

Sandra, who says she prefers to be called Sandy, was selected as the representative of Lancaster County Apple Growers for 1980.

Sandy's reign began last September when she was chosen through a mail contest conducted by Diane Hale, of the State Horticultural Association.

The Lancaster County queen's interest and knowledge about apples and marketing has been fostered over the years by her childhood experiences.

Being raised by a family that made a living on an orchard in Michigan gave Sandy the practical experience involved in the day-to-day demands of raising fruit. And, having a father who's a horticulturalist provided Sandy with a private tutor in the why's and wherefore's of pruning, picking, and polishing the apples.

Sandy and her family have been in Pennsylvania for two years, with a short stop-over in Maryland after they departed their Michigan homestead. Because her father is employed by the Masonic Farm, in Elizabethtown, the Goodings have their residence on the farm, near the orchards.

Sandy says she works for the farm during her summer vacations, where her jobs include grading and picking fruit. But, she added with a smile, she prefers being the fruit storage clerk.

The senior at Elizabethtown High School also works part-time for a local feed store as a bookkeeper, practical experience for a young woman whose future plans include studying accounting or agribusiness.

In school, Sandy lends her talents to chorus and drama. She plays the piano and has a perfectly pitched voice. Her extra-curricular activities also include being the captain of the bandfront rifle team.

The list of honors achieved by Sandy in her two years in Pennsylvania is a long one. She was voted the Business and Professional Women's Girl of the Month last November, and was the December Business Student of the Month.

She has received an outstanding bookkeeping award and was elected into the National Honor Society.

The 5'6" blonde, who quickly pointed out she has green eyes and not blue, is the daughter of Robert and Marge Gooding. Her family also includes two older sisters, and a younger brother.

When she is not busy in school or giving concerts in church, Sandy enjoys needlepoint during the cold winter months. She also likes to ice skate, swim, roller skate, play tennis, and disco dance.

She added that she usually isn't home—she's either out working, practicing for school, or sometimes dating.

But, she quickly added she is anxious to get started with the activities that are part of being the county's apple queen. She is looking forward to the festivities coming up at apple blossom time.

According to Sandy, Pennsylvania apples have a better flavor than the apples of Washington state or Michigan, which she attributes to the richer soil.

Her favorite snack-type apple is the Red Delicious, which she points out is the most popular apple. For baking, Sandy likes the Stayman which is more on the tart side.

Here are some of Sandy's favorite apple recipes:

Apple Cake

2 cups flour
2 teaspoons baking powder
½ teaspoon salt
½ cup sugar
½ cup lard
Dash nutmeg, mace, cinnamon
2 eggs

Beat eggs in dish alone. Add a little milk, about ¼ cup to all the above. Mix by hand. Spread into a cookie sheet. Slice tart apples on top by laying apples in a straight row across dough. Cover dough with apple slices.

Top Mixture

2 teaspoons butter
½ cup sugar, more if apples are very tart
1/8 teaspoon allspice
1/8 teaspoon nutmeg
1/8 teaspoon mace
1 teaspoon cinnamon

Sprinkle on top of apples and dough. Dot with butter and red food coloring. Bake at 350 degrees Farenheit for one hour or until apples are done.

Sandra Gooding, the Lancaster County Apple Queen, recently competed in the Pennsylvania Apple Queen contest held in Hershey.

Mulled Cider

2 quarts cider or apple juice
½ cup brown sugar, firmly packed
2 inch piece of cinnamon
1 teaspoon whole cloves
1 teaspoon allspice

Mix cider and sugar in large saucepan and add spices. Heat mixture slowly to simmering. Cover pan. Simmer 20 minutes. Strain. Serve hot in warmed mugs, garnished with cinnamon stick or an orange wedge stuck with a whole clove, if desired. Makes about 2 quarts.

(Turn to Page C4)

Homestead Notes

In her spare time, Sandy enjoys doing crafts, like her favorite Charlie Brown needlepoint and a hooked pillow of a sail boat.

Sandy lives with her family at the Masonic Farm in Elizabethtown, where the apple queen gets first hand experience at "selling" her favorite product.

Apple Queen

(Continued from Page C2)

Surprise Apple Cake

2 tablespoons melted butter
½ teaspoon cinnamon
2 cups graham cracker crumbs
3 eggs, separated
1⅓ cup sweetened condensed milk, one can
2 tablespoons lemon juice
Grated rind of one lemon
2 cups canned apple sauce

Add butter and cinnamon to graham cracker crumbs. Spread thick layer of crumbs on the bottom of buttered spring mold or deep ten-inch layer cake pan. Beat egg yolks well, add milk, lemon juice, rind and applesauce. Fold in stiffly beaten egg whites. Pour in mold, over with remaining cracker crumbs. Bake in oven at 350 degrees Farenheit for about 50 minutes. Serve hot or cold.

Apple Krunch

3-4 medium apples, peeled and sliced, put in a baking dish
½ cup quick oats
½ cup butter
½ cup sugar
¼ cup flour

Mix oats, butter, flour and sugar. Cut the above through the apples and cover over the top with some of the sugar mixture. Bake forty minutes at 350 degrees Farenheit.

Cumberland Co. Society 10 will meet at the home of Jane Keefer. Colonial medicine will be the program.

Virginville Grange holds March meeting

VIRGINVILLE — A report on Pomona activities, and an update on coming local events highlighted the meting of the Virginville Grange last Thursday.

Richard Kieffer told members that several resolutions were adopted at the Pomona Grange meeting including one calling for the return of prayer to public schools.

Also approved at the meeting were resolutions dealing with trapping and a measure favoring the preservation of farm land

A legislative banquet is slated for the Bernville Grange on April 9. Grange youth will be serving the meal.

Joyce Miller was honored by Grange members for having served the Virginville group for 16 years as secretary.

Members presented her with a monetary gift to show their appreciation.

Virginville Master Ernest Miller welcomed several new members to the grange. Included were Brenda and William Kurtz; Denise Wagner; and Terry, Sharon, and Susan Snyder.

The sewing contest will be judged at the Virginville Grange on April 26 Pomona grange judging will be held April 28.

Needlework and sewing contest rules are available from the Grange committee

In addition, a new contest for machine craft and home decorating will be held July 1.

The next meeting of the Virginville Grange will be on lawn and garden care.

The open house and 60th anniversary meeting will be held April 2.

The Junior grangers reported they are selling Arby tickets as a "dogs for the deaf" program.

They also have bought a brick for the State Grange and donated $10 to CARE.

Juniors say they plan to enter the talent contest which will be held in May.

Sifting Stitchers 4-H makes notes

FLEMINGTON, N.J. - The February meeting of the Sifting Stitchers 4-H Club was held at the Sergeantsville Methodist Church.

The Bake-Off Contest, Window Display and a Roller Skating Party were some of the subjects overed at this meeting.

A demonstration on Making Figures on Stationery Paper was given by Margie VanDuyne, Stockton.

Ornamental plant pruning

SCHUYLKILL HAVEN — An Ornamental Plants Pruning Demonstration will be held March 18, 1980 from 2:00 - 4:00 p.m. at the Schuylkill Memorial Park, south of Schuylkill Haven on Route 61

Robert Nuss, Extension Horticulturist, will demonstrate how to prune ornamental trees and shrubs. Here's your chance to learn how to prune your trees and shrubs!

Groundkeepers, homeowners and landscapers are welcome to attend this free demonstration sponsored by the Schuylkill County Extension Service. If you'd like more information contact Dale D. Moyer, County Agent, at the Scuylkill County Extension Service - (717) 385-3431.

Recipe Swap

St. Patrick's Day is on the way and whether you're Irish or not, you'll enjoy the easy St. Patrick's Day Pie. Why not treat your family to this luscious dessert Monday or any day when your schedule is tight and you need an impressive dessert.

We've also received a cottage cheese recipe in response to a reader request Why not give it a try if you've never attempted cheese before?

ST. PATRICK'S DAY PIE

1 cup heavy whipping cream
1 3 ounce package lime gelatin
1 graham cracker pie crust

Prepare lime gelatin according to speed set directions on the package. When the mixture starts to set, remove any leftover ice cubes.

Whip the cream. Reserve a few spoonfuls for trimming the top of the pie, and fold the remainder into the gelatin.

Pour the mixture into the pie shell. Pour any remaining mixture into parfait glasses for family snacks.

Chill several hours until set. Top with the remaining whipped cream and garnish with candy kisses or chocolate curls.

COTTAGE CHEESE

In a 2 quart stainless steel saucepan, beat 1 quart whole milk until tiny bubbles form around the edge.

Add ¼ cup lemon juice and simmer 2 minutes. Do not stir Remove from heat and let stand in pan at least 45 minutes.

Line colander or bowl with cheese cloth. Pour cooled milk mixture into the cloth. Hang cloth and let whey drop for 1 hour.

Remove cottage cheese from cloth, into a bowl and stir in 1/8 teaspoon salt and ¼ cup milk. Cover and refrigerate until chilled.

Janet Erb, Manheim

QUESTION: I would like a recipe for making soap.
Mrs. Rollo Davis, Bridgeton, N.J.

Tree and shrub clinic to be held

SCHUYLKILL HAVEN — Everyone is welcome to attend a Selecting Trees and Shrubs Clinic to be held Tuesday, March 18, 1980 from 7:00 - 9:00 p.m. in Building C - Room 119 at the Schuylkill Campus, Schuylkill Haven.

Robert Nuss, Extension Horticulturist, will discuss the selection and care of ground covers, trees and shrubs for the home grounds.

This clinic, sponsored by the Schuylkill County Extension Service, will help you decide what and where to plant ornamentals around your home. Literature will be available. It's all free.

For further information, contact Dale D. Moyer, County Agent, at the Extension Office - (717) 385-3431.

Build a "souperb" meal around hearty soups

No dieters allowed. The soups we feature today are hearty soups.

These are soups for the whole family Many could be a complete meal in themselves. But with the addition of a green salad and some bread sticks or cheese and crackers, even the "soup again?" members of your family will sit up and take notice.

Soup is the perfect answer for a family that eats in shifts. As the Spring sports season arrives and days get longer, family members seem to eat and run more often Soup solves two problems for the concerned cook then. It assures her that she has provided a nutritious meal for her family, one they have time to eat. And it frees her from the hassle of keeping a dinner hot for the late diner.

And the farm wife is particularly grateful for soup, since she can prepare it ahead of time, complete her share of the barn chores, and have a warm meal waiting.

When problems arise at the barn and the rest of the family is late, a pot of soup is a cook's best friend.

A pot of soup means many things to many people. To some, it is the carefully measured result of their time spent in the kitchen.

To others, it is a regular on the Thursday evening menu. And it's the result of a weekly refrigerator inventory, a potpourri of dibs and dobs.

In either case, soup is a very personal entree. The good cook puts a little of herself in the pot along with the more common ingredients. The way she chops the vegetables or meats, the length of time the pot stews, the amount of seasoning she uses, all say alot about her and the family she tries to please.

CREAM OF BROCCOLI SOUP

1½ pounds broccoli
5 cups chicken stock
¼ cup butter or margarine
2 tablespoons chopped onions
½ cup minced celery
¼ cup flour
2 cups cream, scalded
¼ teaspoon nutmeg
salt and paprika to taste
grated Parmesan cheese

Wash the broccoli and cut off the florets. Set the florets aside. Peel the stems and chop coarsely. In large saucepan, place the stems and cover with chicken stock. Bring to boil and simmer for ½ hour. Drain and reserve stock Put the broccoli stems thru the blender with 1 cup of the stock. Set the puree aside.

Put the broccoli florets in the chicken stock and bring to a boil; simmer for 5 to 7 minutes. Melt butter in saucepan and saute onion and celery for 5 minutes. Stir in flour and cook for 3 to 4 minutes. Slowly stir in stock with the florets and bring to boiling point. Add the broccoli puree and the scalded cream or half and half. Bring to boil, add nutmeg, salt and paprika to taste. Remove from heat. Serve with dusting of cheese. Serves 8 to 10 people.

Carol Williams, Lake Ariel

A savory Potato Cheese Soup can make a hearty addition to your family's menu.

POTATO CHEESE SOUP

⅓ cup chopped celery
⅓ cup chopped onion
2 tablespoons butter or margarine
4 cups peeled and diced potatoes
3 cups chicken broth
2 cups milk
1-½ teaspoon salt
¼ teaspoon pepper
Dash paprika
2 cups shredded sharp Cheddar cheese
French fried onion rings or croutons, for garnish

In large saucepan, saute celery and onion in butter or margarine until tender Add potatoes and broth. Simmer until potatoes are tender. Puree in blender until smooth. Return to saucepan. Stir in milk and seasonings; heat through. Add cheese, stirring until melted. Garnish servings with French-fried onion rings or croutons Makes about 7-½ cups.

CREAMED CHICKEN CORN SOUP

1 whole chicken (3 or 4 pounds)
3 quarts of water
1½ cups of onion
2 cups of celery
3 cups of whole corn
½ cup butter or margarine
12 tablespoons of flour
1 quart of whole milk
2 eggs
1 tablespoon salt
pepper to taste

Cook chicken slowly, approximately 45 minutes, in water Cook until tender

Remove chicken from water and cut into pieces

Add corn, celery, and onion to broth with chicken pieces

Cook slowly for approximately 20 minutes

In a separate pan, melt butter and add flour slowly, stirring with a fork Beat eggs into the milk and add mixture to the flour and butter

Cook the mixture until it thickens Add the mixture to the chicken broth. Cook 10 minutes

Chet Schuman, Turbotville

EGG SOUP

1 cup boiling water
1 bouillon cube (chicken or beef)
1 egg

Dissolve bouillon cube in boiling water While bouillon is at boiling temperature, slowly pour in the beaten egg as you stir Remove quickly from heat and stir another 30 seconds Serve with saltines Serves one

Mrs. Calvin Bream, Gettysburg

CHICKEN CORN SOUP

1 stewing chicken, cooked and chopped up
broth
3 pieces celery
1 medium onion
parsley, a big pinch
½ bag egg alphabets
2 quarts diced potatoes
3 pints frozen or fresh corn
6 boiled eggs, chopped
4 bouillon cubes
salt and pepper to taste

Strain broth through a colander Add celery, onion (chopped fine) and parsley Simmer 15 to 20 minutes

Add alphabets, potatoes, and corn. Bring to a boil, then simmer for 15 minutes

Add eggs, chicken and bouillon cubes Season to taste. Simmer all about 15 minutes Serve immediately, or freeze after soup cools

Mrs. Ralph Waldo Emerson, III

CREAM OF SPINACH SOUP

2 cups spinach pulp
1 quart soup stock, or 1 quart milk
1 tablespoon butter
2 tablespoons flour
½-1 cup of cream
salt and pepper to taste

Wash the spinach thoroughly and boil until tender. Chop and rub through a sieve To the pulp, add stock or milk or ½ of both Rub flour and butter together. Put this in soup over heat Stir together until it thickens a little Season with salt and pepper Add cream and beat well with an egg beater Serve hot

Mrs. B. Russell, Pine Bush, N.Y.

ESPANOLA VALLEY SOUP

3 pounds fresh pork hocks
3 quarts water
1 pound can tomatoes, cut up
2 cups chopped onion
1 garlic clove, minced
5 teaspoons salt
1 tablespoon chili powder
2 1 pound cans whole kernel corn or hominy
1 10 ounce package frozen lima beans

Cook hocks, remove meat from bones Cool and remove fat Combine ingredients, bring to a boil and simmer till tender Garnish with parsley

Anna Stoltzfus, Harrington, De.

CREAMY OLD-FASHIONED PEA SOUP

1 pound split peas
6 cups water
2 pounds ham shank with meat
¼ teaspoon pepper
3 tablespoons butter
¾ cup finely chopped onion
3 cups milk

Wash peas and drain. Place in large covered saucepot with water, ham shank and pepper. Heat to boiling, cover and reduce heat. Simmer 2-2½ hours or until peas are tender and meat falls off bone

Meanwhile, in a small saucepan, melt butter, saute onion until tender. Remove bone from broth, cut meat from bone. Return meat to broth along with onion. Gradually stir in milk. Heat to serving temperature

Esther Burkholder, Kutztown

DOGGY STEW

4 large potatoes
6 hot dogs
1 small onion
½ quart tomato juice

Wash and peel potatoes. Chop up potatoes and onion. Slice hot dogs. Cook potatoes, onion and hot dogs until soft. Add tomato juice and season to taste. Parsley flakes and a little sugar can be added if desired. Serves 4.

Mrs. Charles Rosenberry, Chambersburg

CHICKEN OR TURKEY STEW

4 pounds chicken or turkey drumsticks
salt
1 1 pound can whole tomatoes
1 large onion, thinly sliced
4 cups potatoes, peeled and sliced
1 10 ounce package frozen lima beans
pepper
1 8½ ounce can cut okra (drained)
1 17 ounce can whole kernel corn
1 small red pepper (chopped)

Simmer turkey or chicken in water to cover until meat is tender Remove meat from broth. Measure the broth and add water to make 7 cups. Combine broth and other ingredients except meat. Cook until vegetables are soft. Add meat, cook about 5 minutes.

Anna Stoltzfus, Harrington, De.

GOOD AND EASY BEAN SOUP

3 pounds ham with bone
broth
1 pound pea beans
2 carrots, thinly sliced
¼ green pepper, diced
3 pieces celery
1 onion
1 quart red tomatoes

Soak dried pea beans 2 hours then drain. Cook ham until tender in 6 quart stock pot. Take out meat and cool. Strain broth through a colander.

Place chopped ham, broth and pea beans in pot over heat and boil. Add carrots, pepper, celery, onion and tomatoes. Salt and pepper to taste. Cook on medium heat about 3 hours.

Mrs. Ralph Waldo Emerson III

VEGETABLE SOUP

2 quarts of peas
1 quart of corn
2 quarts of carrots
1 quart of lima beans
1 quart of string beans
2 quarts of celery
4 quarts of tomato juice
sugar and salt to taste
7 onions, finely cut

Cook all together. If desired, vary by adding several cans pork and beans or soybeans to the pot. Cook 1 hour. Cool, mix, and put into freezer containers.

Martha Smucker, Lancaster

VIRGINIA STEW

2 smoked ham hocks
2 cups dry navy or lima beans (soaked overnight)
1 quart diced potatoes
2 cups tomatoes
2 onions, chopped

Boil in 3 quarts of water for 1 hour. Add:

2 cups corn
2 tablespoons sugar
2 tablespoons butter
salt and pepper to taste

Boil 20 minutes and then add 1 cup milk before serving.

Mrs. Moses M. Beiler

Junior Cooking Edition

From a delicious salmon spread to play dough, we have an interesting assortment of recipes to offer.

A variation of a familiar favorite, cornbread, is included. This variation features corn kernels in the mix.

For those juniors who are proficient in the kitchen, why not try a whole meal made with recipes featured today. Start with Pioneer Stew served with Corn Kernel Cornbread. Add lots of butter, a lettuce leaf salad, and top it all off with your choice of the desserts offered today

CARAMELS

1 cup light brown sugar
1 cup granulated sugar
1 cup light corn syrup
⅔ cup thin cream
1 can condensed milk
2 teaspoon vanilla
pinch of salt

Put all ingredients in pan. Cool until it forms a soft ball when a little is dropped in cold water Pour into greased pan. When cool, cut into squares.

Noah S. Martin, Age 5, New Holland

HAM POTATO AND CHEESE CASSEROLE

3 cups cooked, cubed ham
3 cups cooked, cubed potatoes
1 medium onion, diced
3 tablespoons green peppers, diced
1/8 stick butter
2½ tablespoons flour
2 cups milk
¾ cups shredded cheese
salt and pepper to taste

Cook onion and pepper in butter for 5 minutes. Add flour and stir. Add milk and cook until thick Add ham, potatoes, salt and pepper. Mix

Put in a 2 quart casserole and top with shredded cheese. Bake 30 minutes at 350° F Serves 6. Note chicken or turkey can be substituted

Marian Martin, Age 9, Mifflinburg

SALMON SPREAD

½ cup chopped pecan nuts
1 can salmon
1 8 ounce package cream cheese
1 tablespoon lemon juice
2 teaspoons grated onion
¼ teaspoon salt

Drain salmon, combine all ingredients except nuts Chill several hours. Roll into log shape and roll in nut mixture. Spread on crackers

HAM AND BEAN SOUP

1 stalk celery, diced
12 hard cooked eggs, chopped
1 gallon Great Northern beans
2 large cans tomato soup
1 ham end
1 gallon broth

Place cooked, cut up ham in large kettle. Add the broth and remaining ingredients and cook together at least 1 hour This makes a large quantity of soup

Pauline Hurst, Newville

HEARTY HAM'N CORN FRITTERS

1 cup flour
1 tablespoon sugar
1 tablespoon baking powder
¾ teaspoon salt
¼ cup milk
2 egg yolks
2 tablespoons cooking oil
1 cup diced ham
2 egg yolks
2 tablespoons cooking oil
1 cup diced ham
¾ cup whole kernel corn, drained
2 egg whites beaten stiff

Combine all and drop batter by heaping tablespoons into hot fat in a skillet or into a deep fat fryer preheated to 375° F until golden brown.

Dorothy Martin, Age 17, Mifflinburg

PIONEER STEW

1 pound ground beef
½ cup chopped onion
½ cup green pepper
2 cups whole kernel corn
2 cups kidney beans
2 cups canned tomatoes
1 teaspoon chili powder
1 teaspoon salt
1 cup shredded cheese

Fry beef, onion and pepper until meat is browned. Add rest of the vegetables with juice. Stir in cheese just before serving. Can be made in kettle on stove or crockpot.

Kathleen Martin, Age 18, Mifflinburg

YUMMY CHOCOLATE SQUARES

1 pound marshmallows
1 teaspoon vanilla
1 package semi-sweet chocolate bits
1 cup broken walnut meats
3 tablespoon butter
½ teaspoon salt
1 cup Rice Krispies

Melt marshmallows, chocolate, and butter over low heat, stirring constantly Mix and spread in a well-buttered 8 inch pan Cut into squares after mixture sets.

Penn State lists top red clovers

UNIVERSITY PARK — Six new varieties of red clover, with improved yields and better disease resistance than older strains, are recommended for Pennsylvania hay crops, according to plant breeders at Penn State.

In a single harvest year, growers can realize an increased cash value of $65 per acre with most of the improved red clover varieties, stated Richard W. Cleveland

The best new varieties produce nearly one ton more hay per acre, on the average, than Pennscott red clover–the old standard variety still grown widely by farmers

Cleveland and Marvin L Risius, plant breeders in agronomy at Penn State, compared red clover varieties for eight years at locations in Centre and Lancaster counties

Listed alphabetically, the best new varieties for Pennsylvania are Arlington, Florex, Florie, Kenstar, Redland, and Redmor These varieties are included in the Agronomy Guide, published by the extension service at Penn State. There were no significant differences in yield among the six superior varieties.

The average hay yield of these varieties was 3.3 tons per acre.

Improved yields in the new varieties are probably due to better disease resistance than Pennscott, Cleveland observed. The variety Arlington, in particular, appeared to be very resistant to northern anthracnose that sometimes was severe in the Centre County trials

The highest yields in the red clover experiments compared favorably with yields of alfalfa grown at the same locations. Although shorter lived than alfalfa, red clover is easier to manage and tolerates higher soil acidity than alfalfa, it was pointed out

The Penn Staters found that Arlington, Florex, and Redman has slightly better yields than Kenstar in Centre County. In Lancaster County, on the other hand, Kenstar produced the superior yields. Insects and diseases were considered responsible for the differences by location.

Occasional severe infestations of northern anthracnose were noted in the Centre County plots. Arlington, as mentioned earlier, was highly resistant to the disease while Pennscott was very susceptible. Anthracnose causes injury to the stems and leaves – often entering the crown and killing plants.

"Despite claims otherwise, we found that red clover varieties seldom live beyond two productive years," Cleveland stated. "We tested some varieties repeatedly and found persistence to be highly variable–if it exists at all."

PLAY DOUGH

2 cups flour
½ tablespoon powdered alum
2 cups water
1 cup salt
1 tablespoon salad oil
few drops food color

Mix together and stir over low heat until dough-like. Remove from heat, knead until smooth, store in air-tight container, keeps for months.

Ada Mae Burkholder, Age 15, Kutztown

LAZY WOMAN CAKE

Sift together in greased 13½x9½ pan:
3 cups flour
2 cups sugar
5 tablespoons cocoa
2 teaspoons soda
1 teaspoon salt

Make 3 holes in the mixture. Put 7/8 cup cooking oil in hole number 1. Put 2 tablespoons vinegar in hole 2. Put 1 teaspoon vanilla in hole 3. Pour two cups water over this mess and stir with a fork until well blended. Bake at 350° F.

Rachael King, Age 9, Paradise

CORN KERNEL CORNBREAD

2 cups flour
2 cups cornmeal
8 teaspoons baking powder
2 teaspoons salt
½ cup sugar
4 eggs
2 cups milk
6 tablespoons melted margarine
2 cups cooked or canned yellow style corn

Combine flour, cornmeal, baking powder, salt and sugar. Combine eggs, milk, margarine and corn. Add to the flour mixture and stir until well blended. Pour into a well greased 9 x 13 inch pan. Bake at 375° F. for 35 minutes or until tester comes out clean.

Daphne Ogletree, Age 14, Taneytown, Md.

REWARDING TREAT

1½ cups granola cereal
1 cup crushed pretzels
½ cup light corn syrup
½ cup sugar
½ cup peanut butter

Combine cereal and pretzels in a bowl. Mix corn syrup and sugar in a saucepan and bring to a boil. Add peanut butter, stirring until melted. Pour over cereal. Stir to coat well, press quickly into a greased 8 inch pan. Cut into bars.

York Farm Women hold golden anniversary

BY JOYCE BUPP
Staff Correspondent

YORK — Last Saturday was a day for remembering and warm sentiments as some 200 members of the York County Society of Farm Women gathered at York College to celebrate their 50th anniversary and pay homage to their beloved founder, Mabel Rishel.

For her foresight and efforts in organizing the county's branch of the statewide group, she was introduced as the "mother" of the York Farm Women and saluted with a standing ovation and resounding applause during the luncheon program at the college's spacious dining room. Although officially a golden anniverary event, it was Mabel Rishel's day and included a surprise "This is your life" look at her background.

Ever ready with an inspiring word, timely bit of poetry or her practiced wit, Mabel opened her scheduled presentation on the program with a smile and scolding that "everybody knows all my secrets now."

Born in 1891 in Emigsville, just north of York, Mable Laura was the daughter of Alice and Henry Zumbrum. On May 20, 1915, she married Norman Rishel in a service scheduled at 8:00 a.m., but beginning a few hours and five preachers later, due to a ministerial time-schedule mixup.

Six years later, Norman, Mabel and their three youngsters purchased a 98-acre farm adjoining the Isaac Rishel homestead and began milking a herd of two dozen registered Holsteins. Successful in the farming business, the Rishels won the prestigious Master Farmer award in 1927 and received numerous honors for their purebred cattle from the Holstein-Friesian Association. Two more children had been added to the family and the days were filled with barn work, field chores, gardening, household duties and child-raising.

"We worked an eight-hour day on the farm - 8:00 a.m. to 8:00 p.m, "quipped Mabel in her golden anniversary remembrances. "We milked cows in the hot weather, before there were pesticides and there were times when we were black with flies and covered with perspiration. Only we called it sweat. I felt I needed something to do besides work."

In January of 1930, Mabel and her friend Mary Myers had a bit of time on their hands while waiting in Harrisburg for their husbands who were attending events at the Farm Show. Unexpectedly, they wound up in the Senate caucus room at the Capitol, where the Pennsylvania Society of Farm Women was meeting. Their "good deeds and composure" greatly impressed the York farm wife

Mabel Rishel had found the something she needed to broaden her farm life.

Mabel Rishel, "mother" of the York County Society of Farm Women.

Several weeks later, in March 1930, neighborhood women gathered in the Rishel home to charter what would be Group #1 of the York County Society of Farm Women. Before the charter membership list closed, there were 27 names on it, and Mabel had been elected their president.

Looking back, she noted that the York women were indebted to Lancaster's organization for their assistance in forming the initial group. Programs for the monthly meetings were quite similar to those being held 50 years later. There were quilting parties, sauerkraut dinners, bus trips and special activities like Farm-City or Colonial days. Frequently there were speakers, and a special one might have gone home with a market basket filled to the brim with farm-fresh garden vegetables and a dressed chicken.

After ten years, over 70 women had embraced the Farm Women ideals and membership and most farm parlors were hard-pressed to hold the attendance at a monthly meeting. Plans were made to form Group 2 at Jacobus. The stone dropped in the pond of interested rural women had begun a spreading ripple that continues today.

"One of the groups came to my house to organize, riding in a pickup truck," she remembered with a chuckle. "We had togetherness even then."

Mabel had served as the state president from 1932 to 1937; and when size demanded the forming of a county organization to consolidate the activities of the growing number of York groups, she was chosen its first officer

Today, York County has a combined membership of 655, in 37 individual groups, the largest number of groups in any county in the state. Their support goes to a great variety of charitable institutions, including community events like the highly successful York Hospital Fete, and they've donated thousands of dollars to the county's 4-H Center.

Although the jobs of Farm Women members have changed over the years, and their membership is no longer strictly limited to only women whose families derive their livelihood from the soil, their founder still likens them to the flower long ago chosen as the group's symbol.

"Farm Women are like the hollyhock. They stand tall in the sunlight while maintaining an air of humility," she reminded a beaming audience.

Special guests at the golden anniversary program included the five Rishel children, Edward, Ruth, Maurice, Charlotte and Marian, as well as some grandchildren. Granddaughter Dianne Bowders was featured during the program, with two solos on the grand piano. County president Marie Smyser presided over the luncheon, decorated in candlight and table centerpieces of golden anniversary cakes.

A special guest speaker was state Farm Women president Helen Hess of Lancaster. Numerous past York County presidents also reminisced on how Mabel Rishel touched their lives, and several congratulatory notes were shared from past presidents unable to attend.

Farm Women Societies

Berks Co. Society 3

The meeting of Berks Society 3 was held at the home of Mary Bartholomew, Boyertown.

Rose German, Boyertown, showed the members thimbles from around the world.

Members answered roll call with their favorite red desserts.

An invitation was received from Group 1 for their 40th anniversary.

Donations were given to the Heart Fund and to the March of Dimes.

The next meeting will be held March 25, at the home of Grace Richard, R3, Boyertown, 12:30 p.m. The program will be on crafts.

Lancaster Co. Society 7

Lancaster Co. Society 7 entertained Society 29 at the Leacock Presbyterian Church, Paradise.

Members responded to roll call by relating a childhood memory of Easter morning.

Elsie Cowan gave a program on Easter egg decorating.

The group will be traveling to the Evans Candy Factory on Eshelman Mill Road, March 18 to see an Easter candy display.

The next meeting will be held at the home of Esther Hoffer, 2444 Ellendale Drive, Lancaster.

Lancaster Co. Society 10

Members of Lancaster Co. Society 10 met at the Neffsville Fire Hall for their March meeting.

A report was given by Ida Kunkle on the new Lancaster County Bookmobile. A check from Lancaster County Farm Women as a gift toward the cost of the bookmobile was presented.

Entertainment was furnished by Scott Riedle who performed a well-received magic act.

Society 19 will entertain Society 10 at the Curch of the Brethern, East Petersburg, on Saturday, April 12 at 12:00 p.m.

Lancaster Co. Society 11

Lancaster Society 11 held its monthly meeting at the home of Grace Chase, Quarryville.

A donation was made to the Porkettes.

Robert Shenk of Spring Valley Landscaping gave a talk and slide show.

The March meeting will be held at the home of Mrs. Norman Wood

Lancaster Co. Society 13

Lancaster Society 13 entertained Society 4 at a luncheon held at the Farm and Home Center.

Members chose Hospice as the county project.

Tellie and Missy Snader entertained with piano duets, and Kenn and Ginny Chambers gave a skit.

The next meeting will be held April 11 at the Tourist Information Center.

Lancaster Co. Society 17

Lancaster Co. Society 17 met at the home of Mrs. Richard Lefever.

Roll call was answered by giving a safety tip.

Mrs. Kenneth Aston presented a safety talk.

Robert Shenk showed slides of Spring Valley Landscaping.

Next meeting will be a covered dish luncheon at the home of Mrs. Kenneth Aston.

Lancaster Co. Society 19

Lancaster Society 19 met at the home of Mrs. Lloyd Hollinger, East Petersburg.

Ruth Hepler who is in charge of the emergency medical department at St. Joseph's Hospital, Lancaster, presented a safety program.

Ruth stressed the threat of heart disease and indicated that Lancaster County has the largest number of heart disease victims of any county in the state.

She also strongly recommended CPR training for all the members present.

Roll call was answered by giving a home remedy each member liked to use.

The group will sew at the Lancaster General Hospital on March 13 from 9:00 a.m. to 2:00 p.m.

A bus trip is planned for the "Three Little Bakers" dinner theater, April 25. All seats are filled.

Society 19 will entertain Society 10 and the county officers at the Hempfield Church of the Brethern, April 12, 12:00 p.m.

Clifford Huffman will entertain with a musical program using bells.

The group has sent a year's subscription to People magazine to the Harrisburg State Hospital for use by the residents. Also, the county Hospice program was chosen as the project the group will sponsor this year.

York Co. Society 1

York Society 1 met recently at the home of Mabel Rishel.

Since the group is still celebrating it's 50th anniversary, the program was a review of the most historical and the funniest things that happened in the past 50 years.

Mabel Rishel presented each member and guest a violet plant.

The next meeting will be held at the home of Mary Decker, April 2 at 1:00 p.m.

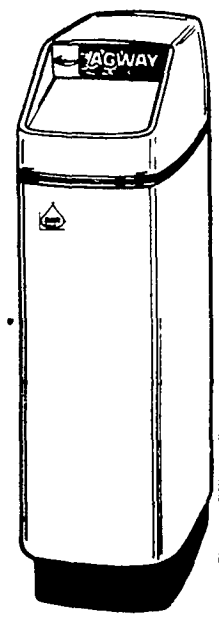
ANNOUNCING THE SOFT-WATER OFFER THAT'S HARD TO REFUSE!



- FREE WATER TEST. . .
- FREE INSTALLATION. . .
- 2 MONTHS' FREE RENTAL

Offer good only while our current stock of conditioners lasts.

Put your hard water to the test A free water test from Agway Petroleum. And get two months' free rental on any Agway water conditioner, too

Renting a water conditioner saves you money on maintenance And it lets you avoid spending a large sum on the unit itself.

An Agway water-conditioning system:

- Saves energy
- Prevents energy-robbing buildup of mineral deposits
- Helps detergents work harder
- Makes food taste better

$13 a month is all it costs. And during this special offer, you'll save $26 right from the start with an Agway-installed and -maintained water conditioner that's just right for your needs

The days of buying a water conditioner can be over. Contact your nearby Agway Petroleum Plant today and ask about the water-conditioner offer. With a free water test, free installation, and two months' free rental, it's a hard offer to beat

Farm Women Societies

(Continued from Page C11)

York Co. Society 12

York Society 12 met recently at the home of Mrs. John Massa.

Vials of Life were distributed. The York Hospital Auxiliary is sponsoring the program which was explained by Elizabeth Rost, Red Lion.

The vial contains information which may be needed in the event of a medical emergency.

The vial is placed on the under side of the upper right shelf of the refrigerator where it can be found by emergency health care personnel.

An emblem on the upper right corner of the refrigerator and a similar one on the window alerts emergency personnel.

Mrs. Carl S. Bacon gave a talk on the "Pleasant Acres Story."

The State Spring Rally will be held at the York Fairgrounds, May 1.

The next meeting will be hosted by Mrs. Charles Gable.

York Co. Society 31

York Society 31 was hosted by Evelyn Burrell.

A mystery dinner and silent auction were held.

The next meeting will be held March 17, 7:30 p.m at the home of Virginia Stiffler Barbara Stimp will demonstrate cake decorating.

On being a farm wife - And other hazards

Joyce Bupp

"Well, if you're going to marry a farmer," my mother once confided to me, "At least I know you'll always have meat on the table."

She was right. But thank goodness I don't have to help butcher it.

Butchering it still a major Winter job tackled on many farms. It's a chore I was introduced to years ago as a young bride, having never wrapped a piece of meat home-butchered for the freezer in my life.

My farmer, though, toddled to the butcher house at a very early age, and from those frequent family gatherings simply grew up knowing the finer points of grinding sausage, seasoning home-made bologna and sugar-curing hams.

Before long, I'd been inducted into a world of knowledge that included how to scrape casings (hog intestines soaked, and resoaked, and cleaned for stuffing with sausage), cutting pork fat into chunks for rendering down into lard, and the assembly-line techniques for forming, smashing and stacking hamburgers.

Butchering was quickly put into the same category of jobs saved for washing windows - a delight to behold when finished, but a pain to be in the middle of doing.

Within a few years, it became apparent that not one week in the Winter ever suited our schedule to butcher, with cows and calves always needing every minute. One day the farmer announced that the job would be turned over to a custom butchering establishment, with meat to be cut, wrapped and frozen and returned to our freezer.

Farm decisions evoke a variety of emotions when they are announced in farm kitchens. Some stir up concern, some are met with ready agreement, occasionally one may even be received with laughter

But the custom butchering decision was given a standing ovation and open arm salute. Grandma, I'm sure you'd understand.

Lucky 4-H Club

FLEMINGTON, N.J. — The main topic for discussion at the February business meeting of the Lucky 4-H Club was the Window Display.

The meeting was held at the home of their leaders Maureen Pruchnicki, Flemington. A demonstration on Lace-Trimmed Heart Sachets was given by Lynne Ashmen, Flemington

Fulton Grangers hear insurance tips

OAKRYN — Fulton Grange No. 66 held their semi-monthly meeting Monday, 8 p.m. at the Grange Hall, Oakryn.

Thomas G. Galbreath, Master, presided at the business session and announced there would be a game night Friday, March 21, 7:30 p.m. at the home of Mr. and Mrs. Clifford Holloway III. It was also announcd that the Oakryn Senior Citizens will hold a covered dish luncheon and meeting March 19 at the Grange Hall.

A trustee, Thomas Galbreath, reported that Mr. and Mrs. Edward L. Zug are now custodians of the Grange Hall and may be contacted for renting the hall. Membership committee chairman, C. G. McSparran, reported.

In the absence of the regular Lecturer, Mrs. Thomas Galbreath presented the program. Miss Solanco, Diane Michaels, ably sang two numbers and accompanied herself on the guitar. Her selections were "Leaving On A Jet Plane" and "You Fill The Day."

Jason Weaver, Wenger & Weaver Insurance Agency, Inc., spoke on the importance of reviewing one's homeowner, fire and liability insurance coverage in the light of present inflationary costs for replacement of lost property.

He elaborated on inflation guard extension coverage available and suggested valuables such as silverware, jewelry and art should be itemized and may be covered for $2 to $2.50 per thousand dollars.

He also stressed the importance of using every safety precaution when using a wood stove. There are certain requirements necessary for insurance coverage. It is also important to keep the stove pipe and chimney clean.

Roger Small will show colored slides of an ice jam on the Susquehanna River at the next meeting, March 24th.

Veterinary Science Club

FLEMINGTON, N.J. — The Veterinary Science 4-H Club held its February meeting at the Extension Center.

A demonstration on Worms and Sheep was given by Kevin Milz, Hampton. Ideas on caring for different types of animals were exchanged among the members.

The club is looking for new members. Prospective members are invited to call Dirk Milz, (201) 735-4310.

Auction set for April 19

Wye Angus herd thriving under new ownership

QUEENSTOWN, Md. — When most of the internationally known Wye Angus herd was officially donated to the University of Maryland Foundation in January 1978, there were some questions raised throughout North America by knowledgeable breeders of the nation's most numerous beef cattle. They included the following:

—Would the Wye Angus herd remain at the Wye location near Queenstown on Maryland's Eastern Shore?

There had been speculation that the herd would be moved to the university's beef cattle research farm near Sykesville, Carroll county, in north central Maryland.

—Would semen from noted Wye Angus bulls continue to be available for artificial insemination purposes?

—Would outstanding bulls from the Wye Angus herd continue to be available for purchase by the public?

On the eve of the second annual production sale of tested bulls since acquiring the Wye Angus herd, W. Lamar Harris, director of the Maryland Agricultural Experiment Station, is satisfied that these questions can be answered in the affirmative.

The herd appears comfortably settled for the foreseeable future in its historic location on the Eastern Shore; semen is being sold regularly from a frozen-sperm bank, and an advisory panel of animal scientists, Angus breeders, breed organization representatives, and commercial producers have been appointed to help shape the future of the Wye Angus herd.

Finally, 54 prospective herd sires will be listed in the sale catalog when the auctioneer's chant starts rolling at noon on April 19 at the Wye Plantation sale site.

The University of Maryland Foundation herd now shares land and some facilities at the Wye Plantation with the Aspen Institute, a privately endowed "think tank" and educational meeting center. Some 200 gentle black brood cows and their young offspring lend a pastoral backdrop to the academic scene.

Supervising the Wye Angus program for the University of Maryland Foundation is Gordon M. Cairns, dean emeritus of the College of Agriculture at the university's College Park campus. A dairy scientist by training, Cairns finds that many principles of dairy cattle breeding and feeding are applicable to beef cattle as well.

Thus, he follows in the steps of James B. Lingle, now retired, who guided the Wye Plantation to worldwide renown among Angus breeders for former owner, Arthur A. Houghton, Jr., over a period covering more than three decades Dwight Riggleman, associated with the former Wye Plantation herd operation under Houghton's ownership, has remained as herd manager

Cairns points out the young Wye Angus bulls offered for sale both this year and last were products of the Houghton ownership team. This year's 1980 calf crop represents the first offspring from the University of Maryland Foundation breeding program. It will furnish prospective herd sires for the 1981 production sale.

Most of this year's calves will have been born February, March and April, Cairns reported.

He emphasized the Wye Angus breeding program is being carried out basically as in the past. This includes a continuation of breeding management, performance testing, and live skeletal measurements on the bulls, along with detailed feed consumption records.

Two changes in the historic Wye Angus pattern under the new University of Maryland management have been formation of the advisory panel and installation on a trial basis of two "pinpointers", or electronic feed consumption recorders, in one of the Wye Plantation's four bull test barns.

Ida's Notebook

Ida Risser

The first day of Spring will be next week. That is difficult for me to realize Somehow, I feel that the Winter passed too quickly and there are so many things undone I can't seem to catch up on the reading that I'd like to do Do I read slower or am I just finding additional material that is interesting to read?

Last week our two boys were home from college and of course that entailed more cooking as they have quite large appetites. And, Mother does like to make extra desserts to please them!

We also used more milk than usual and that meant bringing it in from the barn and bottling it. This has always been considered a distasteful job around here and one that was passed from child to child with great pleasure or displeasure according to whether you were giving the job away or the one getting it. And it is embarrasing to only remember that you need milk after the truck arrives to pick it up Yet, still more embarrassing to have none in the refrigerator on a dairy farm

Do other farm wives find that a lot of money is spent on work clothes, boots and shoes? Around here, it seems that someone is always in need of something as a boot has sprung a leak or an overall got caught on a nail and is torn beyond repair.

Of course, we could use a work sock factory output as they all have holes in the heels Long ago I gave up sitting and mending them as after a few days they were worn through again as bad as before.

Recently, I ask a sixteen year old girl where her father works. She said, "I don't know." At least around here the children do know as they are part of the work that gets done or sometimes doesn't get done So with the coming of Spring, we will all have to pitch in and work harder.

Comment on conservation through letter

HARRISBURG — Should agricultural producers be required to apply soil and water conservation measures on privately owned land to benefit the national objectives? Or should the use of conservation measures continue to be voluntary?

Who should pay for expensive conservation measures that provide some immediate benefits to the producer but have great benefits to the public such as improved water quality, cleaner air, or reduced sedimentation to streams and reservoirs?

These are some issues that will be discussed during a series of public meetings called by the U S Department of Agriculture to give the public a chance to help shape the future of USDA conservation programs

Remaining Area meetings are scheduled as follows

Berks County Wednesday March 19, 7 30 p m , Agricultural Center

Dauphin County Tuesday, March 18, 7 30 p m , Lower Paxton Municipal Building

York County Tuesday, March 18, 7 p m , Pleasant Acres

Montgomery County Thursday March 20, 7 30 p m , Keystone Grange & Trap

If you missed the meeting in your area, you can complete the following questionnaire, developed by the Dauphin County Conservation District, and send it to RCA Response Analysis Center, Box 888, Athens GA 30603

USDA has identified seven separate problem areas (listed below) Please indicate which areas should be given which priority Put a 1" by the one that you feel is the most im portant, a '2" by the second most important and so forth with a '7" by the one that you feel is the least important

_____ Soil Resources

_____Water Quality

_____Water Supply & Conservation

_____Fish & Wildlife Habitat

_____Upstream Flood Damages

_____Energy Conservation

_____Related Resources

Considering the seven problems areas,list some **specific** areas you feel should receive special emphasis

_____

_____

_____

_____

_____

Regulatory Emphasis

Conservation measures would be required

An increasing amount of conservation assistance & cost sharing would be provided

The program of regulation would be gradually introduced over a period of 20 years

I believe that such a program (check **one**)

_____is necessary to solve the problems

_____will help to solve the problems

_____will do very little to help solve the problems

_____will be more harmful in the long run

Conservation Performance Bonus

Conservation measures would be voluntary

Incentives for conservation would be in the form of cost sharing, more favorable loan rates, or commodity price supports

The amount of the bonus will be affected by the cost of the conservation practice

I believe that such a program (check **one**)

_____is necessary to solve the problems

_____will help to solve the problems

_____will do very little to help solve the problems

_____will be more harmful in the long run

Cross Compliance

Conservation measures would be voluntary

Only those farmers who apply conservation measures will qualify for certain benefits such as low interest loans, cost-sharing, crop insurance and commodity price supports

I believe that such a program (check **one**)

_____is necessary to solve the problems

_____will help to solve the problems

_____will do very little to help solve the problems

_____will be more harmful in the long run

Natural Resource Contracts

Conservation measures would be voluntary

A farmers who reduces soil erosion would be paid a flat price per ton of soil saved per year

I believe that such a program (check **one**)

_____is necessary to solve the problems

_____will help to solve the problems

_____will do very little to help solve the problems

_____will be more harmful in the long run

Redirect Existing Programs

- Conservation would continue to be mainly voluntary with technical assistance and cost sharing available
- Emphasis would be on the coordination of program planning and evaluation
- The farmer would continue to make decisions on specific practices that will go on the land

I believe that such a program (check **one**)

_____is necessary to solve the problems

_____will help to solve the problems

_____will do very little to help solve the problems

_____will be more harmful in the long run

State Leadership

- Soil & water conservation programs would be developed by the state governments
- State governments would also provide technical assistance and funding for local and statewide concerns
- The Federal government would identify national priorities regarding soil and water conservation
- The Federal government would also provide grants to states for activities that further national goals

I believe that such a program (check **one**)

Leaner year predicted at meeting

BY JANE BRESEE
Staff Correspondent

WYSOX — "Farmers may have a leaner year financially in 1980," predicted Robert Reick, general manager at the Lewisburg office of the Production Credit and Federal Land Bank Associations.

Reick, the main speaker at the annual meeting of the Northeastern Farm Credit Service in Wysox, told the 150 farmer members present that higher costs of energy, chemicals, interest rates, etc. would be a continuing challenge to their management skills.

Paul Sims of Bradford County, chairman of the joint boards of the Production Credit and Land Bank Associations conducted the meeting. He introduced prospective board members as follows. S. Richard Moyer of Union County, versus Donald G. Cotner, Sr.; and Lee Shaffer, Snyder County versus Mervin B. Nissley, Union County; for a term of 3 years in the Northeastern Production Credit Association.

Voting on board members will continue at two more annual meetings in the northeast region after which votes will be tallied, Mr. Sims explained.

Ronald Byrd from the Federal Land Bank office in Virginia spoke briefly to urge the farmers to support legislation updating the Farm Credit Act of 1971.

Lynn Chubbuck, manager, and Edwin J. Howard, field representative, both at the Wysox Farm Credit Office, were awarded certificates of Achievement for having attended five evening meetings on the topic of Farm Cooperatives. The award was given by the Pennsylvania Association of Farmer Cooperatives and Penn State University.

The meeting was climaxed by the entertainment of Art "Mr. Bones" Richards who played his ebony "bones" accompanied by music amplified from a tape recorder.

The act marked the Richards' 110th performance. He started playing in 1971 as an end man in a local minstrel show.

The Northeastern Production Credit Association and the Federal Land Bank Association are member supported cooperatives and part of the nationwide Farm Credit System whose service is to loan money to agricultural business.

Robert Reick, left, manager of the Farm Credit Office in Lewisburg, was main speaker at the annual meeting of the Northeastern Credit Service. He shares a laugh with Edwin J. Howard, center, field representative, and Lynn Chubbuck, general manager, both from the Wysox Farm Credit Office.

_____is necessary to solve the problems

_____will help to solve the problems

_____will do very little to help solve the problems

_____will be more harmful in the long run

Regional Resource Projects

Federal, state and local governments would join to provide funds and personnel to urgent resource problems that are unique to specific regions

- A single project could include several counties in one or more states

I believe that such a program (check **one**)

_____is necessary to solve the problems

_____will help to solve the problems

_____will do very little to help solve the problems

_____will be more harmful in the long run

Some of the strategies are listed below Please put a "1" by the strategy that you feel would be the most effective, a "2" by the strategy that would be the second most effective, and so fourth, with a "5" by the one that would be the least effective

_____Regulatory Emphasis

_____Conservation Performance Bonus

_____Cross Compliance

_____Natural Resource Contracts

_____Redirect Existing Programs

Check the comments that most nearly reflects your views

_____Conservation measures should be required

_____Conservation measures should be entirely optional

_____Some conservation measures should be required and other should be optional

If conservation is optional, which of the following incentives do you think would be most effective in convincing farmers to participate in conservation measures Put a "1" and a "2" by the two methods you think will be the most effective

_____A bonus in the form of low interest loans

_____Increased technical assistance

_____Commodity price supports

_____Payment for the amount of soil saved per year

_____Other _____

Please put a "1" by the level where you believe leadership should lie, a "2" by your second choice and a "4" by your last choice

_____Federal

_____Regional

_____State

_____Local

Who do you believe should pay (**$$$$$**) for conservation

_____Farmer

_____Local government

_____State government

_____Federal government

_____A combination of

_____Other

Where do you think research should be directed

If you had your "dream come true" how would conservation in America be handled

Please add any comments you have

LEGISLATIVE SCORECARD

©Lancaster Farming Newspaper

Week Ending March 7, 1980

The process by which bills are drafted, considered and enacted into laws is complex, lengthy and confusing even to the most attentive observer Each week on these pages we attempt to provide a roundup of legislative highlights, but in the process, we cannot call attention to the many other bills languishing or boiling in various stages of the legislative process

This scorecard, which we plan to update every week the legislature is in session, is an attempt to provide as complete a rundown of farm legislation as we can

HOUSE AGRICULTURE COMMITTEE:

Bills under consideration by the Pennsylvania House of Representatives Agriculture Committee, not yet placed on the calendar for consideration by the full House

Bill No.	Prime sponsor/ Party/District	Brief Description	Date Referred to Committee
HB 92	Goebel/R/Allegheny	A bill to abolish the milk marketing board	2-6-79
HB 228	George/D/Bucks	Amends clean and green legislation to spell out duties of county assessor, and to define forms and land split-offs	2-12-79
HB 317	Thomas/R/ Snyder-Union	Would amend food law to set nutritional requirements for imitation foods	2-14-79
HB 541	Cessar/R/Allegheny	Would abolish the Milk Marketing Board	3-6-79
HB 724	Thomas/R/ Snyder-Union	Increases salaries of chairman and members of the Milk Marketing Board	3-19-79
HB 738	Noye/R/Cumberland-Perry-Juniata	Would amend clean streams law to prohibit any agency from requiring fences to keep livestock out of streams	3 19-79
HB 758	Stuban/D/Columbia-Montour	Would give Pa Dept of Agriculture power to certify marketing and bargaining associations for certain commodities, and to regulate the marketing and bargaining process	3-20-79
HB 759	Stuban/D/Columbia-Montour	Would authorize the creation of agricultural districts	3-20-79
HB 818	Thomas/R/ Snyder-Union	Would amend clean and green law to provide for recording of preferential assessment agreements and to continue preferential assessment on original tract in case of split-offs	11-13-79
HB 828	Sirianni/R/Sullivan Susquehanna-Wyoming	Would set procedures for the termination of milk handling contracts, and would provide enforcement, penalties and remedies	3-26-79
HB 847	Yahner/D/Cambria	Amends clean and green to more clearly define "roll-back tax" and "split-off"	11-13-79
HB 995	Burns/R/Bucks	Dog law amendment	4-23 79
HB 1042	Stuban/D/Columbia Montour	Restricts farmland ownership by certain corporations	4-24-79
HB 1092	Noye/R/Cumberland Perry Juniata	Would require certain state institutions to make lands available for public agricultural programs	4-23 79
HB 1368	J Wright/R/Bucks	Amends clean and green to allow for continuation of preferential use assessment when a transfer, separation or split-off results in an estate subdivision	5-23 79
HB 1600	Cappabianca/D/Erie	Weights and Measures amendment	7-1-79
HB 1811	Rodgers/D/Bucks	Would regulate importation of live wild rabbits, hares and other rodents	10-9-79
HB 1821	Salvatore/R/Phila	Would provide guidelines for harness racing employees	10 11-79
HB 1914	Lynch/R/Chester	Would authorize creation of agricultural preserves	10-29-79
HB 1970	Wenger/R/Lancaster	Would eliminate any implied warranty of freedom from sickness in the sale of cattle, hogs and sheep	11-14-79
HB 1983	Armstrong/R/Lancaster	Would provide for the preservation of prime agricultural land	11-14-79
HB 2006	Piccola/R/Dauphin	Amends harness racing law to increase the amount of money paid into the Pennsylvania Fair Fund	11-27-79
HB 2007	Burns/R/Bucks	Would increase Pennsylvania Fair Fund and Sire Stakes incomes from harness racing funds	11-27-79
SB 414	Sen Howard/R/ Doylestown	Protects race horses from drug and other forms of abuse	10-15-79

Farm related bills under consideration by the House Appropriations Committee

HB 856	Wenger/R/Lancaster	Amends liquified petroleum gas act to provide for registration of farmers in some cases	10 9-79
HB 1002	Thomas/R/Snyder-Union	Provides a fee for purebred livestock auctions	10-9-79
HB 1176	Pitts/R/Chester	Would amend inheritance and estate tax law to provide for preferential valuation of land in farms, ag reserve or forest	2-12-80
HB 1535	Thomas/R/Snyder Union	Provides for land management commission to assume management and responsibility for farm farmland now under control of Department of Public Welfare	1-22 80
HB 1793	Thomas/R/Snyder Union	Would authorize the creation of agricultural preserves	10-29 79
HB 1897	Yahner/D/Cambria	Would amend Pa liquor control laws to allow limited manufacture of liquid fuels for on farm use	11-13 79

SENATE AG COMMITTEE:

Bills under consideration by the Pennsylvania Senate Agriculture and Rural Affairs Committee, not yet placed on the calendar for consideration by the full House

SB 83	Holl/R/Lansdale	Amends clean and green to further define "agricultural reserve "	2-5-79
SB 101	Holl/R/Lansdale	Dog law amendment	2-5-79
SB 193	Manbeck/R/Lebanon	Would promote family farms by establishing a family farm security program to encourage loans for purchase of real estate, and by creating a family farm advisory council	2-12-79
SB 251	Bell/R/Media	Would amend milk sanitation law to require Pa Secretary of Agriculture to accept inspections by local health departments	2 20 79

Black River 4-H Horse Club meets

LONG VALLEY, N.J. — At its monthly meeting at the Community House in Fairmount, New Jersey, the Black River 4-H Horse Club discussed its fund-raising project.

Also discussed was the club dinner that was held in December.

In November the following officers were elected: Heather Wayne, President; Lynn Williams, Vice President; Michelle Trevena, Secretary; Denise Di Blasi, Reporter; and Dawn Kawash, Treasurer.

In February, the club saw a film on horse judging.

A horsemanship clinic, similar to Monte Forman's Clinic is planned for April 11, 12 and 13. It will be run by Bob Alen. At this clinic, family, friends and club members themselves will be able to enjoy a day or so of riding instruction. For more information, call Mrs. Williams at 832-2821. The deadline for registration is April 1, 1980.

Mike Serpin will be chairman of the Western Horse Show to be held in June. The club will co-sponsor an English-Western show to benefit the Stanton Grange, which recently burned. This show will be in May or June.

The next meeting will be March 18, 1980. Reported by Denise Di-Blasi.

Legislative scorecard

(Continued from Page C18)

SB 253	Bell/R/Media	Would make changes to milk sanitation law related to sanitation, inspections, standards and labelling	2-20-79
SB 277	Stapleton/D/Indiana	Would authorize the creation of agricultural districts	2-20-79
SB 406	Jubelirer/R/Altoona	Dog law amendments	3-6-79
SB 953	Holl/R/Lansdale	Would amend clean and green to further define forest reserve, split-offs, or changes in use	9-18-79
SB 1253	Dwyer/R/Meadville	Would amend clean streams law to prohibit any government agency from requiring fencing along streams to keep livestock out of water	2-13-80
SB 1264	Stapleton/D/Indiana	Would amend Pennsylvania Municipalities Planning Code to authorize agricultural districts	2 13-80

How bills become laws...

At any one time, there may be 50 or more farm-related bills under consideration by the Pennsylvania House and Senate A bill can languish in committee for months, even years Or it can be introduced, passed by both the House and Senate and be on the Governor's desk in a matter of days

Bills must originate with either a Senator or a Representative With the help of their staffs, constituents and outside consultants, legislators state their intent in legal language, which is usually further refined as the measure is put into official form by the Legislative Reference Bureau

If a bill was originated by a House member, it will be referred to a House committee The committee will make its own determination of the bill's worthiness before sending it to the floor for consideration by the full House Each bill must be given three readings in the House before members can vote on it

If they pass the bill, it goes to the Senate, where it is referred to a committee, and follows the same procedure it underwent in the House For bills originating in the Senate, the procedure is reversed

If both the Senate and the House pass a bill, and the Governor signs it, it becomes a law

"Five years ago, when we chose the diesel engines to power our 750-acre irrigation system, fuel economy was what we were looking for and we looked at a lot of engines The Deutz diesel was by far the best on that score Other Deutz users told us they had cut their fuel bill by about 25 percent—we've done better than that They also said the separate air-cooled cylinders on a Deutz are very easy to service I couldn t tell you about that—we've never had to repair one"—Bill Bontrager, Operations Manager Estrella River Properties, Ltd , Paso Robles, Ca

Deutz engines consume less fuel simply because their advanced design makes them more efficient They run at higher head temperatures and make better use of the fuel They are more dependable, longer-running because of their solid quality and superior cooling system About half the causes of downtime in liquid-cooled engines are attributable to breakdowns in the cooling system In air-cooled Deutz diesels, there can be no freeze-ups or boil-overs; no broken water hoses, no water-pump failures, no cavitation, none of the problems liquid-cooled engines are heir to

Throughout the world, wherever the going is toughest, Deutz air-cooled diesels are going strong

EXPERIENCE MAKES THE DIFFERENCE

Lancaster Co. hosts beef tour

BY SHEILA MILLER

LANCASTER — Over 160 ıttlemen from three ıghboring states attended oeef cattle operation tour Lancaster County.

Host, Max Smith, led the ravan of buses, carrying lks from New York, .laware, and Maryland, in swing trip around the county.

The first stop on the tour, sponsored by the Maryland Cattlemen's Association and the Lancaster County Extension Executive Committee, was the Greystone Manor Farms, Leola.

From there, the cattlemen moved on, travelling the scenic highways of the county to the only purebred Simmental operation in Lancaster.

After a lunch and lecture on internal parasites in cattle (which wasn't an appetizer for most of the people), the company of beef feeders were off to Ephrata to take a look at the Glen and Barry Wissler operation.

Wrapping up the day, the buses pulled into Musser Ferry's farm, near Manheim, where neighboring states cattlemen saw how a farmer puts his chickens to work raising beef cattle.

Take a gander at a "Closer Look at Lancaster County Beef".

A closer look at Greystone Manor Farms

LEOLA — First stop on the ur was Mike Stoltzfus' reystone Manor Farms. ne visiting cattlemen marked about the level nd, beautiful farm uldings, and most of all— rocks or stone fencerows.

Harold Firestone and Pip avegum, filled the visitors on the details of their peration.

According to Firestone, e farm had 600 head of eders on their 1000 head ıpacity feedlot. He added avegum, the farm's buyer, ually brought the cattle in 600 to 700 pounds and sold em at about 1200 pounds, aking sure all the cattle ere out by June each year.

Ravegum stated they rmally get their cattle om out West, usually ebraska, but this year they ught the cattle in Virginia. e said their decision was ased on the cost of freight to ove the cattle to Lanster.

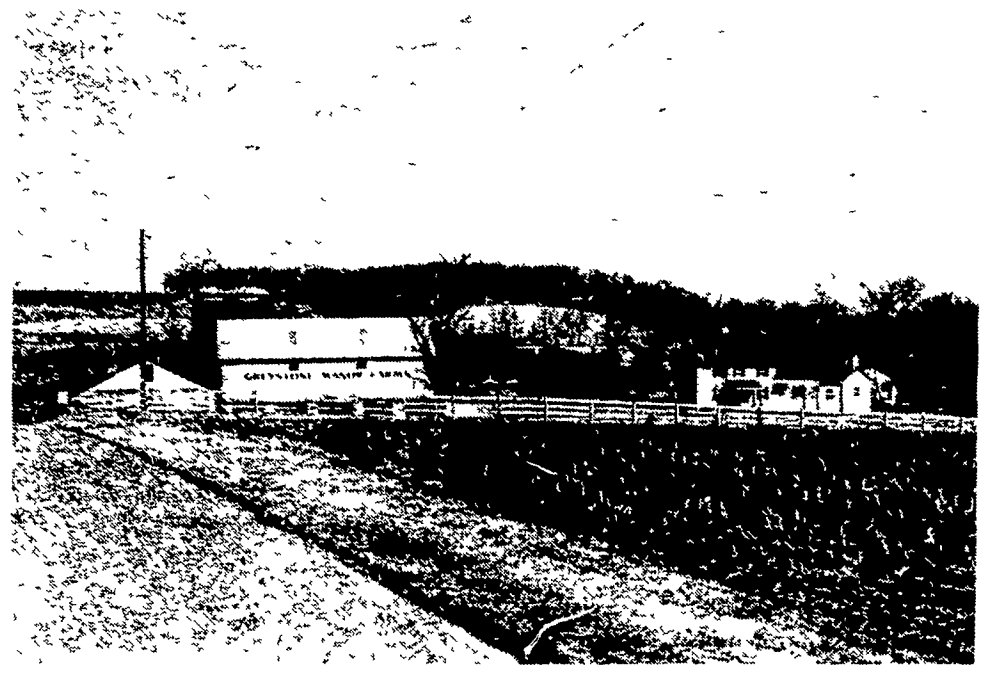
The feeding regimen for e feeder steers at eystone Farms has been veloped by the farm's feed mpany and yields about 2 2½ pounds of weight gain r day.

For the first 3 days after e cattle arrive, they are d ten pounds of corn silage us 1½ pounds of protein pplement per head. From y 4 until the 115th day, the eers are given free choice corn silage plus 1½ ounds of protein per head.

Over the next 9 days, the anagers decrease the corn lage fed, and at the end of days the cattle are coming five pounds per head r day of corn silage, plus ee choice high moisture rn, along with the 1½ ounds of protein.

From then on until the me they are shipped off for aughter, the steers are ven free choice of high oisture corn, roughly three ounds per head per day, ith five pounds of corn lage per head per day and e protein.

For the first 115 days, the rm managers estimated it st about 42 cents per head feed, and thereafter, 92 nts per head.



As the tour buses approach Greystone Manor Farms, the visiting cattlemen were impressed by the level land, beautiful farm buildings, and most of all, no stone fence rows.

Greystone Manor's manure handling facility was one of the main attractions of the stop-over. The feed-lot manure is collected in a pit under these cattlemen's feet, and pumped out of a pipe seen in the background.

The protein, Firestone explained is supplied for 60 to 80 days by the haylage from the farm operation. After that time, the protein is supplied through commercial pellets.

Along with the planned out feeding program, Firestone explained they add sulfur to the water when the cattle first arrive at the farm. He said they also worm the cattle with a five-day feed additive.

Firestone pointed out they do not use implants or mix any feed additives for growth. He said, " We couldn't handle Rumensin in all of the cattle, and we mix the cattle in the lots. We don't separate them by size."

The Greystone Manor feedlot also provided the visitors with some housing engineering ideas.

The feedlot was partially covered by roof, with the remainder of the concrete lot open. To keep the air circulating, a ventillation system was designed to take the ammonia-filled air out over the cattle through a type of air-sac.

Firestone remarked that one of the drawbacks of the ventillation system was the fact that birds always wanted to build their nests inside the air-sacs and caused them to clog.

The farm also featured a manure management system At Greystone Manor, the manure from the feedlot is scraped to the far end of the lot where it is collected in a large pit. The liquid manure is then pumped out on the farms 250 acres of corn land, which

(Turn to Page C24)

Harold Firestone, left, and Pip Ravegum told the 50 visitors about their feedlot and cattle

Glen Wissler took the loading chute and portable mike to tell the cattlemen about his feedlot and farming operation near Ephrata.

A closer look at Wissler Farms

EPHRATA — After a short rest and lunch where the cattlemen heard from a company representative on parasite control in feedlot animals, the tour got back on the road and headed north.

The next stop on their itinerary was the farm of Glen and Barry Wissler. This was still another type of cattle operation for the visitors to evaluate.

The Wissler's have a father-son partnership, where together they farm 225 acres of their own land, plus an additional 100 rented acres.

Their crops program includes 250 acres of corn, 30 acres of wheat, and the remainder in soybeans.

The soybeans are used as a protein supplement for their feed-lot operation after it is dried and ground. The Wisslers put up 90 to 100 acres of corn silage and about 90 acres of high moisture corn in special silos.

Glen Wissler, the father, told the group they feed out about 400 head of steers every year. Their barn facility has a maximum limit of 450 to 475 head.

The cattle are brought in at 812 pounds, according to Wissler, and are trucked to Ephrata primarily from Virginia.

Their feeding program consists of feeding free choice silage, with 1½ pounds of protein from October until February. Then the cattle are given 5 pounds of grain per head every day.

This feeding program continues until May, when the cattle are marketed, weighing about 1200 pounds.

Wissler said he is a firm believer in worming the animals, but he only worms after a veterinarian advises him to based on a manure sample.

His health program also includes adding trisulfa to the water when the steers are moved into the feedlot, and he feeds them only hay for 10 days to lessen the risks of shipping fever. He pointed out he does not vaccinate or implant the steers for fast weight gains.

Along with their cattle, the Wisslers raise hogs, crossing Yorkshires, Hampshires, and Durocs. They keep around 100 gilts and sell their feeder pigs to a nearby farmer.

When asked if they ever received any complaints about their farming operation from the new homes built across from the farm, Wissler smiled and said "No, because we sold them the lots."

A closer look at Beechdale Farms

BIRD-IN-HAND — The next stop on the tour was Beechdale Farms, which offered a scenic back-drop for the out-of state cattlemen.

Nestled back a tree-lined farm lane, the visitors stepped off the buses in front of a beautiful limestone home where they met Dr Thomas Conrad, the owner of Beechdale Farms

The visitors were told by Conrad about his purebred Simmental operation. He boasted of having the first purebred calved east of the Mississippi in 1972.

His herd of 50 purebred cows was a long-term effort of selection of Swiss and French foundation sires and dams, which meant sometimes crossing the U S. to find the best females.

His herd building story saw Beechdale Farms buying 135 females in 22 states and in 5 Canadian provinces.

In the early years, Conrad admitted to a lot of calving troubles, poor conception rates and too much turnover in his herd. But now, he stated he has a closed herd, with his replacement heifers coming from his own cows

To help in calving, Conrad told the group he uses a closed circuit television to keep an eye on the cows This was brought about by so many of the calves having to be pulled in the farm's early years

His Simmental calves, cows and bulls are kept on a records management system to help in selecting the best animals to keep, breed, or sell. The 205 day adjusted weaning weight for his calves is 660 pounds for the bull calves and 580 pounds for the heifers.

Conrad also pointed out that his herd is 50 percent polled, noting that in Simmentals the polled animals are considered inferior to those that are horned.

In his breeding program, Conrad said they breed their heifer calves at 13 to 14 months of age These heifers then calve when they are 22 months old.

For sires, Conrad breeds most of his cows to the Simmental bulls known as Signal, Galant, and Beat, with seven other bulls used to service the remaining cows in his herd

The breeding is done by artificial insemination, he said, in order to use the best

A closer look at Forry Farm

The out-of-state visitors were welcomed by some of Beechdale Farms' newborn calves.

MANHEIM — The visitors were in for a unique operation at the Forry farm. Here they saw a housing engineering set-up totally different from any previous stop on the trip.

Under one roof, Forry fattens 850 steers each year. These steers are housed on top of an 8 foot deep manure pit, one area measuring 104 feet by 50 feet, and the other measuring 50 feet by 50 feet for two additional sections.

The walls of the manure pit are ten inches thick, Forry added. He said he prefers the two smaller sections over the one large manure pit because he doesn't have to set up his pump as often to agitate the manure.

Before pumping out the manure, Forry said he adds 2000 gallons of water to the manure to help to liquify it. He pointed out that you can't add the water too fast because it creates too many gases.

One of the visitors asked Forry how he checks the gas level before he goes down into the pit. He said he had a steer fall through the slats one time, and since the steer didn't die, he said he figures it's okay.

The steers walk on top of slatted concrete floors which allow the manure and urine to drop down into the pit. The slatted floors are made up of poured sections with slats 5 inches wide with a 1¾ inch space between the slats.

Forry said his building was designed to give each steer 20 square feet of space, at maximum capacity of 500 head.

The only problem he said he had with the design was the open peak of the roof that runs the length of the building.

He told the visitors he once tried to put a section of roof over the space and found he had air circulation problems. So he removed his attempt to remodel the design, and puts up with the little bit of rain and snow that falls through the space.

Forry pointed out that the older building in the feedlot was constructed in 1973. In this barn, they installed styrofoam on the inside of the roof. He pointed out that this side of the barn still "sweats", so they eliminated this in the newer section built in 1975

The Manheim cattleman continued to dazzle his audience when he told them his feeding program put his 60,000 layers and 62,000 broilers to work in feeding his cattle

Forry told them how he

(Turn to Page C26)

Beechdale Farms

(Continued from Page C22)

semen from the best bulls available.

His present herd consists of three-quarter blooded Simmentals, purebreds, and full bloods.

Conrad also told the group that Beechdale Farms does not show their cattle, but sells primarily for the commercial breeders.

The visitors were able to tour the bull barn and take a look at the cow-calf herd. As a matter of fact, some of Conrads cows were grazing around the stone home's lawn, unconcerned with the 160 people wandering about them.

Beechdale Farms even gives a guarantee to its customers. It says, "As long as you are our customer, we will assist you in your breeding plans, feeding formulas, herd health, record keeping, performance testing, marketing, and registering your animals. If you are not satisfied, we will refund your money or furnish another animal of like kind."

Dr. Thomas Conrad talks to the group about his purebred Simmental operation.

Greystone Manor Farms

(Continued from Page C22)

yields roughly 24 ton of silage per acre.

In addition to raising corn, the farm also raises 100 acres of alfalfa every year, primarily for haylage. Firestone noted they feed hay only when the cattle first arrive at the farm

Greystone Farms also feeds 500 head of hogs and keep 40 brood sows. They have a boarding business for about 50 horses at another farm, but they no longer raise Thoroughbreds, Firestone noted

More farmers each month prefer to buy their

Order 4 base price at $13.05 for February

ALEXANDRIA, Va. — Middle Atlantic Order Market Administrator Joseph D. Shine today announced a February 1980 base milk price of $13.05 per hundredweight and an excess milk price of $11.32.

The weighted average February price was $12.83 and the butterfat differential for the month was 15.0 cents. The February base milk price was up two cents from January 1980 and was 72 cents higher than last February.

Order No. 4 prices are announced for 3.5 percent milk f.o.b. plant location within 55 miles of Philadelphia, and also within 75 miles from the nearer of Washington, DC or Baltimore, MD.

There is a six cent direct-delivery differential applicable to producer milk received at plants located within 55 miles of Philadelphia.

Shine said producer receipts totaled 436.6 million pounds during February, an increase of 1.5 percent from the previous month, and 2.7 percent above last February, on a daily basis.

Class I producer milk totaled 238.2 million pounds and accounted for 54.56 percent of total producer milk receipts during the month, down from 55.80 percent in January and below the 57.41 Class I utilization percentage last February. Base milk accounted for 88.03 percent of total producer milk receipts in January, compared to 88.84 percent in January and 89.65 percent last February.

There were 7159 producers supplying Order 4 handlers during the month and the average daily delivery per producer of 2,103 pounds was up 1.45 percent from January and 3.9 percent above last year. The average butterfat test of producer milk of 3.82 percent was down from 3.85 percent last February.

Middle Atlantic Order pool handlers reported Class I in-area milk sales of 7.1 million pounds per day during February, a decrease of 3.6 percent from January and a drop of 6.2 percent from February 1979, after adjustment to eliminate variation due to calendar composition.

Baker takes first place

NEW ENTERPRISE — The National Corn Growers Association has named John R. Baker of Bakers 3 Inc., New Enterprise a first place winner in Pennsylvania's annual Corn Growers Contest.

Baker won in the Class A Non-Irrigated Corn Yield category with a 143.10 bushel per acre yield produced with Pioneed 3780.

Contests sponsored in 1979 by state Corn Growers Association chapters were held in 37 states. Competition categories were: Irrigated Corn Yield, Class A Non-Irrigated Corn Yield.

A Pioneer grower in Alabama was named first place National Champion for Class A Non-Irrigated Corn.

Introducing the new Martin Scavenger... the one spreader for a two-spreader farm.

PATENT PENDING

When the manure hits the fan of a new Martin Scavenger you know you ve seen all the spreading equipment you ll ever need You get up to a 50 foot pattern of the most even manure coverage ever to fertilize a farm And that s regardless of the kind of manure you load into it Liquids semi-solids solids everything Even frozen

The Scavenger s large specially-designed auger pulsates and spirals any kind of manure throwing it against a unique 30-inch-wide expeller reel This technique enables the Scavenger to spread more kinds of manure in greater volume with less horsepower

It s time you get all your manure together in the one spreader that s more effective than any two of the high-priced spreaders The Martin Scavenger

Any way you look at it—return on investment economy of operation—Scavenger measures up It does the work of two spreaders for the price of one Ask your Martin dealer about it today

Martin Manufacturing, Inc.

Musser Forry told the interested group how he uses chicken manure in his feeding rations.

A closer look at Forry Farm

(Continued from Page C24)

mixes 50 percent chicken litter and 50 percent shelled corn with his corn silage. He feeds the chicken manure mixture at the rate of 6 to 8 pounds per day per head along with all the silage they can eat.

Forry claims to get a two pound gain per steer per day on this ration. He had a sample of the mix handy for anyone who wanted to try it, he said.

Forry said he buys his cattle when they weigh 600 to 750 pounds, but he would prefer to buy them smaller. He said he feels they have their most efficient gains when fed silage from 500 to 1000 pounds, without putting on a finish.

The steers on the Forry Farm are fed-out on slatted floors, with the manure pit underneath.

4-H Horse Production Club

LANCASTER — The reorganizational meeting of the Lancaster County 4-H Horse and Pony Production Club will be held at Rose Fellenbaum's on March 18, 1980 at 7:30 p.m.

If you have any questions about the production club, please contact Rose Fellenbaum at (717) 569-3068 or Jean Spahn at (717) 687-8858.

Sewing and fitting to be taught

NORRISTOWN — The number one problem faced by home sewers today is pattern alterations.

It is a fortunate few that can make a garment according to pattern specifications and end up with anything resembling a flattering fit.

A four-hour demonstration on how to solve fitting problems in dresses and slacks will be held in the Wyncote and Lansdale areas on March 24 and 25 respectively This program, sponsored by the Montgomery County Extension Service, will be conducted by Irene James, a trained instructor of the Sew/Fit Method.

James will show how to use waxed paper, a tracing wheel and a regular pattern to make any pattern alteration in less than 60 seconds. Any figure type can be fit quickly and easily with this method.

The program will run from 10:00 to 2:30 and the cost for the day is $5.00. For more information contact the extension office at 215/277-0574.

HESSTON FARM EQUIPMENT

State budget, energy highlight Lebanon extension meeting

BY CURT HARLER

SCHAEFFERSTOWN — Deputy Secretary of Agriculture Luther Snyder Tuesday evening outlined the proposed Pennsylvania Budget for 1980-81 and told Lebanon County farmers how it would effect agriculture.

Snyder spoke at the annual Lebanon County Extension Association banquet held in Schaefferstown.

In the county which has taken the lead in many respects on alternative energy sources, it was only natural that energy be highlighted on the extension program, too.

Calling farm and land preservation "a necessity" Snyder said the state needed legislation which would allow the farmer to farm.

But he added that the time has come for the public to decide what it wants government to do and what it can do for itself. Although the Thornburgh administratin is concerned about agriculture, Snyder said the relative share of the state budged allocated for the Ag Department is small.

Of the $6.8 billion budget for Pennsylvania, just $15,095,000 is earmarked for agriculture.

That budget is the same as last year's and must serve for both payroll and expenses for the department's 645 employees.

That figures to 0.002 of the total Commonwealth budget, hardly an impressive figure.

Snyder said he believed the people have sent a message to government that they want less government service.

But he said there are two areas were the Ag Department intends to expand. They are agricultural commodity promotion and increasing agricultural income.

Snyder said the Transportation budget will be reduced by $16.3 million if the proposed budget is passed.

He said this would show up in poorer maintainence of rural roads and bridges.

He said the Governor's proposed percentage gasoline tax would provide some relief for PennDOT's budget squeeze, perhaps helping the rural highway situation.

Areas with increased revenues in the proposed budget are the Industrial Development Association which trys to lure industry to Pennsylvania; the tourism department; the Energy Development Authority, which is looking into fuel alternatives.

One pleasant plus for farmers is $14.45 million extra in education, including funding for Penn State's extension and research budget.

On the subject of extension budgets, Capital Region Assistant Director Marion Deppen said the Service was pleased to get an extra million dollars last year to fill several extension positions.

Deppen also spoke of the "quality and action" of the Lebanon County programs, and noted the value of extension in all phases of agriculture, youth, gardening and home economics.

He said fossil fuels will not last forever. He said there was a need to look at renewable energy from the land.

He said some of the best, most productive land in the world is in this area and said it was up to local people to make the decisions which will preserve that land.

Deppen noted several ways farmland could help ease the energy crisis. He said a bushel of corn will give 2.5 gallons ethanol and 16 pounds of distillers grain for feed.

He also pointed out that hardwood chips could be used with high sulfur coal to make a cleaner-burning fuel.

He said farmers one day may bring manure to a central plant which will generate methane. Farmers then can haul the manure back to their farms for its fertilizer value.

In Lebanon Extension Service business, four directors were elected to the Association board. They included President Janis Horst, R 1 Newmanstown, who has been a member of the executive committee for 10 years and is a past secretary of the committee. She is active in sewing, 4-H, and the fair board.

Vice President Harold Bollinger, R 1 Newmanstown, is a dairy farmer, member of the state DHIA board, and a former Holstein Club director.

Secretary Dorothy Moyer, Lebanon, has been active in 4-H and is a 10-year member of the executive committee.

Clair Gerberich, R 3 Jonestown, was reelected as treasurer. A Soil Conservation district employee, he has served for two years as executive committee president and for seven years as treasurer.

County Agricultural Agent Newton Bair announced a county tour to Mason-Dixon Farms on March 27. The bus will leave Lebanon in the morning and return that evening.

Cost of the tour is $6. Bair pointed out the only way a farmer can get through the Mason-Dixon methane setup is on a tour since they don't allow individuals.

For details, contact the extension office.

But be careful how you dial the phone. Extension Director Alletta Schadler said their offices are having a new telephone system installed.

The extension office can be reached only by calling the county number, 717/274-2801. That will plug the caller into the switchboard where callers will have to ask for the phone extension of the particular agent they wish to reach.

The 1980 officers of the Lebanon County Extension Association include, from left, President Janis Horst, Newmanstown; Vice President Harold Bollinger, Newmanstown; Secretary Dorothy Moyer, Lebanon; and Treasurer Clair Gerberich, Jonestown.

Garden Spot teams top FFA poultry judging

LANCASTER — Garden Spot High School teams captured three top awards in the Lancaster County FFA Poultry Judging Contest held Saturday, March 8, at Weaver's Quality Eggs, Inc.

One of the New Holland teams was awarded trophies as both the first-place Lancaster County team and the first-place Tri-County team. Members of the team were Carolyn Witmer, Randy Spacht and Scott Hurst.

The other New Holland team took the second-place Lancaster County team trophy. This team included Lori Fox, Cliff Horning and Scott Hurst.

The third-place Lancaster County team came from Penn Manor High School and included Jim Alexcih, Tanya Green and Steve Appel.

Top individual point scorer in the judging contest was Steve Smith, of Ephrata High School.

A total of 52 FFA members from 11 high schools in the tri-county area of Lancaster, York and Berks took part in the contest. Participating high schools included Elizabethtown, Solanco, Penn Manor, Ephrata, Garden Spot, Warwick, Manheim Central, Kennard-Dale, Twin Valley, Dover Area and Red Lion.

Each of the FFA participants visited 10 different stations in the contest and marked their score cards in various judging categories.

Among the judging categories were exterior eggs, breakout eggs, dressed birds, disease identification, caged pullets, caged hens, laying hens - cull or keep, and pullets - cull or keep.

Also included in the judging stations was an oral presentation given by each contestant. At this station, each gave an oral presentation of the reasons for placings made in the caged hens category. Guidelines for judging in the oral presentation included appearance and delivery of reasons for placings, the proper use of terms, accuracy of statements and the completeness of coverage.

The county poultry judging contest was patterned after judging that takes place at the national FFA level. It was designed to give FFA participants first-hand experience in the manner in which the contest is conducted at the national level.

The finishings of the top 10 Lancaster County in-

(Turn to Page C29)

dividuals included Steve Smith, Ephrata, 451.5 points; Carolyn Witmer, New Holland, 442; Scott Hurst, New Holland, 442; Cliff Horning, New Holland, 441.5.

Also, Barry Geib, Manheim Central, 439.9; Jim Alexcih, Penn Manor, 431.5; Theresa Luckenbill, Penn Manor, 421.3; Steve Appel, Penn Manor, 419.3; Mike Eberly, New Holland, 418.8; and Randy Spacht, New Holland, 413.8.

Teams scores included New Holland A team, 1297.8; New Holland B team, 1272.3; and Penn Manor, 1243.8.

The revolving trophy, which was awarded to the top Lancaster County team, was provided by the Lancaster County Poultry Association. Other top trophies were sponsored by Weaver's.

Top individual finisher in the Lancaster County FFA poultry judging was Steve Smith, of Ephrata.

Acting chief named in health division

WASHINGTON, D.C. — James O. Lee, Jr., is the acting administrator of the U.S. Department of Agriculture's Animal and Plant Health Inspection Service, Assistant Agriculture Secretary Bobby Smith announced Monday.

At the same time, Lee was promoted to permanent associate administrator of the agency.

Smith, who is in charge of the USDA's transportation and marketing services, also announced that Harvey L. Ford Jr., moved up on March 2 to replace Lee as deputy administrator for plant protection and quarantine programs.

Lee will serve as acting administrator of the agency until a new administrator is appointed to replace Francis J. Mulhern, who has retired. Smith said Lee will be the full-time associate administrator for the agency.

Since joining the USDA in 1966, Lee has held various positions in plant protection programs. Before that, he worked for the Environmental Protection Agency and as an animal biologist with the U.S. Department of Interior. He is a native of Cadiz, Ohio, and holds several degrees in biology and chemistry.

Ford was assistant deputy administrator for national programs in Washington, D.C., and was the southwestern regional director of plant protection and quarantine programs at Gulfport, Miss. He holds a biology degree from Richmond University and is a native of Colonial Heights, Va.

Enjoy with pride the value and the real convenience of THE MILLER BUILDING, delivered complete and ready for use . . .

The Miller Building is ready when you are — and can be delivered to your site and erected in just a few hours upon your own foundation. You save both time and money when compared with conventional or even masonry construction.

The uniqueness of The Miller Building is in the exceptionally strong internal construction. Not only does this allow for the added strength of siding materials but it permits maximum use of all interior space — permiting the wide use and easy application of finished wall materials.

Besides the flexibility of modular units — allowing additions or easy relocation — erection is fast and simple with no wait for a contractor.

The Miller Buildings Pictured: TWO CAR GARAGE 24 x 24 x 8

E-town Young Farmers learn how to win friends and influence people

BY PAT KAUFFMAN

MT. JOY — "All of life is an attitude. Nobody can ruin your day without your permission." So stated Grover Gouker at the Elizabethtown Young Farmers banquet, Saturday.

While Gouker was in fact a last minute replacement for another speaker, the manager for Dale Carnegie was an obvious crowd-pleaser.

While noting an article he read recently which stated that a farmer's time is worth $200.00 per hour, Gouker emphasized the need to take control of one's day. That, he noted, meant recognizing that the only person to blame when things go wrong is oneself. It also meant that a farmer's time was too valuable to give control of it to someone else. "If you're not in charge, you're giving that control to someone else," Gouker quipped.

With the use of quotes and jokes, Gouker pointed out to the group that "Most people will be about as happy as they decide to be."

Arlan Keener from the Elizabethtown FFA spoke briefly to the group and encouraged members present to "Look around for a teen you can help."

The evening was made more memorable for the group by the presence of fifteen gingerbread barns used as table decorations. The elaborate decorations were given to some lucky people as door prizes.

During the awards presentations, the following farmers were recognized:

Robert H. Kauffman, Top cow for butterfat—985 pounds and Top herd butterfat—647 pounds; Joe C. Wivell, Top cow for milk—27,673 pounds and Top herd for milk—17,871 pound herd average.

Luke Brubaker, First in shelled corn—164.4 bushels/acre; Joe C. Wivell, First in ear corn—194.1 bushels/acre; Irwin W. Engle, First in ton TDN—9.69 tons/acre and First in silage yield—32.3 tons/acre

Wivell was selected as the outstanding young farmer under thirty. Engle was chosen as the outstanding young farmer over 30.

Also honored by a certificate of appreciation for his contributions to the club, was Dieter Krieg

Egg Clearinghouse trading breaks all previous records

DURHAM, N.H. — Public trading through Egg Clearinghouse, Inc. during February broke all previous records and placed the organization on a record trading pace for the first two months of 1980.

Frank Koebrich, President and General Manager, said 88,620 cases of eggs were traded in February surpassing the previous record set in February 1977 by more than 15,000 cases. Trading represented a 23 percent increase over the near record trading of February 1979.

Combined trading for January and February 1980 surpassed the previous first two months' trading record by 15,350 cases – more than 20 truck loads, Koebruch said. This record was set by February's strong trading since January's totals fell almost two loads short of the previous record for a January.

Some 120 firms participated in trading during February and 131 during January. Koebrich agreed with former Manager Ray Delano that the increased interest and trading has resulted from the commitment program established by members in September 1979. Since that time a record number of eggs have been traded through the Clearinghouse.

Koebrich noted trading during the last quarter of 1979 was more than 16,000 cases higher than for any previous last quarter and trading participation increased substantially during the period. The trading pace has continued into the new year both in number of trades and in the number of participants, Koebrich said.

Junior Polled Hereford Assoc. elects officers

GREENMOUNT — At a special meeting sponsored by the Maryland and Pennsylvania Polled Hereford Associations, Frank Darcey, president of the Pa. association introduced the new officers of the Junior association.

Randall Becker, Dover, will serve as the 1980 president. And, as vice-president, the association selected Paul Hartman, Gettysburg.

Jane Sikorski, Emmaus, and Blake McCleary, Biglerville, will serve as secretary and treasurer respectively.

Also introduced were the new year's directors, Jerry McCannon, Schellsburg, and David Shultz, Mechanicsburg, serving a one year term, and Nancy Carson and Aaron Weilerstein, both of Philadelphia, serving two year terms.

On the Junior's future agenda is a beef field day, scheduled for June 14 at Douglassville. Alan Ott, director of youth activities for the American Polled Hereford Association, and Erskine Cash, coordinator of purebred beef cattle at Penn State will be the guest speakers.

The new officers, along with 114 members of the Pa. and Md. associations, heard from Robert Scarth, vice-president of education and research for APHA, concerning a management tool called "Guidelines".

Scarth noted the problem for most breeders is to find bulls that will sire progeny

The 1980 Junior Polled Hereford Association officers are, from left, Randall Becker, president; Jane Sikorski, secretary; and Blake McCleary, treasurer. Not pictured is Paul Hartman, vice-president.

superior to the present calf crops.

He noted that the genetic heritability, or the chances that a certain trait is passed from parent to offspring, for weaning weight is 30 percent. The milk production of the dam has a significant influence on the actual weight of the weaned calf, he said.

The chances that the calf will have the same birth weight of its parents is 40 percent inherited, along with its yearling weight.

The Guidelines program helps breeders to test the performance of their bulls and cows, and aids them in selecting for specific traits, Scarth added.

He emphasized the fact that ease of calving can be linked to the birth weight, however he pointed out sire selection should be most influenced by the weaning weight records.

The workshop was held last Saturday, at the Greenmount Fire Hall, west of Gettysburg.

Grassland FFA keeps audience suspended

BY PAT KAUFFMAN

BLUE BALL — Shades of Mork filled the fire hall here Friday evening, as Grassland FFA showed its appreciation to those who have supported it.

The occasion was the annual awards dinner held at the Blue Ball Fire Hall. Over 200 parents and club members enjoyed a big ham dinner before proceeding with the main event of the evening, the awards presentation.

During the slot in the program reserved for door prizes, FFA program supporters were called to the front of the hall and instructed to remove their jackets, at which point a multitude of brightly colored suspenders was unveiled and placed on each of the honorees. In this way, the club gave back to the group some of the support they had given them.

In a more serious vein, members who had placed high and worked hard during the past year were awarded trophies and certificates. These included:

Christian R. Herr, Grassland Star Farmer; Barbara Herr, Star Red Rose Farmer; Leonard Snader, Star Red Rose Agribusiness, Dennis Weaver, Star Chapter Farmer; David Mull, Star Chapter Farmer; Clifford Horning, Star Greenhand-Production; Ronald Martin, Star Greenhand-Agribusiness.

Carolyn Witmer, High Seed Salesman, 9th grade; Lance Horst, High Seed Salesman, Senior Group; Larry Horst, Meat Judging, 1st; Kevin Martin, Meat Judging, 2nd; Glenn Hartz, Livestock Judging Champion.

Foundation Awards were presented to:

Chris Herr, Beef Production; Wanda Weber, Dairy Production; Barb Herr, Sheep Production; David Mull, Swine Production; Glenn Hartz, Poultry Production; Ron Fox, Crop Production; Barb Herr, Diversified Livestock; Gerry Weaver, Soil and Water Management; Kevin Martin, Farmstead Improvement; Owen Hartz, Agriculture Mechanics; Rodger Weaver, Agriculture Electrification; Kevin Zimmerman, Agriculture Processing; Cliff Reifsnyder, Agriculture Sales and Service; Kevin Roth, Placement in Agricultural Production; Jay Zimmerman, Nursery Operations; Leonard Snader, Vegetable Production; Lisa Russell, Horse Proficiency; Maxine Messner, Extemporaneous Public Speaking; Kevin Devine, Public Speaking.

Receiving awards at Friday's banquet were from left: Chris Herr, Barb Herr, Leonard Snader, Dennis Weaver, David Mull, Clifford Horning, and Ron Martin.

Inflation, imitations threaten dairy industry

SYRACUSE, N.Y. — Inflation and imitations as threats to the dairy industry in the 1980's were the subject of several speakers during the 20th anniversary meeting of the American Dairy Association and Dairy Council in Syracuse last Tuesday and Wednesday.

About 150 members of the ADA&DC representing some 22,000 dairy producers in the Federal Order 2 areas of New York, New Jersey and Pennsylvania re-elected as officers for a 1-year term: Ronald Harris, Stanley, N Y President; Alan Ostrander, Theresa, N.Y , Vice-President; Eugene Brace, West Winfield, N.Y., Secretary; and Reed Burman, Thompson, Pa , Treasurer.

Utica farm broadcaster Edwin L. Slusarczyk was presented the third annual Service to Dairying Award Tuesday night at the annual dinner Slusarczyk is host of his own Farm and Home Show on WTLB and WTLB-FM, Utica, and President and General Manager of the AG Radio Net

He also serves on the President's Agriculture and Food Commission and on the Advisory Board of the New York State Fair.

New York State Commissioner of Agriculture and Markets, J. Roger Barber, was keynote speaker at the annual dinner, speaking on "The role of the New York State Farmer in the 1980's "

Barber pointed out the current energy crisis has made it necessary for all farmers, consumers, and government agencies to determine where and how to make the best use of New York State resources.

"With added costs of transportation to bring out-of-state food products into the Northeast, there is more incentive for New York's farmers to supply the food nearer to the consumer."

John W. Sliter, executive vice president, United Dairy Industry Association, headquartered in Chicago, and former General Manager of ADA&DC in Syracuse, expressed concern that imitation products have made inroads into the milk market and called for nation-wide cooperation to aggressively compete with the high advertising budgets of the competitor's imitation products, which have taken away the equivalent production of 5000 milk farmers a year

Robert S. Turner, ADA&DC General Manager, in his Manager's Report to the membership, reported that the Association represents 22,000 dairymen who produce over 12 billion lbs. of milk. The $4.6 million budget for 1980 goes 42 percent in local market advertising and sales promotion, 23.3 percent in local market nutrition education, 24.1 percent to UDIA Programs, 5.6 percent to Consumer/Industry relations, 1.9 percent in producer information and 3.1 percent to administration.

Turner compared these figures to the $28.9 million spent in New York by carbonated drinks and explained that inflation has eroded ADA&DC's ability to promote milk effectively in competition with other beverages and asked for support to increase the mandatory investment for milk promotion.

Also on the program of two-day meetings was a panel of speakers from UDIA and the ADA&DC ad agency reviewing their projected programs for 1980 and the decade ahead.

Attending the ADA&DC 20th annual meeting from Pennsylvania were George Steele, Pocopson, President and Chairman of the Board of Agway, Inc.; Franklin G. Wagner, Sr., Hummelstown, Secretary, and Charles E. Shoop, Halifax, Assistant Secretary and treasurer, both of Eastern Milk Producers.

District representatives were: Willys Hamilton, Millertown, Dist. 16 Director, and Vernard Watkins, Alternate Director; Reed H. Burman, Thompson, District 17 Director, who was reelected association treasurer; Allen Roszel, Montrose, District 17 Committeeman; John C. Krone, Glen Rock, District 18 Director; and from District 19 were Theodore Shuck, Mifflinburg, Director; Robert F. Pardoe, Milton, District 19 Committeeman; and Leon M. Musser, Lewisburg, Committeeman.

USDA kicks in $100,000 for Eastern Shore beetle blitz

ANNAPOLIS, Md. — The USDA's Animal and Plant Health Inspection Service has given the green light to a joint effort blitz against the Mexican bean beetle on the central and upper Eastern Shore of Maryland. APHIS has agreed to back the project with approximatey $100,000 in funds.

The project, utilizing parasitic wasps which destroy the Mexican bean beetle larvae by laying eggs in them, is to be carried out by 300 soybean growers in Kent, Queen Anne's, Caroline, Talbot and Dorchester counties through the efforts of APHIS, the Maryland Department of Agriculture's Plant Protection Section and the Maryland Cooperative Extension Service.

County agents are now signing up growers who agree to plant full season soybeans and provide a 'nurse plot' for parasite rearing on their farms.

According to William F. Gimpel, Jr., who is spearheading the project for MDA, "Mexican bean bettles are the number one insect pest of soybeans in Maryland and the Mid-Atlantic states. For several years MDA and the Extension Service have been using bean beetle parasites to combat the pest in Maryland.

"1979 was a season in which the cool, wet weather was good for a buildup of high populations of Mexican bean beetle and we expect potentially large numbers of the pest in the 1980 season.

"Therefore, for 1980 we have planned a massive demonstration project employing several new techniques to meet this challenge and prove that the parasites, if employed with proper timing, numbers and skillful management, can do the job of holding bean beetle populations in check and thus prevent serious damage to the crop and heavy yield losses to soybean growers.

"Our efforts in Maryland are part of a regional project that will involve soybean growers not only in Maryland, but in Delaware, New Jersey and Virginia as well...all states in which the Mexican bean beetle is the major insect pest of soybeans.

"Results of the demonstration project will affect decisions by APHIS whether or not to release the parasites in at least 11 other states," Mr. Gimpel said.

Here's how the project works on the farm: farmers who plan to grow full season soybeans this year contact their county agricultural extension agent and sign up for the program.

They agree to allow a one-eighth acre 'nurse plot' to be established on their farms adjacent to soybean fields. The nurse plot is planted very early to snap beans which attract the adult Mexican bean beetles coming out of hibernation.

Parasites are then released to attack this first infestation of bean beetles and build up heavy population levels. The large population of new parasites then spreads out in the nearby soybean fields which by that time are subject to attack by the second and later generations of bean beetles.

Thanks to large numbers of parasites, the bean beetle never get a chance to build up to levels that will cause heavy damage to the valuable soybeans.

Farmers in Kent County interested in the program are asked to contact Agent James Milliken (301/778-1661); in Queen Anne's County, Agent Paul Gunther 301/758-0166; in Caroline County, Agent Robert Rouse (301/479-0990); in Talbot County, Agent Donald Osburn (301/822-1244) and in Dorchester County, Agent Ronald Wade 301/228-8800.

Chester Co. PFA to hold annual meeting

LIONVILLE — The Chester County Pennsylvania Farmers Association will hold their annual banquet on Thursday, March 27.

The annual event will get started at 7 p.m. and will be held at the Holiday Inn at Lionville

Joan Schmidt, the information director for the association, announced *Clifford Jones, Secretary of* the Department of Environmental Resources, will be the main speaker.

The cost of the banquet will be $7.75 per person, and advanced registrations should be made by March 20. Tickets can be purchased from Tom Wilkinson, 215/274-8171, or Janet Robinson, 717/529-2508, or any respective board member.

Human hair grows about an inch in ten weeks.

Ladies Have You Heard?

By Susan Doyle

Lancaster Home Economist

NEW DIETARY GUIDELINES RELEASED

Eat a variety of foods; maintain ideal weight; avoid too much fat, saturated fat and cholesterol; eat foods with adequate starch and fiber; avoid too much sugar; avoid too much sodium; if you drink alcohol do so in moderation.

These seven guidelines, if followed, could improve American eating habits and help maintain health.

The guidelines were recently announced by the U.S. Department of Agriculture and the Department of Health, Education and Welfare, and are based on a consensus by scientists in the government's health and food agencies.

There is no one ideal diet or nutritional insurance policy that will keep everyone healthy. What we have here are general recommendations, which can help consumers make intelligent and informed choices from a variety of foods.

The new guidelines booklet, "Nutrition and Your Health: Dietary Guidelines for Americans," contains details and explanations of what is know about specific dietary components such as fat, sugar, sodium and cholesterol, to specific diseases and physical conditions.

To get a free copy of the booklet write to the Office of Governmental and Public Affairs, U.S. Department of Agriculture, Washington, D.C. 20250.

POTATO PIONEERS

Many consumers wonder what kinds of potatoes are best for different uses. Three basic groups of potatoes are found on the market this time of year–long, oval russets, round reds and round whites.

Generally, the long oval-shaped potatoes with a coarse brown skin–often referred to as russets–turn out dry and mealy in texture when cooked. This is due largely to high content of dry matter. They have little moisture and, therefore, absorb more butter or other dressings. This makes them desirable for baking although some people prefer them for mashing as well. Potatoes with high dry matter also make good french fries and chips.

The round red varieties are more waxy in texture after cooking and are dependable boilers. They hold their shape well for cutting into slices for salads or home fries.

The round white varieties are more difficult to categorize because there are so many different ones.

New or early season potatoes with their characteristic thin, feathery skins, are usually boiled. Try different varieties for different uses.

SIGN YOUR WORK

If you are an amateur artist or craftsperson, you should sign and date all your work, no matter what it is.

Most people sign, or at least initial, paintings, but they often neglect to identify other works as their own. Yet countless hours go into the making of a quilt, or a ceramic pot or a piece of silver jewelry and most of us hope our work will be handed down to future generations.

The way you sign your work should be compatible with the work itself. For example, functional items usually have signatures hidden or worked into the design. The signature should be in proportion to the size of the object. A tiny piece of metal work requires a tiny signature.

A signature could be embossed in the bottom of a piece of woodenware. A stamp may be most appropriate for metal work.

A quilt or braided rug may require the craftsperson to embroider the signature and date onto a small piece of cloth and stitch it to the underside of the item.

Clothing Council meets

FLEMINGTON, N.J. — The Hunterdon County Clothing Council sponsored a very informative clothing judging workshop here at the Extension Center.

Following an introductory discussion period, the workshop was divided into two groups. In the group for clothing members who will be judged this year, questions were answered on the qualities that the garments will be judged on. The other group, led by experienced judges, reviewed judging procedures for potential judges.

The Milk Check

TOM JURCHAK
County Agent

Beeferendum Butchered

Beef producers locally and nationally spoke loud and clear in their opposition to the Beef Research and Information Order.

It was a question of a minority deciding the issue for everyone. But of those who registered to vote and were eligible to do the decision making, they were overwhelmingly against it.

In Pennsylvania, far less than half of the eligible producers bothered to register. With only 8,977 farmers registered, - only 10 percent were in favor of the order.

Nationally there were only 231,032 ballots cast, again a minority of the farmers eligible, but only 35 percent voted in favor of the order.

That was far from the 50 percent of the voters required for adoption of the order. That was even worse than the 56 percnt of the voters who favored an order back in 1977 when the legislation required two thirds of the voters to get adoption.

It was certainly a giant step backwards in an industry that provides, by its own admission, the lowest percent of the sales for promotion of any group of producers selling unprocessed products to consumers. But apparently that's the way they want it because it was mostly those who were against the order who bothered to register. Those who were for it but not registered didn't get counted.

Beef producers as a group have traditionally been the most independent of anything that even hints of government assistance. While this program was planned to be financed and managed by producers, the fact that the referendum was conducted by the USDA and was to be operated with the "advice" of USDA may have been the important factor in its defeat

Let's see what the Monday morning quarterbacks come up with next month.

Overwhelming

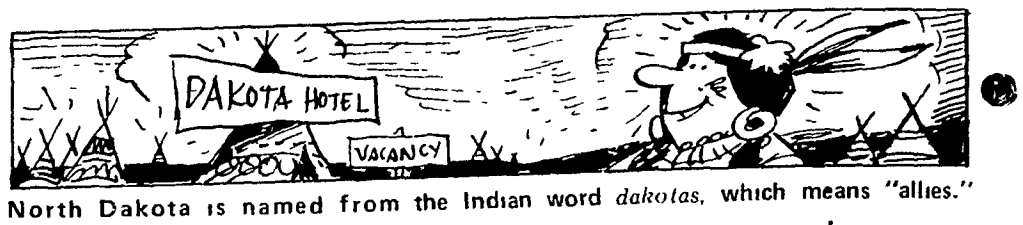
If the beef producers were something less than enthusiastic about a · beef research and education order, dairymen were overwhelming in their response to the USDA request for comments on the need for a hearing on the proposals of the Community Nutrition Institute to deregulate powder used to make reconstituted milk in Federal Orders.

According to Pat Healy of the National Milk Producers Federation in Washington over 10,000 pieces of mail had been received by USDA, with 90 percent of the letters indicating opposition to taking even that first step of opening a hearing on the question. He said the response was unprecedented in his experience, and the bureaucrats and congressmen were certainly impressed with the dairy industry's vigor in opposition to the hearing.

However, no one knows yet whether the flood of mail is sufficent to turn the tide and cancel the hearing because the decision has become a political issue and there aren't any precedents to follow.

So, if you haven't written your letter yet and want to make a contribution to the effort there is still time. Even though the February 29 deadline, set by USDA has passed, there is still an opportunity to make an impact in the White House and the Congress so send your comments there.

It isn't likely that anything will be done at least before April 1 when the new support price is announced But even that date is not a deadline so just get it done before you get all wrapped up in field work when warm weather comes to stay.



North Dakota is named from the Indian word *dakotas*, which means "allies."

PROLASSE® 8%
ALL NATURAL PROTEIN

SAVE MONEY ON FEED COSTS
USE MORE HOME GROWN GRAIN

Increase production and feed intake with a more palatable ration made with liquid ProLasse on your own farm.

Now for the first time there is a liquid molasses that can be applied with inexpensive metering equipment and any P.T.O. mixer.

New ProLasse's exclusive patented formulation controls the dispersal and penetration of the liquid and assures uniform mixing with no particle segregation. ProLasse also helps prevent molding when using ear corn or other grain with too high a moisture content. Pro Lasse also contains a stable guaranteed vitamin and mineral package.

Only a small amount of liquid ProLasse is needed to make a sweet feed that is not sticky and will flow freely in Automatic Feeding Systems without bridging.

Sold and distributed by your local feed dealer, mobile grinder mixer operator or liquid supplement dealer.

Bradford County dairy princess: She's a natural

BY JANE BRESEE
Staff Correspondent

TROY — Penny Allen, Bradford County Dairy Princess, has more ideas about how to promote milk than cats have kittens

Her latest idea originated last summer when she heard that the Citizens and Northern Bank was planning to renovate the old Troy Civic Building, built in 1894 to be a courthouse, and use it for a branch bank.

"Wouldn't it be nice," she suggested to her mother", if we could have a Dairy Week there right after it opens?"

Mrs. Neva Allen, Penny's mother, who is just as enthusiastic about the dairy industry as Penny is, agreed to pursue the idea After bank officials approved, Mrs Allen organized the week long event scheduling different women associated with dairying to help her.

The Grand Opening of the bank was Saturday, March 1, the coldest day of the year Cold or not, Penny was there, and was privileged to cut the ribbon for the opening ceremony while several bank and civic dignitaries looked on.

Penny Allen, Bradford County's Dairy Princess, thought up some unique promotion ideas, including a week-long Dairy Week held earlier this month.

Over 2000 people toured the restored building that day.

On the following Monday, Dairy Week at the bank began as planned. Mrs. Allen and her crew served free milk, punch, cheese, and crackers, all donated by local businesses Penny took her turn everyday after school.

Dairy princesses from Tioga and Sullivan Counties joined Penny on Friday evening from 4 until 8 p.m. to climax the Dairy Week.

Penny had another novel promotional idea, too. After seeing farmers wearing hats at the Troy Fair with patches advertising everything from farm equipment to soft drinks, she determined that "milk" could and should be on patches, too.

She talked to the local Silk Label Plant in Troy and they designed a 2 by 2 inch patch reading "Milk's The 1". She has sold nearly 2000 so far and has a few left. They can be obtained by sending a dollar to her at Granville Summit, Penna 16926.

Pretty, petite, blond Penny, named Miss Congeniality at the state Dairy Princess pagaent, has always been in love with the farm since she started following her dad to the barn soon after she learned to walk.

Today she helps with the milk of 100 Holsteins and feeds the calves She owns three Holstein cows, one heifer, and four calves.

Her dad, Charles, can surely use her help for the farm has a total of 1100 acres, of which 800 are tillable In addition to the dairy herd which averages 17,147 pounds of milk and 603 pounds of butterfat, there are beef cattle, sheep, and hogs.

During her reign, Penny has travelled nearly 5000 miles, spoken to more than 20 groups, been in 11 parades, prepared more than 20 radio tapes, and handed out over 5500 promotional materials including recipes. Her next speaking engagement is at a local Rotary Club.

Along with all that she still finds time to sing in the church choir at her local church at Bailey's Cornors, playes the piano, and is a substitute Sunday School teacher.

In June she will graduate from Troy High School and is anticipating entering the nursing program at the Arnot Ogden Nursing School of Nursing, Elmira, N.Y. in the fall.

Asked if she would like to marry a farmer some day, Penny replied, "Yes, I would, if I can find one as nice as my dad."

Martin of Agri-Equipment, Inc., R4 Ephrata, PA, received an appreciation certificate from Chore-Time Equipment, Inc., Milford, Indiana, for serving on the company's 1979 Distributor Advisory Committee. Presenting the certificate at Chore-Time's sales meeting in South Bend, Indiana, is Forrest Ramser, right, Senior Vice President of Chore-Time.

Level-action discs from John Deere

Nine John Deere Level-Action disks with many weight and width combinations are being offered to area farmers. The 200 and 300 Series Disks feature an exclusive new Dura-Flex gang bearing as standard equipment. This bearing has three extra-long flexible lips (see photo) that maintain contact with the inner race of the bearing yet resist wear.

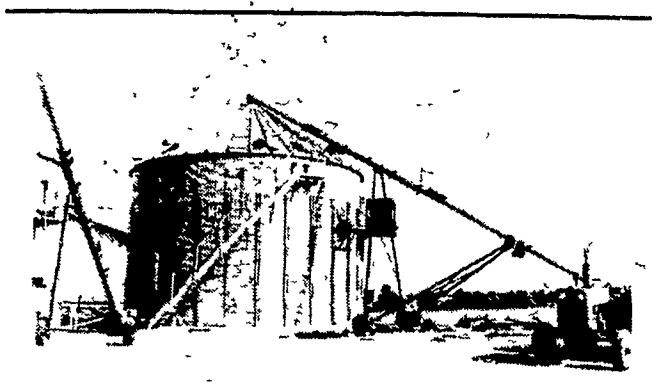
The wide, fourth lipe also works with an extended flange or cast housing to give the bearing extra room to self-align. Bearings are backed with a two-year warranty. This warranty also applies to the bearings on the new 455 Offset Disk.

Another important new feature for farmers in this area is the combination scrapers, new on the 200 series disks You adjust capscrews to change from rigid scrapers in abrasive soils to spring-loaded scrapers in sticky soil. These scrapers are also standard on the 300 series disks.

Two 100 Series Disks are in the 30 to 85 pounds per blade class. The 105 integral and 115 drawn rigid are ideal for preparing seedbeds and chopping light cover. In the popular 75 to 125 pounds per blade weight class, Deere has the 200 Series Disks. The 215 works from 11 feet 5 inches to 15 feet 8 inches. The two and three section 235 disk reaches from 17 feet one inch to 25 feed seven inches. The 215 and 235 are available with 7¼- or 9-inch blades spacings.

The heavyweight 300 Series includes the 315,335, and 375 level-action disks. Each features easy crank leveling, combination scrapers, new bearings with cast housing, heavy-duty gang components, and a choice of nine or eleven blade spacing.

The 315 Rigid comes in widths from 12 feet 2 inches to 15 feed 8 inches. Weight per blade range is 120 to 150 pounds.



This continuous in-bin dryer from the Mathews Company has been designed to eliminate the most common problems found in other in-bin dryers currently on the market. In addition, it has proven high capacity results at low per bushel costs, and it has energy-saving features necessary for profitable operations.

Patents are pending on the unique design of the Drybine system. As wet grain enters the top of the bin, it enters the drying section as harvested with no need for a wet holding bin. The upper drying chamber holds up to 2250 bushels of wet grain at a depth of up to four feet. Every seven minutes a continuous flow auger makes a complete revolution around the upper drying floor, drawing the dried grain into the lower cooling chamber. Outside air is drawn in at the bottom of the cooling chamber. As the cool air comes in contact with the dried grain, the air increases in temperature and rises, helping to dry the grain on the upper level.

The bin has a drying capacity of 355 bushels an hour. The drying process is fast, while the cooling process is slow, eliminating stress cracks and damage caused by fast cooling. The process is very similar to dryeration.

For more information and early season discounts contact: Hershey Equipment Co., Inc., Lancaster, Pa. or, contact Mathews Company, Box 70, Crystal Lake, Illinois 60014.

CHEESE

A SERVICE FOR THE FARMERS OF PENNSYLVANIA WHOSE TIME HAS COME

ENVIRO-C, P.O. Box 49, Middletown, PA 17057

An Open Letter to the Farmers and other Property Owners in Pennsylvania.

Do you feel that you have been unjustly exploited by the public utilities and big business?

Vague or undefined easements across your property for highlines, oil & gas pipelines, underground cables etc. Unfair crop damage settlements, loss of use of your land during construction or repair of facilities.

Loss of precious top soil, the loss of which is not taken into account by either the utility or the contractor on the job. Fouling of streams and water ways by failure of the contractor to meet specifications set up by the Department of Environmental Resources.

Damage claims that are costly and important to you, but in most cases to small to be profitable to turn over to an attorney.

Contact Enviro-C land management-equitable damage settlement, - equitable fee for handling your claims from beginning of work till settlement.

Legal consultation included if needed, why be exploited without recourse at a reasonable cost. Contact Enviro-C P.O. Box 49, Middletown, Pa. 17057 Phone: 717-944-4212

Pa. stores win top honors in national apple promotion contest

BY SHEILA MILLER

CAMP HILL — Several Pennsylvania retail food stores received national recognition for their apple promotion efforts during October, 1979, National Apple Month. Close to seventy-five retail store managers and produce managers attended a special luncheon on Wednesday sponsored by the Pennsylvania Apple Marketing Board, at which time they received their winning plaques.

George Grubb, of Giant Food Stores, Inc., Carlisle, accepted the first place national honors for a corporate chain or division of chains with fewer than 50 stores. Upon receiving the award, Grubb stated he was not the one who should be standing there, but the 26 produce managers who did all of the work deserve the recognition for winning the top national honors.

Grubb was also awarded the Mid-Atlantic Regional honors plaque at the luncheon held at the Embers.

The Giant Food Stores were one of more than 3,500 stores that participated in the Greenthumber competition. These stores represented twenty states in the national contest.

A spokesman for the National Apple Month Board said that the contest provides an incentive for apple promotion, along with recognizing the managers doing good jobs, all with a healthy, friendly competition between managers, chain stores, and states.

The judges for the contest are changed every year, he noted. This year's judges were James D. Hall, Fruit & Vegetable Division, Agricultural Marketing Service, USDA; Melissa Mohr, Consumer Marketing Specialist, J. Walter Thompson Co., New York; and Larry Waterfield, Editor for "The Packer".

Another Pennsylvania winner in the corporate chain division of fewer than 50 stores was Market Operators, Inc., Allentown, fourth place in the national contest.

P.A. & S. Small Co., York, took third place in the Greenthumbers national competition for voluntary and cooperative chains or divisions of chains of 50 or more stores. They received second place honors in the Mid-Atlantic Region contest.

Fox's Market, Middletown, won fourth place national honors as an independent store. In the Mid-Atlantic Region, Fox's came in first place for their apple promotion entry.

These markets and stores were recognized, along with others throughout the U.S.

(Turn to Page D3)

George Grubb, center, Giant Food Stores, Inc. of Carlisle, accepts the first place national honors for apple promotion in the category of chains with fewer than 50 stores. Making the presentation are John Rice, right, and Glenn Shaw of the Pa. Apple Marketing Board.

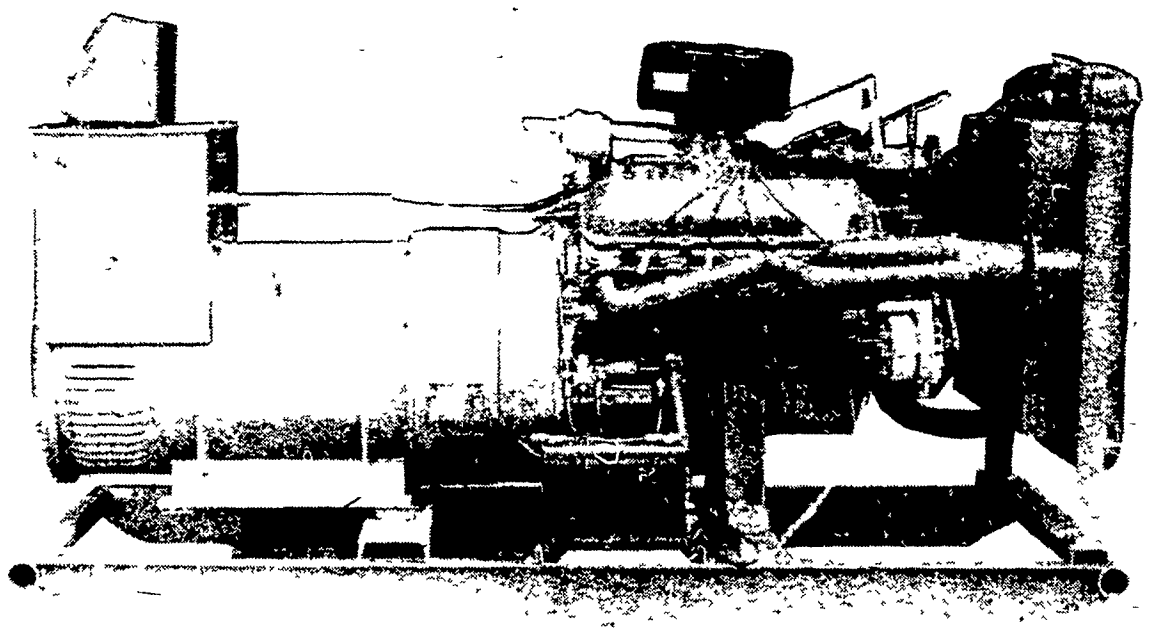
AUTOMATIC GENERATORS

MAXI-POWER NOW HAS GENERATORS THAT ARE WOUND SINGLE PHASE FOR HARD STARTING MOTORS

MAXI POWER

IDEAL FOR: CHICKEN, HOG or VEAL OPERATIONS



WHAT ARE THE ADVANTAGES?

★ Put all your winding to work for you
★ 50% more single phase motor starting ability
★ Built in voltage - frequency built up characteristics
★ Generator is always balanced
★ Inherent voltage regulation
★ Voltage regulator is maintenance free compared to solid state regulators
★ Will start 1 hp per kw class F motors
★ Frequency is always balanced versus 3 phase units used on single phase, with no problem on solid state dimmers, etc.

Pa. stores win

(Continued from Page D2)

for their efforts in providing the consumer with the 7 billion pounds of apples eaten each year. The "Know Your Apples" promotion is one way the Pa. Apple Market Board is trying to assist the local stores to sell more Pennsylvania apples.

Accordng to a PDA official, at the present time there are approximately one million bushels of apples in storage in the state, with about 383,000 bushels of Red Delicious, 334,000 bushels of Rome Beauty, 304,000 bushels of Golden Delicious, 83,000 bushels of Stayman, and 42,000 bushels of Jonathan.

George Peters, of Mountain Orchard Co-op addressed the group, and encouraged the produce buyers to inform their customers the russet "beauty marks" on the Golden Delicious apples are the result of the apple having less natural wax than others. Any abrasive weather, harsh sun or too much moisture, causes the coarse lenticel, he added.

"If the produce buyers continue to be innovative and accept the opportunity and challenges of marketing these Pennsylvania apples, the customers will soon be satisfied with the way the apple eats rather than the way it looks," he concluded.

Fox's Market, Middletown, receives their fourth place national award and first place regional award for independent stores. Pictured are, from left, Glenn Shaw, AMB; Bill Fox, owner; Harry Myers, produce manager; and John Rice, AMB.

Accepting third honors in the national Greenthumber contest for chains of 50 or more stores is Larry McWilliams, P.A. & S. Small, center, York, also the second place regional winner.

USDA licenses vaccine for East Coast disease

NEW YORK, N.Y. — A vaccine has been licensed by the U.S. Department of Agriculture for the prevention of a canine disease that has recently broken out in New York City and all along the Eastern seaboard.

Dellon Laboratories of Omaha, Neb., was issued the first such license to produce and distribute a vaccine for canine parvovirus.

According to Pierre A. Chaloux, deputy administrator of the USDA's Animal and Plant Health Inspection Service, parovirus infections in dogs are usually characterized by severe diarrhea, dehydration, loss of appetite, vomiting, high temperature and a low white blood cell count.

Canine parvovirus is contagious and is usually spread quickly in dog colonies, kennels and places were dog-to-dog contact is prevalent. It is often spread by ingestion of dog feces.

The infection, which was unknown until the latter part of 1978, has been reported in all areas of the U.S.

Despite encouraging domestic scenes, fertilizer costs may remain high

LITITZ — A relatively gentle winter is one of the major factors in a brighter than usual outlook for fertilizer availability.

Farmers generally will be more cautious about over-fertilization of crops this year, tending to maintain or even draw against the bank of fertilizer which has been built up in past years.

Both factors should serve to aid production and ease demand.

On the other side of the scorecard is USDA's projected 40 million ton drawdown in world grain supplies for the coming crop year.

This translates into greater demand for U.S. grain, presuming this country remains the major grain supplier to world markets.

But early indications are that farmers do not intend to change greatly the number of acres of major crops they will grow in 1979 and it is reasonable to presume fertilization demand will not grow sizably over last year's.

According to the Fertilizer Institute in Washington, D.C., fertilizers available for this Spring will increase about five to eight percent above year ago levels.

Production this year is higher, and so is the net balance from import-export trade.

All nitrogen fertilizers from natural gas for 180 use are synthesized by this time of year. The mild winter allowed many producers to keep plants running rather than closing off production to allow for home and industrial fuel production.

As a result, production of ammonia is up 10 percent over the previous year. Phosphoric acid, the base material for most phosphates, is up seven percent.

Potash production in the U.S., which supplies only about a quarter of domestic needs, was off slightly.

All of that may seem to amount to lower cost fertilizer for 1980. But it just isn't so.

Producer-held inventories of most fertilizers at the end of December were well below last year's levels, so producer-held stocks at that time can not be counted on to provide any big increase in supply over last year.

Since the pipelines need to be refilled, much of the supposed surplus will be eaten up along the supply chain, it seems.

Numbers do no good easing the pain of cost increases, but the Fertilizer Institute offers several statistics to provide background.

In December 1979, prices paid for diammonium phosphate were 2.8 times prices charged in 1970. Ammonia prices increased 2.6 times, muriate of potash, 2.3 times.

Much of the recent jump in fertilizer prices has been blamed on the increased cost of fertilizer production.

Energy costs, not surprisingly, lead the lot.

In 1970, the typical natural gas cost per ton of ammonia was $11; in 1979 it had jumped over six times to $69.

Transportation costs, which account for about 30 percent of the delivered cost of fertilizer to the farmer, also have jumped.

Capital cost, the cost of borrowing money or holding inventory, is contributing to the higher overall cost of fertilizer to the farmer.

The industry figures it costs $7.20 per ton to hold a single ton of fertilizer valued at $180 for the three months between manufacture and delivery. That figure is generated at 16 percent interest.

Another factor tending to maintain higher prices is international demand for and use of fertilizer.

Since fertilizer can be exported freely to most other nations, the relatively local demand factors exhibited in the United States may not be typical of the international outlook.

Any drop in the domestic cost of material will be reflected shortly thereafter in increased foreign demand.

Such demand, the industry says, may pull prices higher in 1980 as it did in the 1973-74 year when orders exceeded supply.

Just how intense the demand pull will be, the industry says, is not readily apparent.

So, despite the encouraging domestic outlook, outside factors probably will keep fertilizer costs at or above current levels.

And any strengthening of demand on the international level likely will send fertilizer costs still higher. — CH

Adams extension visits Harrisburg

The Adams County Cooperative Extension Service Committee recently visited Harrisburg to meet with area legislators for a discussion of Extension functions in the county. Among participants in the third annual State Capital Day program were, from the left, Daniel Winters, Frieda Johnson, Mary Grim, Sen. William Moore, Glenn Slaybaugh Jr. and Daniel Hoffman.

Lancaster extension meets legislators

Members of the Lancaster County Cooperative Extension Service executive committee recently met with area legislators in Harrisburg as part of the third annual Capital Day to discuss Extension accomplishments and needs. Participating, from the left, were Sen. Ralph Hess, Sen. Clarence Manbeck, Carlton Groff, Kirkwood; Sen. Richard Snyder, Rep. Noah W. Wenger, Mark S. Hess, Lancaste; Donald L. Hershey, Manheim; and Rep. Kenneth Brandt.

Mexico inviting bids

WASHINGTON, D.C. — Mexico has invited bids for the sale of 10,000 tons of U.S. rice, 90,000 tons of U.S. soybeans, 25,000 tons of U.S. cottonseed, and 80,000 tons of U.S. corn and/or sorghum for delivery to Mexico during the first half of 1980, according to Fred Welz, acting general sales manager of the U S. Department of Agriculture's Foreign Agricultural Service.

Welz said bids are to cover corn and/or sorghum shipments of 20,000 tons monthly for March through June delivery; rice shipments are to be in April, and soybeans and cottonseed are for March 15 to April 15 delivery.

"The purchase of each of these commodities, except cottonseed, is included in the mid-January agreement between the two countries," said Welz.

Inquiries should be directed to Alfredo Gutierrez Kirchner, Trade Office, Embassy of Mexico, 1101 15th Street, N.W., Suite 507, Washington, D.C 20005, telephone 202/785-3214.

WAXY-CORN
CONTRACTS!

We still have plenty of waxy-seed available for the grain farmers and also Waxy Hybrids are great for cattle and hog feeders. In this area they should plant WAXY—MAIZ Hybrid seed-corn. College feeding trials show 10% better gains on 7% less corn with WAXY fed to cattle. We have several WAXY-MAIZ Hybrids for this area. They yield the same as yellow dent corn, but have higher energy starch. Hogs gain better and get to market faster on WAXY-MAIZ. We can show you how to boost cattle and hog feeding profits.

The stirrup historians believe was invented during the Dark Ages.

Regular tractor pull winner trys his hand at waxy corn

RINGOES, N.J. — For a number of Lancaster Farming readers, there's little new when they see R. Gregory Manners enter Pennsylvania and New Jersey tractor pulls with his special Case 830. He usually does well.

But most fans would be surprised to see the significant farming changes he and his father, Robert M. Manners, have made at home where that twin-engine 900-horsepower "thundermaker" recharges between competitions.

They live at Terraceland, a showplace farm near Ringoes in Hunterdon County, N.J., where they milked 100 head of Holsteins until they were sold last March. Now they feed 70 head -- about half replacement heifers, half to be sold as beef. The dairy is closed and they're now enthusiastic crop growers.

"When we decided to quit dairying, we crossbred Holsteins with Herefords to get black, white-faced beef animals that have desirable size and temperament," Gregory explains.

Although they were giving increased attention to their corn production, for feed, it was urban problems that triggered the switch. Chronically short of labor, they had finally lined up two helpers who planned to live with their families in separate parts of a large house Robert owns in nearby Wertsville. But the township adjustment board turned down multi-family dwellings.

Then across the lane from Terraceland, a farm was subdivided into 10-acre plots for $200,000 homes of commuters.

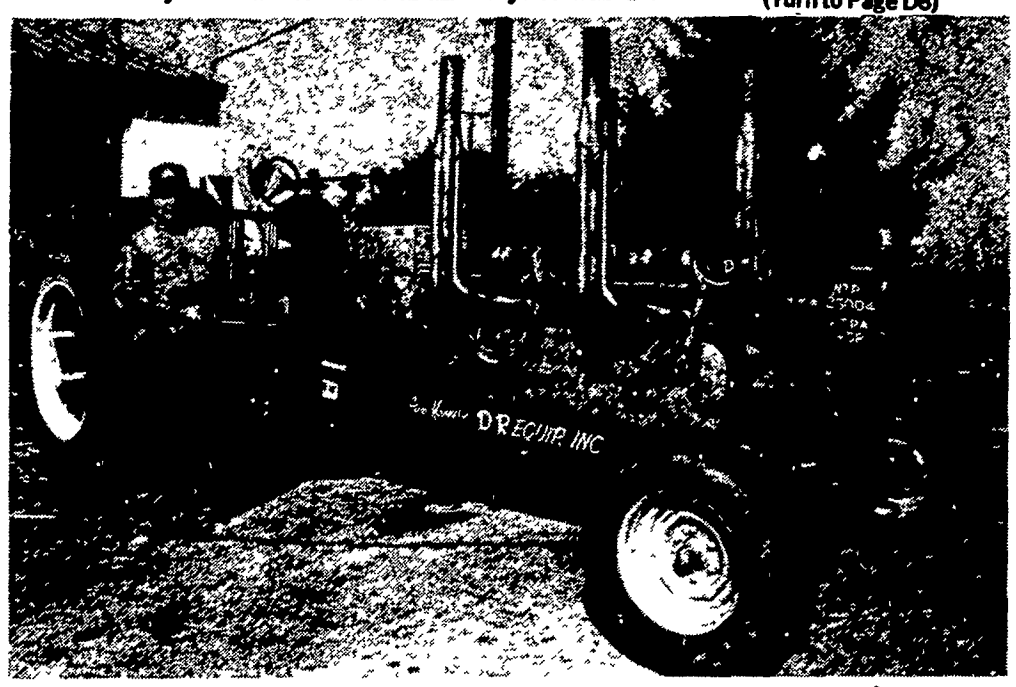
A few years earlier, affluent city dwellers who unsuccessfully tried to establish money-making hobby farms in the area, told the Manners: "We just love your countryside but can't something be done about the machinery noise at night, and the barn smells?"

So last spring the Manners increased corn plantings to 400 acres, including 100 of waxy. They planted 100 acres of soybeans and also baled 200 acres of timothy and alfalfa hay. It was the first time they'd tried waxy corn and it caused them to take "The Wall Street Journal."

"Our waxy corn is grown under contract with A.E. Staley Co., Morrisville, Pa., for cooking oils designed for TV dinners that must be cooked, frozen, and reheated," Gregory says.

"They pay a 35-cent premium over Chicago

(Turn to Page D8)



Trophy big enough to honor New Jersey's best tractor puller in his class for 1979 is hefted by R. Gregory Manners. In competition, he doesn't seem to notice the roar of his own 900-horsepower "thundermaker." But he claims working near other tractors at indoor meets can be uncomfortable without ear protection.

Son and father, R. Gregory and Robert M. Manners of Ringoes, Hunterdon County, N.J., devote much of their time to crops farming these days.

Tractor puller

(Continued from Page D7)

March Board of Trade futures, so we follow that in the WSJ. We dry the corn at less than 160 degrees F. and store it apart from our regular corn on the farm until they call for portions or all of it.

"Regardless of delivery date, and even afterward, we can phone Staley any day and take the current futures level plus premium. If we wait until March 1, we automatically get that day's price plus premium."

Staley also pays for seed and lets growers choose the variety. The Manners made 102 bushels an acre with Trojan WTXS115, despite rain that stressed early plantings, washed out fertilizer and herbicides, and packed the ground until footprints never showed.

"For comparison, yields were similar from four regular varieties of Trojan corn in the same 105-120 day maturity range," says Gregory. "The best one, T1120 (a 112-day hybrid), was filled to the ear tip with deep kernels for yield and small cobs for fast drydown. That's what we need."

After filling their silo and silage pit, the Manners sell their regular corn to Staley, or the Agway feed mill at Bordentown, N.J., or for export in Philadelphia.

Dryer setting of 220 degrees F for regular corn must be reset below 160 degrees when R. Gregory Manners dries waxy corn.

They put up 28,000 bales of hay, an increase of 3000 over last year.

"That rain hurt the corn but helped the alfalfa," Gregory says.

On their first sizeable try, they also harvested more than 40 bushels per acre of soybeans, for export at Philadelphia.

"Our best variety yielded near 50 bushels. On my Uncle Ken Manners' 200 acres near Terraceland the same blend, Pfizer Genetics CB390, produced one plant with 87 filled pods, but before he thought to save it his pet goat ate the plant."

The Manners bought a floating cutter bar so their White 8600 combine can handle both corn and soybeans. Corn harvest begins in late September as an equipment and procedure shakedown. Ear moisture of 32 per cent is somewhat

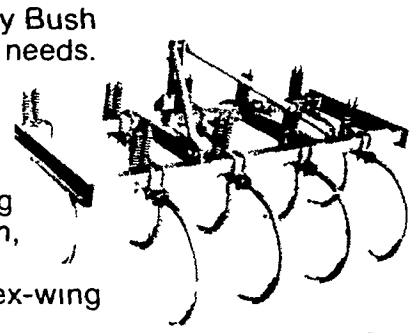
SEE HOW THEY RUN!

When you see how Bush Hog® tillage implements run and the quality jobs they produce, you'll be convinced **you** need Bush Hog! Thousands of farmers already know why Bush Hog has a reputation for quality, rugged engineering and top performance. The Bush Hog offset and tandem disc harrows, chisel plows, V-plows, field and row crop cultivators in operation on their farms prove themselves season after season

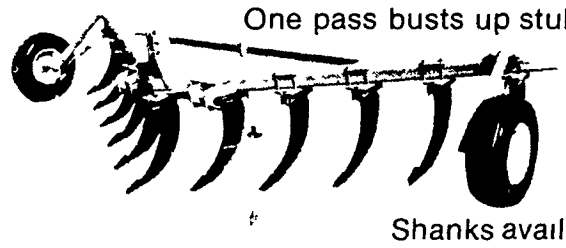
See for yourself how Bush Hog tillage implements run on neighboring farms or ask your dealer for a demonstration. When you do, you'll know why Bush Hog is the answer to all your tillage needs.

CHISEL PLOW



Chisel action leaves top residue to protect against wind and water erosion while mixing and loosening soil for greater moisture absorption, faster growth. Available in two and three-bar, lift and pull, rigid and flex-wing types, 5' to 30' widths.

V-PLOW



One pass busts up stubborn hardpan and opens the way for increased yields. Available in 3 to 11 shanks for 60 to 175 HP Exclusive Bush Hog shank pulls easier to plow more acres with less fuel Shanks available in 26" or 32" lengths

MODEL 245 Here's 12' to 18'6" of penetrating power in a rigid, offset harrow Available in standard, heavy and extra-heavy models for 95 to 150 HP

Tractor puller

(Continued from Page D8)

offset by the warm air, reducing drying time. The dryer runs on propane costing 47 to 55 cents a gallon.

Soybean harvest interrupts when the beans reach 15 per cent moisture. Outdoor air is blown over them in the bin for drying. Then corn is finished by about Thanksgiving, with moisture around 20 per cent

The care top dairymen always give their herds now is directed by the Manners to their hilly, clay loam cropland, which is broken into 10 parcels

Regardless whether regular or waxy corn is planned for a spot, they get ready in spring by plowing down 500 pounds per acre of 27-9-17 fertilizer About half the land is moldboard plowed, especially where they're rotating from hay or soybeans. For speed, about half is chisel plowed.

"A couple of rocky fields are left in no-till, particularly where we take hay off early," Gregory says. "With fuel prices soaring, we may use more no till in fields without grass problems. Other fields require harrowing or a cultimulcher so that later at planting we'll be able to incorporate Aatrex and Sutan herbicides with a disk."

That tank mix is carried in a couple 210-gallon saddle tanks alongside their tractor At planting they add starter fertilizer -- 200 pounds per acre of 7-27-11 plus some micronutrients -- in a channel two inches down and two inches to one side of the seed row. For rootworm, they spread Dyfonate at planting in a seven-inch band over the row.

They plant 21,900 seeds an acre in 38-inch rows "If wet spots don't emerge with conventional planting, we replant no till," Gregory points out. "It saves ripping it up again. When we plant no till, we add 1000 pounds of tractors weights to the planter for more muscle in punching through the trash"

Of course, weights and tractors are what first brought him to the attention of many neighbors

In four years, he's won 70 trophies with two alcohol-fuel-injected, 400-cubic-inch Dodge engines mounted on a Case 830 transmission and rear end. He's received top awards in Pennsylvania and New Jersey.

But his main arena is the Buck, Pa., Tractor Pull where he runs every Saturday night of the May-September circuit.

Three of the four years he's competed there, he's been the first, second, or third total-point leader in the 7000-pound modified and 9000-point open classes.

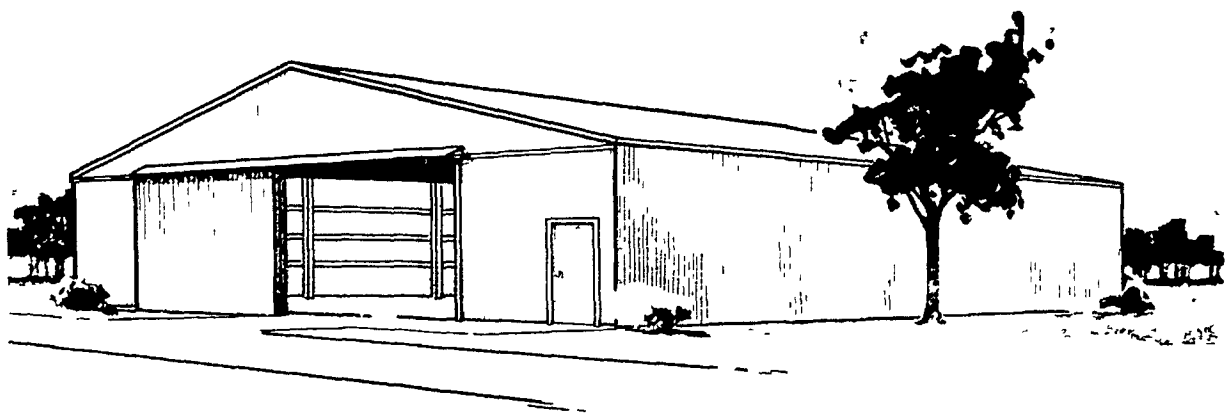
AGWAY

Agricultural Buildings

Built to your order for profit-minded efficiency



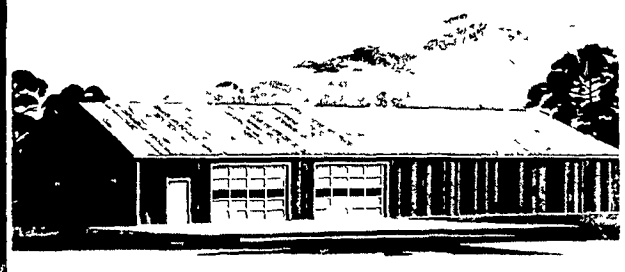
Features:

- Pressure-treated Koppers Columns
- Super Temper Rib Alcoa Aluminum Roofing
- Pre-painted Republic Rigid Rib Steel Siding available in your choice of 4 colors
- Kwik Frame & Pre-hung Aluminum Clad Passdoors by HNP
- Key-hole door track with painted cover by Starline
- Constructed for 30 PSF total load.

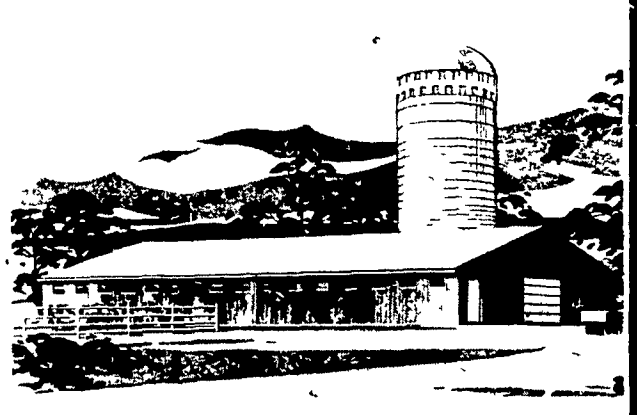
An Agway building means this to you:

- Economy
- Fast Erection
- Durable Protection

Agway free stall barn engineered for expansion



Agway utility building
versatile on-farm storage



Agway confinement barn
for individual cow attention

Order 4 price $14.13 for April

ALEXANDRIA, VA — Middle Atlantic Order Market Administrator Joseph D. Shine Wednesday announced a Class I milk price of $14.13 per hundredweight for April 1980.

This price is two cents below the March price, but up 83 cents from last April. Order No. 4 prices are announced for milk testing 3.5 percent butterfat, f.o.b. plants located within 55 miles of Philadelphia, and also within 75 miles from the nearer of Washington, DC or Baltimore, MD.

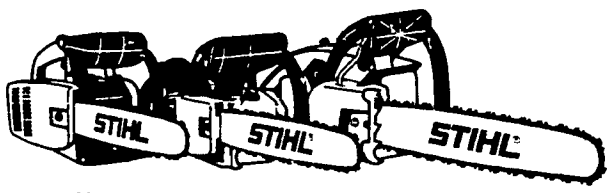
There is also a 6-cent direct-delivery differential applicable to producer milk received at plants located within 55 miles of Philadelphia.

Shine announced a Class II milk price of $11.39 per hundredweight for February 1980 and a butterfat differential of 15.0 cents for the month. The Class II milk price was down three cents from the previous month while the butterfat differential did not change.

These class prices are based on the February 1980 Minnesota-Wisconsin manufacturing milk price of $11.35 per hundredweight adjusted to a 3.5 percent butterfat content.

The USDA reported the wholesale price of Grade A butter at Chicago for February was $1.3028 per pound and the nonfat dry milk price was $.8378 per pound, f.o.b. plants in the Chicago area.

WE SELL THE WORLD'S LARGEST SELLING CHAIN SAW.



Model 015L Model 020AVP Model 031AV with Quickstop®

Stihl® didn't get to be the world's largest selling chain saw with a product that needs more service than it gives. But if your Stihl saw ever needs a tune-up maybe a spark plug or just a once-over, the best factory trained service-men in the business are here to help. Come by and see the world's finest chain saw. Or come by for repairs on all the others.

WE FIX ALL THE OTHERS.

BEDDING CHOPPER

For a free demonstration, contact us.

Wic INC

Canadian Patent 1037839
U S Patent 4142686

The Wic bedding chopper chops straw, hay or corn fodder and spreads it uniformly under your cows, all in a single operation. When you use chopped bedding, you save on straw and your cows stay much cleaner On top of that, cleaning up is a breeze

The only bedding chopper supplied with a mechanism permitting 3 different cutting lengths Available with either a 5hp or 7hp gas operated Honda motor, a 24 volt electric (battery operated) motor, or a 230 volt electric motor For a sales concession or the purchase of a machine, contact your local dealer.

FEATURES:

Motor	Gas 5 HP 7 HP, 4 stroke, Electric, 3 HP Battery
Frame	Steel
Emptying	6' to 8'
Wheels	16" diameter pneumatic
Capacity	1-bale/minute
Dimensions	31" width — 50" length
Weight	460 lb
Guarantee	One year on all parts except blades

SAVES:
★ TIME ★ MONEY
★ LABOR
• Simple to run
• Highly Efficient
• Easily Handled

Horse-management institute set

FLEMINGTON, N.J. — A three-evening series on horse management has been scheduled by the New Jersey extension service to begin Tuesday, March 18, 8:00 p.m. in Hunterdon's Extension Center, north of Flemington, reports Calvin Wettstein, county agricultural agent.

The course outlined includes: Session I, March 18 - Equine Nutrition, Dr. C. M. Reitnour, University of Delaware; Session 2, March 25 - Trail Riding, Mrs. Violet Griffin and Miss Eileen Mollineaux, N.J. Horse Council Trail Committee; Session 3 - Breeding and Reproductive Physiology, Ms. Karyn Malinowski, Cook College Horse Specialist.

Identical programs will be offered by the Extension Service in Hackettstown on succeeding nights: March 19, 26 and April 2.

In addition to the course there will be a 4-farm bus tour on Saturday, April 12, 9:30 a.m. to 3:15 p.m. Registration for the 3-class series is $5; Tour only - $7.50; combination class and tour $10

County Extension Services in Sussex, Warren, Morris, Somerset, Hunterdon and Mercer have course descriptions and registration forms. Phone number for Hunterdon's office is 201/788-1339.

CONTROLLED TESTS ON PENNSYLVANIA FARMS PROVE AGRISPON REALLY WORKS!

AGRISPON is a non-toxic, biological soil inoculant that converts nitrogen from the air into nitrate nitrogen in the soil to supply crops with most or all the nitrogen they require for growth and maturation. In addition, AGRISPON multiplies the life in the soil, helps build humus and improves the root structure of plants.

In 1977, the Pennsylvania Fertilizer, Soil Conditioner and Plant Substance Law was passed by the State Legislature. Below is an outline of the results from field tests conducted under actual field conditions by an old and reliable fertilizer company - Growers Chemical Company of Milan, Ohio.

THE ONLY VARIABLE WAS AGRISPON. TESTS WERE RUN BY REAL FARMERS.

AGRISPON may be used as a seed treatment (30¢ per acre) or a soil treatment ($7 per acre) or both. Both ways show positive results. Tests were supervised by Dr. Wilbur Franklin, Research Director, Growers Chemical Corp. Tests were repeated (replicated) many times on each farm and careful records kept at harvest time. For more information about the Growers Program, contact Dr. Franklin at 419-499-2508.

Knouse Food Co-op cited for waste recycling idea

PEACH GLEN — The Pennsylvania Department of Environmental Resources last Friday praised Knouse Food Cooperative, Inc., Peach Glen, Adams County, for its resourcefulness and ingenuity in developing a system of converting apple pomace into useable energy.

Adams County Commissioners were in turn commended for recognizing the need for such a project in meeting today's energy demands and in resolving a serious county waste disposal problem.

These tributes were given by William B. Middendorf, DER deputy secretary for enviornmental protection, as he signed an agreement authorizing a $300,000 grant to Adams County Commissioners to help fund the project.

Speaking for DER Secretary Clifford L. Jones, Middendorf called the proposal "a perfect example of how industrial research and 'know-how' can join with government efforts to help solve environmental problems.

"If this system works, it could be adopted by other food processors to help alleviate a serious waste disposal process while also cutting fossil fuel use," Middendorf said.

"The public knows about the energy crunch but probably does not realize that the management of wet food processing wastes, such as apple pomace, long have been recognized by the industry and government agencies, including DER, as a problem.

"Such waste cannot readily be incorporated in large quantities into a landfill because of its high moisture content and its tendency to ferment and preserve itself by pickling."

He said landfill equipment becomes mired down in landfills receiving large quantities of fruit pomace and that application of such wastes to agricultural lands is limited both by season and by distance of fields from points of waste generation.

The $300,000 DER Solid Waste Resources Recovery Act demonstration grant to the Adams County Commissioners, as the responsible municipal agency, will be used by Knouse Food towards a $2 million energy-recovery system at its Ortanna food processing plant.

The money will go towards the pomace-drying phase, the second stage of the three-step pilot which the firm hopes will cut its fossil fuel use at the plant by up to 90 per cent.

Middendorf commended the company for spending $750,000 of its own money for the project's initial stage and for contributing more then 65 per cent of the $880,000 estimated phase two costs. Phase three is hoped to qualify for federal aid.

The technology gained can be applied by other apple processors in the state in the development of food waste to energy projects and can be instrumental in reducing the need to use valuable agriculture land for land disposal sites.

Schuylkill farm estate planning meeting scheduled

SCHUYLKILL HAVEN — The Schuylkill County Extension Service will be conducting a meeting entitled, "Estate Planning For Farm Families."

According to County Agent, Allan Shoener, the meeting is scheduled for Wednesday, March 19, 1980 at the Conference Center of the Penn State Schuylkill Campus. This will be an all-day meeting beginning at 9:30 a.m. and adjourning at 3:30 p.m.

Program speakers for the session include Attorney Lanny G. Felty, Pine Grove; James Flannery, Trust Officer of the American Bank, Pottsville; and Frederick Hughes, Professor, Farm Management Extension, Penn State University.

Further information is available and reservations can be made by contacting the Schuylkill County Extension Service, P.O. Box 250, Schuylkill Haven, PA 17972 or by phoning (717) 385-3431.

The satisfaction that comes from doing a good job of farming

It's a great feeling to know that you are the master of your farmlands . . that when you treat your soil right, it will treat you right. Liming is one of the most important factors in keeping your soil in the highest productive range. By raising the pH from a level below 6 0 to 6 5 or higher, you can expect to harvest as much as 5 more bushels of corn per acre, with similar increases for all other forage and cash crops.

Farm Talk

Jerry Webb

Transferring a family farm from one generation to another is not as simple as waiting for the older generation to retire or die.

Farming is a complicated business that requires skill, understanding, dedication, and experience. And in most farming situations, that develops through a father-son arrangement.

That's been a tradition in agriculture for many generations as farms are passed from one generation to the next with at least one son or son-in-law always being available to take over the farming operation. There are farms here in the mid-Atlantic area that have been in the same family for more than 200 years.

If this method for passing the farm from one generation to another has been going on so long, you'd think it would be working pretty well. Maybe in most situations it is. But recently some farmers have been speaking up about their dissatisfaction with the plan, or lack of plan, for handing over the farm responsibilites.

It's kind of like going against motherhood to say anything about father-son farming arrangements. It's part of the American way of life, and for many farmers it's their great dream to develop a working farm and have a son grow up as part of that farm, work into the business and then take it over when the father decides it's time to retire.

Sounds like a good idea, but some farmers are realizing that at least in today's complicated farming operations, the old ways may leave something lacking. And so they're speaking out for better arrangements.

A young man who grows up on a farm and wants to farm is usually encouraged by his father to become part of the business. He's given some livestock at a young age to take care of, or perhaps a piece of ground is turned over to him. Then as he proves himself, Pop may expand the business by adding some acres or taking on a new enterprise so there will be enough work for everyone and a decent living for all concerned.

By the time this youngster reaches manhood there's an agreement, written or othewise, as how the work will be handled, who pays the bills, who shares what expenses, and how future plans will be made. By the time Pop is ready to retire, the next generation is well established and ready to get on with the business of running the farm.

That's the ideal situation. But now some farmers are saying that what they wind up with is not just that.

Young farmers tell of promises that are not kept, of working for years at very low wages, and then being expected to buy out the parents at full value when they reach retirement.

Other farmers tell of the difficulty of getting along with parents; or looking at it another way, the problem the parents face when the young farmer wants to move ahead too fast and take what seem to be unwarranted risks.

Few of us are given the opportunity to choose our relatives and certainly this applies to sons or daughters who might become farming partners.

Why should a young man become a good working partner simply because he was raised on that farm?

Maybe it's expecting a lot for him to spend a large chunk of his life as his father's helper and then have to buy him out at retirement time.

Likewise, it may be expecting a lot for a father to give away the business he spent a lifetime developing just because he's 50 years old. It may be equally difficult for Pop to share decision making, or turn over an important enterprise to a son that he still thinks of as being a boy.

Then the problem is complicated by a young farmer's wife who is suddenly brought into the business and who is not blinded to the false hopes and inequities. She must suit her husband, her husband's parents, and maybe even other brothers and sisters and still try to be herself.

She must raise her children the way her mother-in-law would, while at the same time being a farmhand for her husband, a bookkeeper for the family business, and a spokesperson in community activities. Not an easy task.

It's a miracle to me that so many father-son farming operations work. It says a lot about the integrity and character of farmers. And the fact that some farmers, both farmers and sons, are talking about problems is not altogether bad. To me it means there are some inequities that need to be rectified, and the place to start is through discussion.

The next step is probably some kind of written agreement between all parties involved so that it's clear what is expected.

Not many people would enter a business partnership without written guidelines, and perhaps farmers are expecting too much when they develop a father-son farming operation on faith, promises, and expectations.

IS THE KIRLOSKAR DIESEL UNDERPRICED?

You bet it is. How else would a beautifully engineered product from India crack this highly competitive American market.

Kirloskar *has* to offer more.

Which means, for starters, world class engines built to surpass SAE standards. Quality control you wouldn't believe. If it isn't faultless it doesn't get offered for sale.

And it means an extensive network of parts, service centers and enough trained mechanics to keep you operational with the best of them. Write for the list, it's free.

Kirloskar diesels are sold here in sizes from 1.8 to 107 hp. For information on the complete line contact Kirloskar Inc., 1401 Cherry Hill Rd., Baltimore, MD 21225. (301) 354-1866. Telex: Powerhouse 87-525.

And because obviously we can't do justice to it here, ask about pricing. Kirloskar. Over-engineered, underpriced, and a terrific bargain.

Eastern officers elected

Officers of New Holland Local, District 8, Eastern Milk Producers for the coming year include, from the left, Harvey Sauder, R1 New Holland, alternate delegate; Robert E. Martin, R3 New Holland, president; Raymond Wenger, Lititz, delegate; Daniel Martin, R2 Quarryville, secretary; and Mervin Weaver, Lititz, vice president. Also named an officer at the Local's annual meeting held on March 6 was Leroy Smoker, R3 New Holland, treasurer.

Task force to advise on mechanization research

WASHINGTON, D.C. — Secretary of Agriculture Bob Bergland last Wednesday announced the membership of a special task force formed to advise USDA on current and future mechanization research.

Bergland said the task force will recommend criteria and procedures for objective evaluation of the economic, social, environmental and labor displacement impacts of current and future federally-funded agricultural mechanization research projects.

He said USDA plans to undertake the evaluations in 1980 and that the task force will recommend how they should be carried out. The task force will also review completed evaluations to see if they meet the criteria and provide an objective basis for use by research administration in making decisions about mechanization research involving federal expenditures.

The task force will place a special emphasis on mechanization research that may result in large-scale displacement of labor, Bergland said. The results of the group's evaluation also will be made available to directors of agricultural experiment stations to consider as they manage their research programs.

Task force members were drawn from the standing membership of the National Agricultural Research and Extension Users Advisory Board and the Joint Council on Food and Agricultural Sciences.

Berks ASC attend seminar

LEESPORT — Members of the Berks County Agricultural Stabilization and Conservation Committee recently attended a seminar in administrative development at Riveredge.

Along with about thirty other farmer-elected committee members, Mark Balthaser, chairperson, of R1, Bernville, Donald Lutz, vice chairperson of R1, Mohrsville, and Lester Gelsinger, regular member of R1, Robesonia, discussed methods to better serve the agricultural community through the ASC Committee system.

The seminars were designed to achieve better public service through efficient management, to better serve the farmer during the day-to-day operations of the county office; to increase committee members' understanding of the agency's role and mission; to improve committee members' problem-solving and management skills and to increase program participation through improved public relations.

The County Committee system of ASCS is a unique system within government. Committee members are elected to a job of public trust that allows them a highly efficient and effective method of administering farm programs.

The agency and the Department recognize the importance of the committee system and the need to give adequate and continuing training in decision-making and problem-solving techniques to committee members.

UNIPEL® 13-34-10
fertilizer can get your corn crop
off to a super start:

It has a high concentration of water-soluble Phosphorus that gets to young seedlings quickly Helps plants establish a good root system — the starting point for top yields Its quick-acting and long-lasting Nitrogen team up to feed the young plants for full yield potential, continually from sprouting to harvest

This is the Starter Special that corn growers know from good experience It's highly effective as a banded starter And it's SAFE no chance of ammonia damage to tender, young seedlings when used as a "pop up" and applied directly with the seed at 50 lbs /acre

How can we fit UNIPEL 13-34-10 into your corn fertility program?

Bean beetle outlook tough

NEWARK, Del. — Start inning now for Mexican an beetle control in your beans. You're going to d it.

Overwintering populations this pest are the highest ey've been in five years, ports University of laware extension pest nagement specialist ark Graustein. Growers no don't take proper otective action could well e early, heavy feeding on eir seedling soybeans.

A survey of overwintering exican bean beetle pulations in Delaware dicates pressure will be eatest from south of the nal down through Milford d Greenwood, with one olated hot spot down ound Angola.

In view of this forecast, raustein advises growers prepare themselves now r some form of MBB ntrol.

They have three alternatives: plant a snap bean ap crop; monitor fields utinely and spray for MBB hen economic levels of estation are reached; or ake an at-planting apcation of a systemic inecticide.

The pest management ecialist considers use of a stemic the least tisfactory of these ternatives for several asons. For one thing, stemics only last for about weeks

This means that though ey'll give you early ntrol (which will be itical this year), once ey've worn off, your crop vulnerable to a new instation With the heavy essure forecast, you may ell need to spray later on if ou go this route.

Another disadvantage to ystemics for MBB control is hat though they will control rips and leaf hoppers as ell, none of the materials abeled for this use will ontrol green clover worm, rasshoppers, Japanese ettles and other defoliators r pod-feeding worms.

Currently there are three ystemic insecticides abeled for MBB control on oybeans: Thimet, Disyston, nd Temik. Besides early ean beetle control, Temic will also provide some nematode and some early mite suppression, but this suppression is only temporary.

There's also some evidence that certain systemics can aggravate a mite problem in soybeans during dry weather, though entomologists don't yet understand why.

Your other two choices for MBB control in soybeans are to use a trap crop or to routinely monitor fields and spray when beetle populations reach the economic level.

The pest management specialist strongly recommends using a snap bean trap crop because when handled properly this is by far the cheapest and most effective way to achieve MBB control over the entire growing season. This method should only be used in fields with a history of MBB pressure or in areas where the overwintering population is high as indicated by beetle activity last fall.

The trop crop method takes advantage of the fact that the MBB, when given a choice, prefers to feed on snap beans rather than soybeans

The system involves planting six to eight rows of snap beans along two edges of each field at least a week before soybeans are seeded so that when overwintering adult beetles emerge from the woods and brush bordering fields, they'll be attracted to the snap bean foliage As long as there's any of this to feed on, they won't move into the adjacent soybeans

Concentrated thus in a small area rather than spread out over an entire field, the beetles are much easier and cheaper to control.

There are four different ways to deal with the MBB in your trap crop. You can treat it with a systemic at planting. You can treat it with a foliar insecticide when the first MBB larvae hatch out. You can disk the trap crop under after MBB larvae hatch out and overwintering adults have started to die off around the first week in July. Or you can use a parasitic insect, Pediobius, which kills MBB by laying its eggs in beetle larvae.

Graustein prefers this last control in the trap cr because it's a biological method which requires no chemicals and no extra energy investment on the part of the grower.

It also has the advantage of long-term control Once the trap crop has been defoliated or has matured and died off, Pediobius will continue to follow the beetle and parasitize it as it moves into the soybeans. And by this time the crop should be far enough along to tolerate some defoliation without affecting yields.

With the parasite you don't run the risk of having late-season economic damage from MBB — something which sometimes happens with other systems when there is heavy pressure from this pest.

How can Graustein be so sure the parasite will do its job? "We've been demonstrating its effectiveness since 1975 in trap crops around the state," he explains. The only time it hasn't worked is when the trap crop isn't managed as prescribed.

What kind of savings can you realize with a trap crop? A one-acre trap crop effective for control of MBB in a 50-acre soybean field will cost less than $150. This compares with $500 or more, $10-$12 an acre, to spray the entire field, or $480, $8-$9 an acre, to apply a systemic on the soybean field at planting.

Growers interested in learning more about trap cropping can find out how it's done from Delaware extension bulletin No. E33. This is available at county extension offices in Newark, Dover and Georgetown.

Graustein is also preparing a one-page leaflet which outlines the steps for planting a trap crop.

If you would like to use parasites in combination with a trap crop MBB control in your soybeans next summer, let your country agent know exactly how many trap crops you intend to have That way enough parasites can be raised now for later release. Get your order in as soon as possible—but certainly before April 15

Goats are very versatile animals

WESTMINSTER — Do you have goats, or are you interested in them? Then the Maryland Dairy Goat Association is interested in you.

The Maryland Dairy Goat Association that has meetings, shows, newsletters, workshops, and this year, they are hosting the 1980 American Dairy Goat Association Convention. Many goat people from all over the country and Canada come to these conventions.

Dairy goats are very economical animals, especially these days. You can get a lot of use out of one goat. You can drink the wholesome good-tasting milk, eat the meat, which tastes like lamb, and sell the offspring for a profit.

One myth about goat milk is that it tastes bad. It doesn't! If the milk is properly taken care of, it tastes like homogenized cow's milk that you buy from the store! It tastest just the same, but according to MDGA, it is better for you.

The goat's milk has smaller fat globules, so it is easier to digest than cow's milk. Yet it tastes creamier than cow's milk because, even though the fat globules are smaller, there are substantially more of them.

Doctors will very often recommend goat's milk to their patients who have ulcers. Also, small children who are allergic to most foods are usually able to resume normal eating habits after drinking the goat's milk!

Goat meat, called Chevon, tastes much like lamb. It has no wild taste, and it does not taste strong. Most of the roasts that we have seem to melt in our mouths because they are so tender.

What one cow lives on, can easily feed eight goats. A single cow takes in more grain, hay, and silage than eight goats. Goats are good browsers, so they don't require the high amount of grain.

If you have goats, or would like any information about them, call Roy VanDerLinden at 848-5295, Brad & Terri Wigle at 775-2198, or Virginia Garnett at 374-4054 for more information about MDGA and general information about goats. They meet the second Monday of each month at the Baltimore Federal Bank Building in Westminster, at 7:30 p.m.

The Association will hold an annual show on June 7 & 8, at the Carroll County Ag Center. It is one of the largest shows on the east coast. Breeders from as far as New England, South Carolina, and Ohio come to show their herds of goats.

The Convention will be held in Frederick. The Convention is the best place to meet interesting goat breeders and to learn lots about goats.

Out standing in her field.

Standing out in the field of Maplegrand Farms in Peru, New York is one outstanding producer Her name is Maplegrand Rockman Meadow, and she's produced 165,648 lbs of milk through 5 lactations! Her average daily milk since first calving (including dry periods!) has been 94.2 lbs. And that translates to an average daily income of $9 02!

One reason she's been so outstanding is good management Sired by C. Fawcettdale Ambassador, she was raised by Kermit Irwin and Family, Peru, N Y, highly experienced and knowledgeable owners of over 220 head of Holsteins with 100 milkers

The other reason is Beacon Irwin took advantage of the Beacon Feedback Program, which planned the nutritional needs of his top producer Following the advice of his Beacon Dairy Specialist, Irwin has typically fed her 10-20 lbs. of Beacon Super 30 Concentrate every day, along with corn silage, high moisture ear corn, corn and oats chop, and hay (treated with Beacon Hay Pre-Serv)

If you'd like to have better producers, maybe even super ones like Maplegrand Rockman Meadow, call your Beacon Advisor We obviously can't do everything to make your cows outstanding, but we sure can help.

Beacon—headquartered in Cayuga, New York manufacturing throughout the northeast.

Cumberland agent named farm management specialist

CARLISLE — Roland P. Freund, associate Cumberland County extension agent, has been named area extension farm management agent.

Thomas B. King, Penn State associate dean for extension, points out that Freund will work closely with extension agents in conducting educational farm management programs in Adams, Cumberland, Dauphin, Franklin, Lancaster, Lebanon, Perry, and York counties.

He is headquartered in the York County Cooperative Extension Service Office. Freund has been a member of the Cumberland County Extension Service staff since August 1976.

Born and raised in New Guinea, he was educated in Australia, received a diploma of agriculture from Roseworthy Agricultural College and majored in animal science at the University of New England, New South Wales, Australia. He also earned a Master of Science degree in Cooperative Extension from Michigan State University.

Prior to his appointment to the Penn State Extension Service staff, he was an agriculturist for the New Guinea Lutheran Mission, and Extension Officer, and Lecturer in Farm Management at Vudal Agricultural College for the Department of Primary Industry, Papua, New Guinea.

He is married to the former Josephine L. Bailey, of Indianapolis, Indiana. They are the parents of one son.

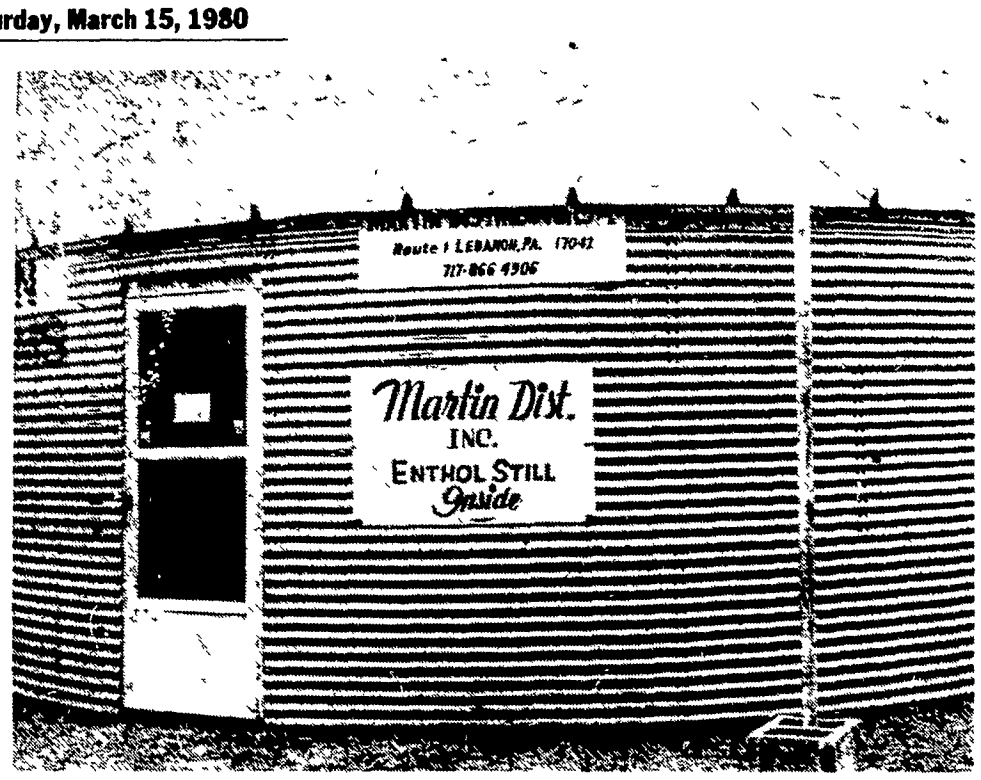
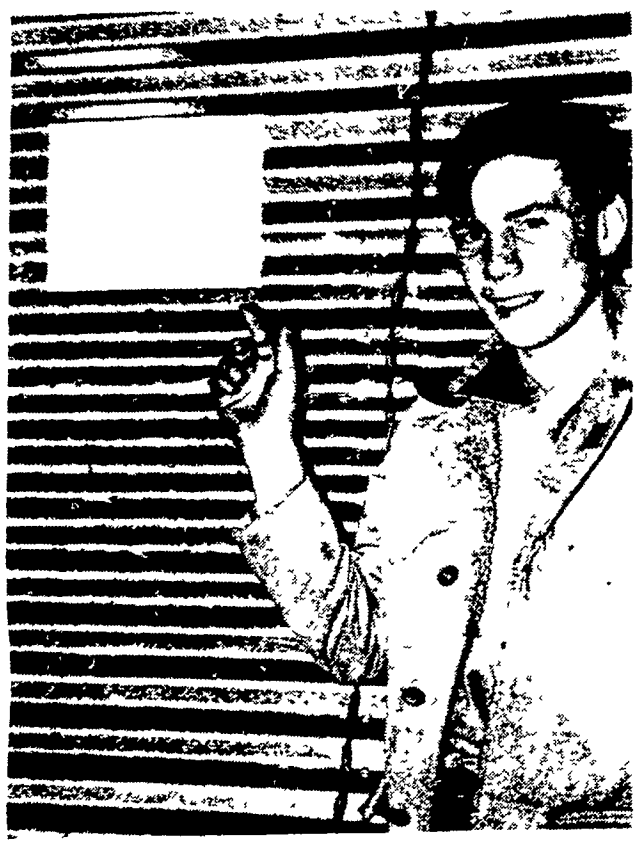
Expo still ran despite LBCB holdup



Far from its distant relatives in the hills of West Virginia, this still was set up by Martins in the parking lot of the Farm Show Complex, an educational exhibit that nearly went down the tubes.



Merle Martin, son of Ivan Martin, Lebanon, points to the operating permit rushed through by the Liquor Control Board after telephone calls from PDA Secretary Hallowell.

The still in operation was one of the highlights of this year's Farm Equipment Expo.

Inflation kills farming fun PFA members tell Congress

WASHINGTON, D.C. — "Inflation takes the fun out of farming," was the message brought to Washington, D.C., by more than 200 farmer-members of the Pennsylvania Farmers' Association, who hosted the Pennsylvania congressional delegation at a banquet here last Wednesday at the Quality Inn Capitol Hill.

"Inflation is deadly to those who try to save, or who must live on fixed incomes," said Eugene Thompson, PFA President and an Indiana County dairyman, in his address to the farmers and congressmen

"Inflation takes most of the fun out of farming

"A tractor of between 110 and 129 horsepower, costing only $14,500 about five years ago, now costs around $25,000," according to Thompson

The farm leader blamed "excessive deficit spending by the federal government and the creation of new monies to make up the difference" as the root cause of inflation. He suggested that the Pennsylvania congressmen get behind efforts to adopt a constitutional amendment that would place limitations on federal spending and taxation.

The Pennsylvania Farmers' Association supports the legislation, Senate Joint Resolution 56, introduced by U S Senator H John Heinz III (R-PA) and Richard Stone (D-FL).

Thompson told the group that a limitation on spending was not the total answer but it would be "a start in the right direction"

Earlier, Thompson urged the Pennsylvania congressmen to support efforts to pass the national agricultural bargaining act of 1979, HR-3535, which already has the support of three Pennsylvania congressmen, Austin J Murphy, John P. Murtha and Donald L. Ritter.

The proposed bargaining legislation contains four major provisions: (1) It requires the establishment of a system in the U.S. Department of Agriculture for defining and crediting voluntary membership producer associations as bargaining units; (2) It makes "good faith" bargaining a mutual obligation of the farmer and the handler-processor, (3) it eliminates such practices as coercion, intimidation, discrimination, bribery or other inducement on the part of either party and (4) It establishes rules and regulations for enforcement purposes

Presently there are no requirements by the federal government for handlers or processors to negotiate in good faith with producer owned and controlled marketing associations

Thompson also said his organization opposes any form of national health insurance, because "more than nine out of ten U.S. citizens are now covered by some form of health care insurance."

In his opinion, the "catastrophic" health benefits now being proposed are "the first step toward the ultimate nationalization of all U S Health Services."

"The Department of Health, Education and Welfare predicted that medicare would cost $900 million for the first full year of benefits," Thompson stated. "The actual cost was $3.4 billion - almost four times the original estimate.

The farm leader suggested that the best solution to improved health care insurance would be individual income tax credits on premiums paid for enrollment in private health care plans

A Public Sale of farm machinery and a truck was held March 7 by C. Alfred Taylor, R. D. 1, Dallastown, Pa. in York Co. This was a well attended sale.

Items sold included: Tractor $8250, J.D. 4020 Tractor $8050, J.D. 3020 Tractor $8100, Ford Tractor $4000, J.D. B Tractor $600, J.D. Disc Harrow $5250, A.C. no-till Corn Planter $2000, Int. Grain Drill $1700, Int. 7-Bottom 16" Plow $2500, 1973 Chev. Pickup Truck $2050 and 10 hp. Cub Cadet w/mower $1000.

Robert L. Sechrist was the auctioneer.

A Public Auction of farm equipment was held March 8 by Mr. and Mrs. Norman Steck, 15 miles north of Bloomsburg in the village of White Hall, Pa.

Some items sold were: J.D. 4320 Tractor $14,000, J.D. 2520 D Tractor $7950, J.D. 60 Tractor $1200, N.H. 479 Haybine $2125, Grinder-Mixer $2400, N.H. Manure Spreader $2350, J.D. Transport Harrow $1800, N.I. Cornpicker $3200, J.D. Corn Planter $1950, Int. Plow $2100, and Round Corn Cribs $525 each.

Auctioneer was Gele L. Derr.

xxx

A Public Auction of personal property was conducted March 8 for Joseph S. Brubaker, Ephrata, Pa.

Items sold were: Mule $520, Tobacco Planter $201, Buggy $795, Wiard Plow $160, Copper Kettle $395, Jelly Cupboard $360, Square Oak Extension Table $350, Wooden Apple Butter Stirrer $52.50 and Butter Churn $62.50.

T. Glenn Horst was the auctioneer.

xxx

A Public Sale of Holstein heifers and machinery was held March 8 by Mr. and Mrs. Charles T. Keller, R.D. 1, Centre Hall, Pa.

Some prices received were: Butcher Kettles up to $125, Set of Plank-Bottom Chairs $85 each, Bulk Milk Tank $250, Case Tractor $4150, Bale Wagon $975, and Yearling Heifers $1000 to $1500.

Mark Glick was the auctioneer.

xxx

A Public Auction of farm equipment was held March 8 by Nevin K. Deitrich, 15 miles northwest of Allentown, Lehigh Co., Pa.

Prices included: Ford 4000 Tractor $2050, Ontario Drill $1150, Ford 8N Tractor $775, Ford Rake $700, Hay Tedder $625, N.I. 206 Spreader $550, Woods Bros. 6' Rotary Cutter $725 and N.I. #10 Corn Husker $1200.

Ralph W. Zettlemoyer Auct. Co. conducted the sale.

xxx

A Public Sale of farm equipment was held March 1 by Leonard Seibel, 3 mile west of Shoemakersville, Berks Co., Pa. There were 270 registered buyers present.

Some prices received were: Deutz 10006 Tractor $9800, M.F. 135 D Tractor $4500, Ford 350 Cattle Truck $2200, 1961 Ford 9' Stake Dump Truck $625, J.D. 3-B Rollover Plow $1500, N.H. Forage Wagons $925 & $850, N.I. PTO Manure Spreader $875, Bale Wagons w/sides $300 to $1050, J.D. 8' Cultimulcher $500, M.F. rollover Plow $875, and N.H. 3 pt. Mower $500.

Auctioneer was Kenneth P. Leiby.

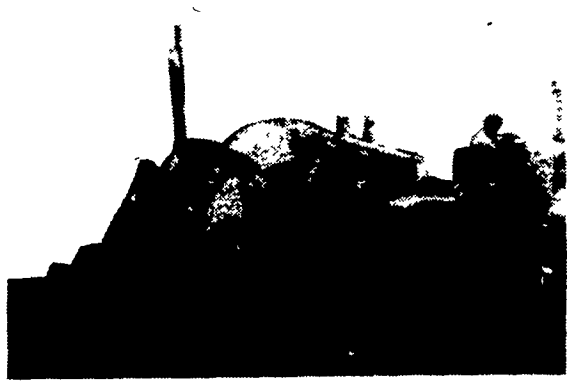
xxx

A sale was held by Melvin Hertzler, Mechanicsburg, Pa.

J.D. 4020 Diesel with Cab $13,200; J.D. 2020 with loader $6,650; A.C. 170 gas $4,100; J.D. 3 bottom plow $550; J.D. 4 bottom plow $1,650; Int. transport plow $1,200; J.D. 40 spreader $1,235; J.D. 1240 planter $1,175.

Ralph W. Horst, auctioneer.

DRAINAGE PROBLEMS?



COCALICO EQUIPMENT HAS THE TWO MACHINES TO HANDLE YOUR DRAINAGE PROBLEMS.

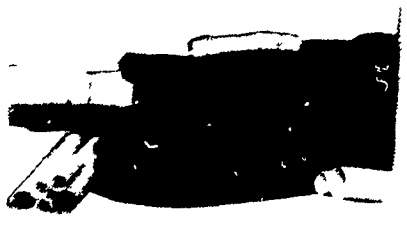
★ Both Machines Equipped with Laser Beam Grade Control

Drainage Pays High Returns

Investment	Typical Annual Return
Land Drainage	21-46%
Farm Buildings	3-23%
Farm Land	11%
Stocks	7.4%
Bonds	6.1%

COMPARE

Even with the conservative figures shown here, it's obvious that land drainage should top farmers' lists of investment priorities.



★ We Stock Heavy Grade Tubing which Exceeds SCS Specifications. In sizes 4", 6", 8", 10" and 12".

★ Also Pipe And Fittings For Tile Outlet Terraces.

USDA wants to ban PCB containing equipment

WASHINGTON, D.C. — Feb. 29 The U.S. Department of Agriculture has proposed that federally-inspected meat, poultry and egg products plants be prohibited from installing new or replacement equipment that contains polychlorinated biphenyl.

Carol Tucker Foreman, assistant secretary for food and consumer services, said the proposal is in response to an industrial accident last summer, in which PCB from a ruptured transformer leaked into the drainage system of a slaughtering plant in Billings, Mont. Animal feed produced from the waste in that system contaminated meat and poultry products in 19 states.

"This proposal is one in a series of actions we are taking to protect the public from accidental chemical contamination of the food supply," Foreman said. "USDA is working to reduce the incidence of industrial accidents and to provide quick and effective cooperation among involved government agencies and industry when contamination emergencies do occur."

The Food and Drug Administration and the Environmental Protection Agency have indicated their intention to propose similar regulations for other food processing plants, Foreman said. Earlier this month, USDA, in cooperation with FDA and EPA, asked food manufacturers and related industries to voluntarily remove PCB-containing equipment from their plants.

Other actions under consideration by USDA include a request for legislative authority to require owner identification of all animals sent to slaughter and authority to quarantine animals on the farm, a new system to establish coordinated communication early in a contamination emergency and regulations to require food processors to remove equipment containing PCB from their facilities.

PCB is a class of highly toxic industrial chemicals which have been widely used since 1929 in transformers, heat transfer equipment and capacitors for their stability, and fire and heat resistance.

The manufacture and distribution of PCB was banned after July 2, 1979, by the EPA. However, the EPA rule allows limited continued use of PCB in totally-enclosed systems such as capacitors and transformers, and this equipment is present in many food processing plants.

USDA's Food Safety and Quality Service has responsibility, under federal meat, poultry and egg products inspection acts, to assure that these food products do not contain any adulterants. Because PCB is highly toxic, its presence in food processing plants represents a substantial hazard to human health and the environment.

The proposal to ban the installation of PCB-containing equipment was published in the February 29 Federal Register. Copies are also available from the Meat and Poultry Inspection Program, FSQS, USDA, Washington, D.C., 20250.

Comments on the proposal should be submitted by April 30 in duplicate to: excecutive secretariat, attention: Annie Johnson, room 3807-S, FSQS, USDA, Washington, D.C. 20250. All comments will be available at the same address during regular business hours.

Farm labor force up seven percent

HARRISBURG — The Labor force on Pennsylvania farms during the survey week of January 6-12, 1980 was estimated at 106,000, an increase of seven percent over the same week in 1979, according to the Pennsylvania Crop Reporting Service.

Farm family workers remained the same at 83,000 but hired workers numbers jumped 43 percent to 23,000 workers. The Crop Reporting Service has accounted for the increase as due mainly to the snowy, rainy and very cold weather during the comparable 1979 survey, which did not allow farmwork to progress as usual.

Farm family workers includes farm operators working on farm one hour or more, plus other family members working 15 hours or more without receiving cash wages during the week. Hired workers includes all persons working one hour or more for cash wages.

The average workweek for Pennsylvania farm operators was 35.0 hours, 5.1 hours more than during the 1979 survey week. Pennsylvania's hired farm workers averaged 33.8 hours during the week, and other family members working on farms averaged 29.8 hours.

Nationally, the total number of farm workers increased by one percent to 3,021,000 during the survey week.

Pennsyslvania farm workers averaged $3.45 per hour, with field workers receiving $3.62 per hour and livestock workers receiving $2.80. The wage rate figures do not take room and board into consideration.

Sale Reports

A Public Sale of farm equipment was held March 6 by Mrs. Elmer B. Zimmerman ½ mile south of Lebanon, Lebanon Co., Pa. Registered buyers attending numbered 411.

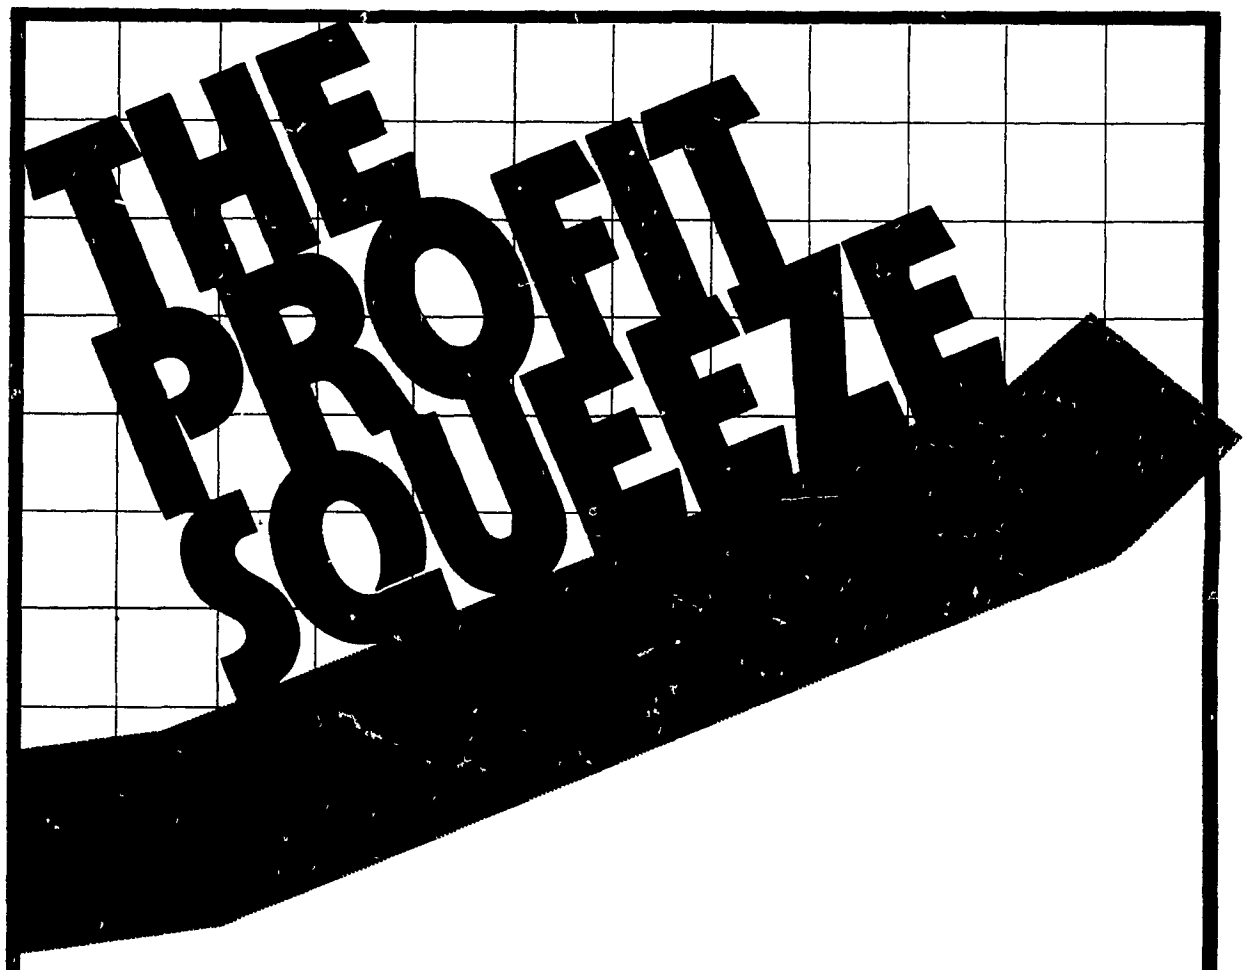
Some prices included: J.D. 4020 Tractor $12,500, J.D. 400 Tractor w/loader $8000, J.D. 630 Tractor $2100, J.D. 300 Riding Mower $2450, J.D. LA Tractor w/plow $950, J.D. Transport Disc $3300, Brillion 9 tooth Chisel Plow $1200, J.D. 416 Auto. Reset Plow $1900, Transport Cultipacker $1050, Gehl Blower $1100, N.H. 1469 Haybine $2200, J.D. 38 Harvester $1950 and Harvester Pickup $675.

Auctioneers were Nevin Z. Martin and Lewis B. Groff.

A Public Sale of farm machinery was held March 1 by the Amos B. Stauffer Estate, east of Ephrata on Diamond Station Rd., Lancaster Co., Pa.

Items sold were: Papec Forage Wagon on running gear $1045, Gehl Wagon on running gear $750, J.D. Tractor $400, 28' Elevator $190, Int. Tractor $360, Corn Planter $150, 10'x40' Wood Silo $400, Generator $400, Walking Plow $50, Lathe $195, Tobacco Lathe $2.10 cwt., Truckbed $170, 20 Gauge Pump Gun $205, 2 piles Scrap Iron $185 & $215.

Auctoneers were Robert E. Martin & Son and Frank L. Steller.



NO.1 REASON FOR NO-TILL.

No matter how you slice it, No-Tillage farming is more economical than conventional farming and every bit as productive. The secret is a super-efficient herbicide called ORTHO Paraquat CL. It kills on contact with extraordinary speed and destroys an exceptionally broad spectrum of unwanted weeds and grasses.

After spraying with Paraquat and your recommended residual herbicide, you simply plant corn or soybeans right into the stubble of a preceeding crop. There is no tillage involved. You save time, labor, and since No-Till is a once across the field operation, significant fuel costs. For best results, apply Paraquat with ORTHO X-77® Spreader.

DANGER: Paraquat is highly toxic if swallowed and should be kept out of the reach of children. To prevent accidental ingestion, never transfer to food, drink or other containers. Read the label carefully and follow all directions, danger statements and worker safety rules. Restricted Use Pesticide. Use all chemicals only as directed.

Pork producers approve boost in checkoff

ST. LOUIS, Mo. — "A giant step forward for pork producers," is how a National Pork Producers Council spokesman sums up that group's move late last Thursday to approve increasing the Council's voluntary market hog checkoff rate.

A 10 cent per hog increase (from 10 to 20 cents) will be implemented January 1981 following action by NPPC's delegate body meeting at the American Pork Congress in St. Louis. The feeder pig checkoff rate of five cents per pig marketed remains unchanged.

Thursday's action came after a day and a half of delegate discussion and consideration of several proposals. Much of the intense discussion centered on whether the checkoff would be based on percentage of value or a flat rate per head.

The additional funding will include allocation of 60 percent of the increase to the Council with the NPPC-member states and National Live Stock and Meat Board each receiving 20 percent of the funding. Funding for the Pork Industry Group of the Meat Board carried the stipulation that the NPPC received additional representation on the Meat Board's policy-making body with election by the NPPC delegates.

The increased funding plan, recommended by NPPC's Planning and Resolutions Committee could, according to NPPC's Orville K. Sweet, executive vice president, should nearly double funding available for carrying out Council programs. Budget for the past year was $2.2 million.

"The delegate action," Sweet continued, "is a vivid example of grassroots' action and response to a real industry need." Initial moves for such an increase in the entirely volunteer producer-funding program were launched by delegates at the 1979 Pork Congress.

"Delegate action," Bill Buller, NPPC president, Brookings, SD, said, "came after long, exhausting sessions featuring debate, largely over allocation of funding. However, at the end, the comradeship of pork producers and their typical desire for unity prevailed.

"Poork producers see the increase as an opportunity for Council growth and came forward in recognizing they alone have the understanding and decision-making power to respond to future industry needs. The delegates were responsive to the groundswell of grassroots' comments on previously approved checkoff proposals," he said.

All pork producers, and the industry as a whole, can justifiably have pride in the delegate action taken here in St. Louis.

Producers for the balance of 1980 will be striving forward to increase checkoff participation within their respective states through the Market Blitz program implemented earlier this year, Buller said. This drive is aimed at increasing participation from the present 53 percent level to 75 percent giving all involved yet another opportunity to strengthen funding at all levels.

Delegates approved appointment of a permanent checkoff committee to monitor the program to involve and maintain a high level of total producer involvement.

On another issue, delegates in St. Louis voted to table until 1981 action on a proposed political action committee as recommended by the Council's Board.

Delegates before adjourning named five new directors to the executive committee: Russell Rowe, Michigan, to a three-year term; Ed Cox, Arizona, to a three-year term; and Wayne Walter, Kansas, to a three-year term. Arno Moenning, Minnesota, was elected to a one-year term to fulfill a vacated unexpired term. Myron Laffoon, Indiana, was elected to the new director's spot created by a change in bylaws. George Belt, Kentucky, was elected to serve as an NPPC member on the National Live Stock and Meat Board.

Market association seeks produce growers

BY DICK ANGLESTEIN

WEST CHESTER — A direct marketing association to assist farmers in finding markets for their produce is operating in the five-county area of Bucks, Montgomery, Lancaster, Berks and Chester.

The non-profit association, headquartered in West Chester, is the Farmer-Consumer Services Association, Inc., which is operated in cooperation with Penn State and the Pa. Dept. of Agriculture.

"We are now seeking to enroll growers in the five-county area who are seeking markets for their produce," George E. Perry, Jr., executive-director of the association, said.

"Working with interested growers, we'll seek markets, such as fruit coops, small stores, roadside stands, state institutions and school districts."

Cost of membership in the association by a grower is a one-time $5.00 enrollment fee. The association also charges a five percent commission on sales.

Types of farmer members being specifically sought by the association include growers of sweet corn, canteloupes, tomatoes, cauliflower, eggs, fruit, Easter flowers and bedding plants.

During the past winter season the association worked with a number of apple growers to find juice markets with independent processors.

"We try to bring together and match growers with markets both geographically and according to size," Marie A. Pelino, association manager, said.

In most instances, the association arranges for direct shipment of the produce by the grower to help guarantee a fresher product and minimize handling. But the association does maintain a refrigerated warehouse at West Chester to serve smaller grower volumes and markets.

The association's marketing program is federally funded under the Farmer to Consumer Direct Marketing Act. It is governed by a seven-member board of growers, including Dick Solly, Bucks County, president; Fred Funk, Lancaster County, vice president; Carlton Groff, Lancaster County, secretary-treasurer; Peter Alexcih, Lancaster County; William Dean, Lancaster County; Byron Hawthorne, Chester County; and Tom Styer, Bucks County.

Interested growers should make early contact with the association to provide sufficient time for establishing summer markets. Contacts can be made at the Farmers-Consumer Services Association office, 880 S. Five Points Rd., West Chester, Pa. 19380, telephone, (215) 436-5316.

How somatic cell counts help dairymen beat mastitis

MINGOVILLE — Joe Stringer's Sand Ridge Farm looks like the average Pennsylvania dairy operation. Metal buildings have replaced on old bank barn, cats wander in and out of a milking shed, and sixty-five black-and-white Holsteins stand in the barnyard.

But there's a difference. Stringer's is a prize-winning herd. It produces large volumes of high-quality milk, and few of its cows are plagued with mastitis, a bacterial udder infection that can hold a milker 10 to 15 percent under her potential.

Stringer is one of 5000 dairymen belonging to the Dairy Herd Improvement Association, which offers production testing and other services to upgrade dairy herds. One program, somatic cell counting, is performed at Penn State's Central Milk Testing Laboratory and helps dairymen identify cows with mastitis.

Says Stringer, who farmers near Mingoville in Centre County, "Often you'll have a cow you swear should be giving more milk. She'll look fine, but she just won't produce. Sometimes mastitis is the answer."

He adds, "The cell program has been profitable. Whenever you cut the time cows are affected by mastitis, you increase your output."

In the last three years, Stringer's annual herd average has jumped from 14,700 pounds of milk per cow to 17,700 pounds. Part of the credit, he feels, should go to DHIA services, including somatic cell counting.

Veterinary scientist Dr. Robert J. Eberhart directs SCC research at Penn State. At the heart of the program are three somatic cell counters, complex machines that count the actual number of cells in a milk sample.

Each machine can test 180 .2-ml samples per hour. A sample is diluted, and dye is added to it.

The dye concentrates in the nuclei of somatic cells (body cells, including infection-fighting leukocytes and udder tissue cells), which spread onto a rotating stainless steel cylinder.

When filtered light shines on the sample, the dyed cells fluoresce, and sensitive devices count them. Cell counts indicate whether or not a cow has mastitis: the more cells, the greater the probability of infection.

Mastitis strikes glandular tissue in the udder, reducing milk quality and output. Most forms do not affect the appearance of a cow or her milk, and until recently could be identified only by expensive laboratory testing. Now somatic cell counting does the job for twelve cents per sample.

In Pennsylvania, about a third of the state's 15,000 herds belong to the DHIA. Each month, the association checks output of every milking cow in a participants's herd.

A milk sample from each animal goes to Penn State, where it is tested for fat content. Now, samples from 72,000 cows in 1,600 herds also receive SCC screenings.

Says Eberhart, "The DHIA sends test results back to the dairyman, telling him which of his cows are good producers and which may have mastitis. If a cow has a high cell count, the dairyman monitors her closely. If the condition worsens, he takes her off the production line and gives her antibiotics.

"All cows with high cell counts should be treated with antibiotics at the end of lactation, so they can begin their next lactation with infection-free udders," continues Eberhart.

"In some cases, we recommend treating cows in early lactation on the basis of high cell counts, but we need more data on the value of such treatment," he says.

In addition to antibiotics, mastitis control also includes proper use and maintenance of milking machines, and dipping a cow's teats in a germicidal solution after each milking to kill any bacteria transferred from another cow by the milking machine.

The SCC program went into effect statewide in January, 1978. Before that, Eberhart, veterinarian Lawrence J. Hutchinson, and dairy specialists Herbert C. Gilmore and Stephen B. Spencer ran an 18- month study on the program's potential, under Agricultural Experiment Station funding.

The researchers worked with DHIA member herds.

Two hundred from Lancaster and Bradford counties were designated pilot project herds; their managers received monthly cell counts on all cows and attended meetings on how to interpret and use SCC data.

Another 200 herds from all over Pennsylvania were con-

Study covers air, soil, water

Environmental indicators steady but group sees new threats

WASHINGTON, D.C. — The "quality of life" in the United States–as measured by seven environmental indicators -- remained virtually unchanged last year as the nation wound up a decade marked by the enactment of many environmental protection laws, the National Wildlife Federation reported in its 11th annual study of environmental trends.

NWF found in its 1980 Environmental Quality Index study that four of the seven resources that go into the index–wildlife, water, soil, and forests–remained unchanged in quality over the past year.

Another component of the EQI–air quality–improved in 1979, while two others–minerals and living space–declined in quality. Last year was the first time since 1970 that the majority of the seven natural resources did not register a decline on the EQI.

During 1979 there was "progress on a number of fronts," from pollution abatement and solar research to wetlands protection and wildlife management," explains the EQI report, which is published in the February issue of National Wildlife magazine.

But while many past gains were consolidated, "at the political level, environmental programs and priorities suffered setbacks from which they may not soon recover," the report concludes.

The EQI is an analysis of the state of the nation's natural resources based on a combination of objective measurements and the subjective judgments of the NWF staff in consultation with government experts and academic researchers. Five federal agencies–the Bureau of Land Management, the Council on Environmental Quality, the Fish and Wildlife Service, the Forest Service, and the Soil Conservation Service–now cooperate with the Federation in the collection of resources data.

Summaries of the 1980 EQI reports on the seven resources follow:

WILDLIFE

No Change. For the first time in more than a decade, the EQ trendline for wildlife stopped going down in 1979. This was the result of years of hard work in wildlife management, habitat protection, and pollution abatement. But conservationists worry about the future.

Little was done last year to improve vast acreages of badly abused rangeland in the West, they said. And in Congress, there was a fierce backlash against all environmental constraints on development.

There were other ominous conflicts between energy and wildlife in 1979. While Congress debated relaxing air standards so more coal can be burned, acid rain containing pollutants from industrial smokestacks and car exhaust began showing up in Wisconsin and Michigan.

Last fall, the Interior Department okayed oil exploration on the Georges Bank off Cape Cod, one of the world's most productive fisheries, while U.S. crews were mopping up a monumental leak from an offshore Mexican oil well.

MINERALS

Down. Of the seven resources analyzed in the EQI, minerals are perhaps the easiest to squander and the hardest to retrieve. This underlines the seriousness of the fact that in 1979, the U.S. moved one year closer to the end of the petroleum era without a comprehensive energy - conservation program.

Instead of emphasizing conservation, President Carter proposed a massive and expensive program to develop "synthetic" fossil fuels, to locate and produce more domestic oil, and to create an almost dictorial "energy mobilization board" that could bypass many environmental safeguards.

In the year of Three Mile Island, gas lines, and doubled fuel prices, all of the energy news was not bad. Energy efficiency in U.S. homes and apartments increased and industrial use decreased.

Improved auto mileage

Environmental quality

(Continued from Page D28)

last year produced the first drop since 1974 in gasoline demand, which accounts for 40 per cent of all oil used.

AIR

Up. All across the country last year, millions of Americans were breathing air that was cleaner than it had been in a decade. Also last year, there was relentless pressure on the Environmental Protection Agency to lower its air standards, because many U.S. policy-and auto-makers claimed that antipollution costs are inflationary.

What are the costs and benefits of air pollution laws? According to the President's Council on Environmental Quality, the U.S. spent $13 billion in 1978 to clean up the air. But, CEQ added, cleaner air may be saving Americans as much as $22 billion annually in damages.

WATER

No Change. Many industries and communities are now moving toward, rather than away from, the Clean Water Act's goal of "fishable, swimmable" waters by 1985. Industry is reponsible for much of the cleanup progress that has been made.

About 85 percent of the nation's major industrial polluters are complying with the law.

But there are rising problems. Many environmentalists claim that conventional sewage treatment plants use too much energy and don't really get the water clean.

Nearly 800 industrial polluters have failed to meet EPA's 1977 cleanup deadline and fewer than 200 have been taken to court. And every day, vast amounts of urban and agricultural poison enter the nation's water supplies from "nonpoint" sources.

SOIL

No Change. The outlook for America's hard used soil may be better these days. For one thing, erosion in many areas apparently isn't as bad as many experts once feared. For another, there's a good chance that the use of harmful pesticides can be drastically curtailed, due to a strategy called integrated pest management.

IPM could reduce crop losses to pests more effectively than today's pesticides--without harming human health or natural ecosystems.

On the negative side, the massive runoff of fertilizer and pesticides into streams and rivers remains one of the nation's most stubborn pollution problems. And the conversion of cropland to suburbs continues unabated, the study said.

LIVING SPACE

Down. Even with a lower birthrate, the U.S. population is expanding rapidly (it passed 220 million last year), and the strain on living space is relentless. Despite the suggestions of an urban renaissance in many of the nation's largest cities, the 35-year-old migration to the suburbs continues, accompanied by development in scores of agricultural areas.

Fortunately, some states have passed their own land use laws, and last year Congress passed an Omnibus Parks bill, which designates two million acres as wilderness. But benefits from these efforts will be limited as long as the primary cause of the living-space crunch--population growth--continues.

FORESTS

Same. Last year the U.S. grew more timber than it cut (except in the West). The U.S. Forest Service proposed to set aside more than 15 million additional acres as wilderness, and to open up another 36 million acres to timber and other kinds of development.

While some environmentalists said that was not enough wilderness, developers complained of a lockout. But the USFS's new five-year management plan provides for more public say-so on how forests are run. Most important, the plan gives higher priority to watershed protection, wildlife habitat and recreation.

American forests may face increased pressure from the energy shortage. Spot shortages of firewood are already showing up in parts of the U.S.

Commenting on the report, Thomas L. Kimball, NWF executive vice president, warned that the existing "quality of life" is threatened by present trends in Congress. "As we enter the 1980's the overriding question is this: Will we let energy and inflation wipe out our environmental gains?" Kimball said.

Berks 4-H County Council Meets

HAMBURG — The Berks County 4-H County Council's February meeting was a get acquainted night with the older members being introduced to the newer members.

The officers of the council played County Squares, a version of Hollywood Squares. Prizes were given to the winners.

The business part of the meeting included preliminary plans for a preteen intercounty exchange and an interstate exchange for teens. Preparations are still underway for 4-H Boscov's Days which will be held on March 21-22 at all three Boscov's stores.

A Teen Recreation Weekend will be on April 18-19 in Montgomery County. Anyone interested in attending should contact the Extension office.

A 4-H slide presentation is now available for use. Anyone can use it; it is an excellent way to inform new members, parents and organizations about the 4-H program.

At a recent 4-H bowling tournament, nine trophies were given for outstanding bowling. They were: mens: High single, Kevin Sattazahn, 182; Runner up, Joe Crisafulli 179; High triple, Joe Crisafulli 492; and Runner up, Scott Miller 461.

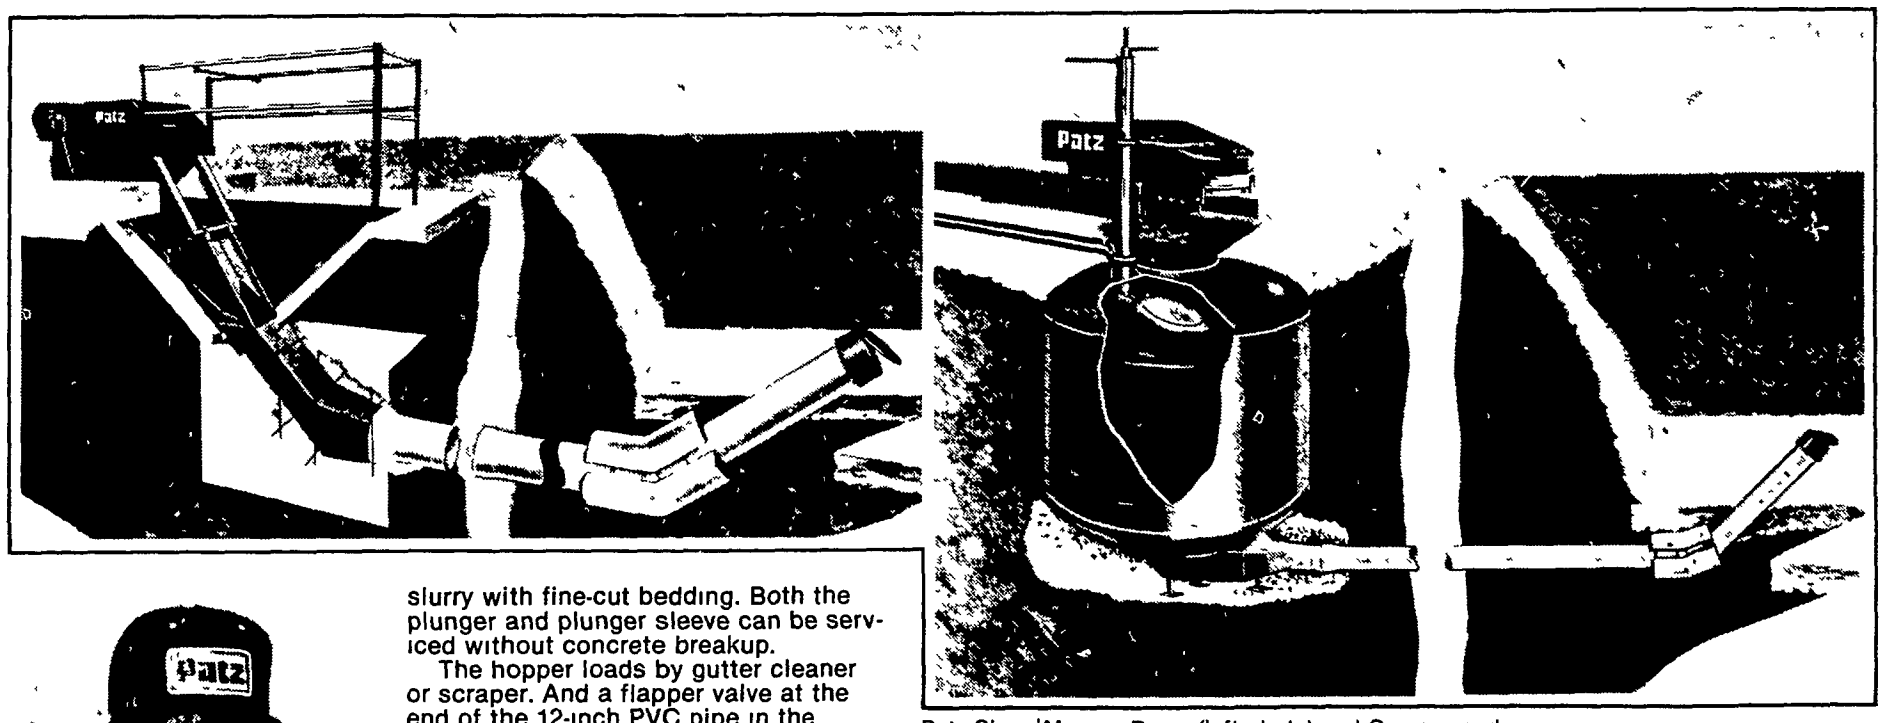
Also women's: High single, Darlene Dietrich, 168; Runner up, Debbie Troutman, 157; High triple, Darlene Dietrich, 404; and Runner up, Dorene Hertzog, 403.

Team Champs were: Todd Miller, Scott Miller, Cheryl Adams, and Darlene Dietrich, 1457.

Jayne and Judy Malsbury entered their jams, jellies, and preserves in the 4-H Display at the Farm Show and came home with five premiums. The were guided by their 4-H project book "Make and Eat Jams, Jellies and Preserves."

The next County Council meeting will be held March 20.

THE PATZ SOLUTION: Controlled Manure Management



Patz Slurry Manure Pump (left photo) and Compressed Air Manure Mover (above photo).

More farmers are turning to controlled manure management to save valuable nutrients and to make manure handling easier. And Patz has the equipment to help you move, store, spread and inject manure on your farm.

The Model 100 manure pump handles free-flowing manure and slurry with fine-cut bedding. Both the plunger and plunger sleeve can be serviced without concrete breakup.

The hopper loads by gutter cleaner or scraper. And a flapper valve at the end of the 12-inch PVC pipe in the storage facility prevents manure backup.

The Model 200 compressed air manure mover features a manually-operated hatch cover and a one-way valve at the bottom of the underground tank, so wear is minimal. An air compressor provides air pressure to agitate manure in the 1,700 U.S. gallon collection tank and then air pressure moves manure to your storage facility.

Want to know more? Your Patz dealer will show you how to make daily manure handling push-button easy with Patz.

Patz Pound, Wisconsin 54161 U.S.A.
Performance Strong as Steel

Amick, manager of Penn State's Milk Testing Laboratory, watches Lucy Tressler record somatic cell counts on a "barn sheet". The sheet, bound for a Pennsylvania dairyman, reflects butterfat and protein content of milk, as well as the possibility of mastitis.

Somatic cell count

(Continued from Page D27)

trols; when their milk was tested for fat content at Penn State, cell counts were also monitored, but herd managers received no cell count data and weren't aware that their cows were under study.

Eberhart and his colleagues found that cell counts for both groups, similar at the project's outset, began to diverge after six months. From then on, somatic cell numbers were substantially lower in pilot project herds than in controls, indicating that the informed dairymen reacted to SCC data by tightening mastitis control.

The research also examined reliability of cell counts as infection indicators.

Working with 28 Centre and Clinton county dairy herds - Stringer's was one - the researchers used logistic analysis to correlate presence of infection with somatic cell counts. As cell counts increased, so did the likelihood of major infection. Uninfected cows tended to have low somatic counts.

Within each cell count range, the probability of infection was higher in older than in younger animals.

Joe Stringer and many other dairymen say they feel their business is in better shape today because their cows are producing well, and milk is bring a premium price.

A healthy profit stems from a healthy herd, an end to which somatic cell counting contributes.

Food prices continue to moderate rise in cost of living

WASHINGTON, D.C. — After adjusting for seasonal variations, the January Consumer Price Index showed food prices unchanged from December. Thus, the 0.9 percent increase for food in the unadjusted CPI was a normal seasonal change, considerably less than the 1.5 percent increase in prices for non-food items.

According to USDA economists, food prices have risen less than half as fast as non-food prices during the last six months, thus helping to moderate the general rate of inflation.

Summarizing the Agricultural Outlook, economists of the Economics, Statistics, and Cooperatives Service note that while food prices will continue upward during 1980, they will rise at a significantly slower pace than prices for non-food items. The general economy is expected to continue sluggish in 1980, with a mild recession still in the outlook.

However, aggregate demand for food will probably be near last year's level. Consequently, prices for agricultural products will depend mainly on domestic supply and foreign demand factors.

Smaller supplies and higher prices are in prospect for beef and veal; however, larger supplies of pork and poultry will moderate price increases for these meats and for beef and veal as well--particularly in the first half of the year. Current supplies of fresh fruit, processed fruits and vegetables, and fats and oils suggest that prices for these products will rise much more slowly than the general inflation rate.

In 1979, net farm income totaled about $33 billion, up from $28 billion the year before. This year, cash receipts are forecast to rise a modest 5 percent, while production expenses surge ahead at near last year's rate. This combination will cause net farm income to decline in 1980, probably averaging in the mid-20's.

Agricultural exports will be record large this year, with volume possibly exceeding last year's level by 10 percent and value up to 16 percent. Wheat, feed grains, soybeans, rice, and cotton are all moving into export markets in larger amounts this year than last. Export sales to the developing countries are expected to increase the most.

Copies of "Agricultural Outlook" magazine (AO-52), approved by the World Food and Agricultural Outlook and Situation Board, will be available next week. For further information, contact Larry Van Meir at (202) 447-2317.

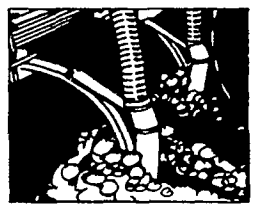
Switch fertilizer tanks

to a Calumet liquid manure spreader with soil injector.

Livestock manure is valuable. So it makes sense to keep as much of that value in the ground as possible. A Calumet 2 or 4-shank soil injector does just that. Teamed with a Calumet liquid manure spreader, the injector puts manure as deep as 12 inches. This can help retain four times the nitrogen that's lost with surface application, as well as reduce odors and runoff.



See the full line of Calumet spreaders from 1625 to 4500 gallons, and Calumet 2 and 4-shank soil injectors at—

Group asks USDA to oppose Labor Relations Act

WASHINGTON, D.C., — Agricultural Policy being developed for the 1980's should include a strong statement of opposition to extension of the National Labor Relations Act or similar legislation to agriculture, the Chairman of the Farm Labor Research Committee has told Secretary of Agriculture Bob Bergland.

Writing to the Secretary at the conclusion of the Agriculture Department's series of hearings on the "structure of agriculture," FLRC Chairman W.B. Camp pointed out that American agriculture is "the envy of the world."

Camp, who has over 60 years' experience as a farmer and representative of the United States at international agricultural meetings, emphasized that farm products provide the major positive element in the U.S. balance of trade.

"Productivity has increased steadily despite the vagaries of the weather, insect and disease outbreaks, and other factors which set agriculture apart from other industries," Camp wrote.

"One of these distinguishing factors is that agriculture remains free from government interference in farm labor-management relations, while industry has suffered under the National Labor Relations Act for 45 years," he continued.

The FLRC Chairman explained that the basic problem with labor law is that it organizes workers and employers into warring camps, treating workers' rights as bargaining chips and seriously interfering with the employer's right to run his own business.

"Industry's experience under the NLRA has shown that this atmosphere encourages violence and disruption," Camp said.

"In an effort to buy peace and protection from strikes and boycotts, employers often agree to union officials' demands for contracts requiring all employees to join a union or be fired from their jobs. Employees thus lose their fundamental freedom of choice, and employers subject themselves to further demands by union officials who literally control the workforce.

"Inflationary wage demands, featherbedding and made-work practices usually follow. As a result, many American-made goods have been priced off world markets.

"We know that your goal is formulating agricultural policy for the next decade is to enhance and productivity," Camp concluded to Secretary Bergland. "Keeping agriculture free from the constraints of federal labor law is vital to the achievement of that goal."

The Farm Labor Research Committee is a non-profit, non-partisan organization which researches and analyzes farm labor relations, paying particular attention to proposed legislation in this field.

William Baker receives Jersey calf

FLEMINGTON, N.J. — William Baker, 19, of Rick Road, Alexandria Township, recently received a registered Jersey Calf for his ten years of participation in Hunterdon County's 4-H dairy project, and his interest in Jersey cows.

The calf was presented to Bill by John Bishop, of Ogston Farm, Columbus, N.J , on behalf of the Jersey Cow Association of New Jersey.

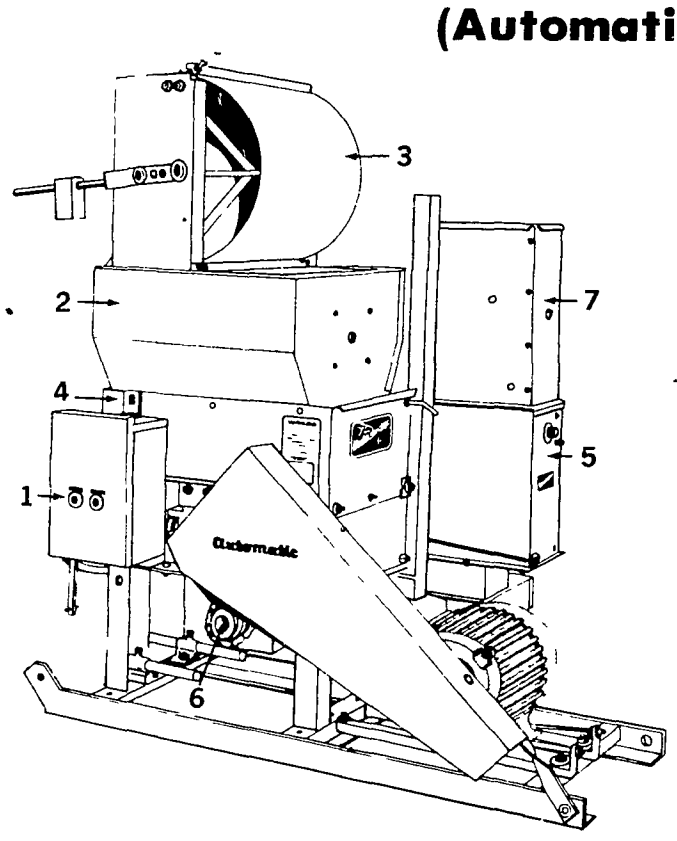
Bill bought his first Jersey heifer in 1969. Since then he has acquired other heifers and bred them. His awards have included Grand Champion Cow at the 1979 Hunterdon County 4-H Dairy Show and Reserve Grand Champion at the State FFA Show.

Bill has been a member of the Milford 4-H Dairy Club for ten years and has served as its president and as treasurer of the Hunterdon County 4-H Dairy Council.

Automatic

ELECTRIC FEED PROCESSOR

(Automation Mill)



Process and blend 3 or more Ingredients at one time!

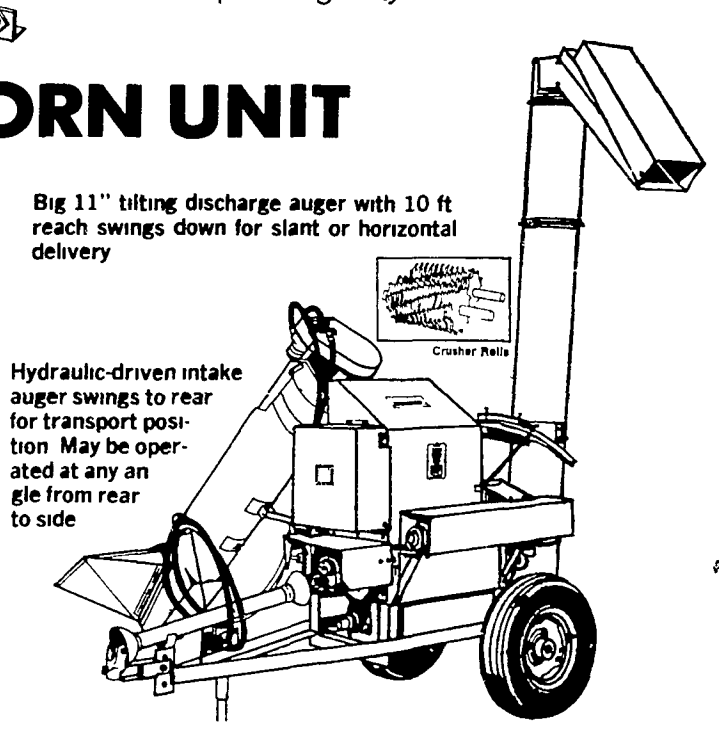
(1) Control center (Type III timer system) predetermines and records amount of feed grain (2) Bin Switch regulates input auger, automatically controls grain level in hopper, (not visible), (3) Automatic scale meters preset amount of grain through roller mill, operates automatically and continuously without power, (4) Automatic Roller mill with fast-roll attachment rolls grain, (5) Dial-controlled variable speed augers in electronic meter let you add protein, mineral or medication into mixing auger; (6) Mixing auger mixes and delivers processed feed to take-away auger Supply auger and mill processed preset amount of grain, (7) Accessory hopper with flow switch.

Note: The Automatic Dump Scale and feed metering units may be gravity fed from overhead bins or hoppers. Flow-control switches are required if input augers are used in place of gravity flow.

EAR CORN UNIT

Automatic's ear corn unit handles wet, shucky and even frozen ear corn The crusher unit shreds the cob followed by rollers that crack the corn, producing a flaky, dust-free feed for greater digestibility The hydraulically- driven intake auger swings to the rear for transport and may be operated at any angle from rear to side

Dust-free rolled grain is more palatable, easier to digest, eliminates wheezing and many digestive disorders.



Big 11" tilting discharge auger with 10 ft reach swings down for slant or horizontal delivery
Crusher Rolls
Hydraulic-driven intake auger swings to rear for transport position May be operated at any angle from rear to side

Senate Committee approves reopening reserve

WASHINGTON, D.C. — The Senate Committee on Agriculture, Nutrition, and Forestry Thursday approved legislation to open on a limited basis the farmer-held grain reserve to producers of 1979 corn and wheat who did not participate in last year's "set aside."

As an incentive to gasohol production, the Committee also approved a provision to authorize the sale of corn owned by the Commodity Credit Corporation for conversion into alcohol fuel at not less than the grain reserve release price, currently $2.63 per bushel.

The Committee action came at the conclusion of hearings on a number of bills aimed at easing the impact of the Russian grain embargo on American farmers. The Department of Agriculture endorsed both provisions of the bill.

The bill is a modification of two provisions in an eight-point legislative program proposed by Sen. Herman E. Talmadge (D-Ga.), chairman of the Committee, to give the Carter Administration increased authority to assist farmers adversely affected by the embargo.

Talmadge said Thursday's action does not preclude consideration by the Committee of further legislative proposals dealing with the embargo.

The bill would give the secretary of agriculture discretionary authority to open the grain reserve program for a limited quantity of 1979 wheat and corn produced by farmers who did set aside – leave idle – cropland last year.

Howard W. Hjort, the Department of Agriculture's chief economist, estimated that a maximum of 5 to 10 million tons of additional corn would be taken into the reserve program under the bill.

The Administration did not request the opening of the program for wheat, but did not oppose an amendment sponsored by Sen. David L. Boren (D-Okla.) to place that commodity on the same footing as corn.

Under the farmer-held reserve program, participating producers receive a loan (currently $2.10 per bushel for corn and $2.50 for wheat) when the grain goes into storage and are paid storage fees. Grain is released back to producers from the reserve when market prices reach certain pre-set levels and the producer repays the loan.

Under existing law, farmers who do not idle acres when a set-aside is in effect are ineligible to participate in the reserve or to receive price support loans.

The bill as approved by the Committee Thursday would not extend price support loans to non-complying 1979 producers other than through the grain reserve.

Adams Forum views energy sources

LITTLESTOWN — "Energy Sources for the 80's", a discussion of alternative energy sources, was the theme for the second annual Adams County Farm Forum, on March 4. Topics included the harnessing of solar energy and the on-farm production of ethanol and methane gas.

Robert LaTurner of Gailsburg, Ill, president of ACI Builders, used color slides to illustrate passive solar-heated buildings. While most of the buildings are designed as hog houses, farm shops or grain drying facilities, he did present several conventionally-appearing homes.

"Because southern Pennsylvania is at about the same longitude as Illinois, you should realize 800 B.T.U. per square foot per day more than justifies the installation of a solar energy system," said La Turner.

La Turner encouraged farmers to develop long range farmstead improvement plans then work to reach these goals. He pointed to the benefits of solar application to grain drying and predicted that flat floor storage will be the trend of the future in handling grain. He told how swine producers could save 70 to 90 percent on their heating bill for nursery barns with a solar collector and a distribution system which assured warm air for the baby pigs.

"Farmers, long recognized as the supplier of food and fiber, will plan an increasingly important role in fuel production as energy costs rise," said John Martin, design engineer for the firm of Sheaffer and Roland, Chicago, Ill., who spoke on alcohol production on the farm and methane as an energy source.

"Farmers who are in a position to feed the brewer's grain by-product as it is produced will enjoy a distinct advantage," said Martin.

He pointed out that present fuel oil prices did not provide a sufficient profit margin for farmers to produce ethanol for fuel.

The program concluded with a tour to Mason-Dixon Farms to see a methane generator in operation.

Broiler placements continue climb

HARRISBURG — Placements of broiler chicks in the commonwealth during the week ending February 23 totaled 2,303,000, according to the Pennsylvania Crop Reporting Service. The placements were six percent above the corresponding week a year ago.

Placements in Pennsylvania were also eight percent above the previous week. Average placements during the past nine weeks were three percent above a year earlier.

In the 21 key poultry producing states, placements of broiler chicks during the week were 81,172,000, three percent above the previous week and nine percent above the same week in 1979. Average placements in the 21 states during the past nine weeks were six percent above a year ago.

Broiler fryers slaughtered in Pennsylvania under federal inspection during the week ending February 13, totaled 1,733,000, with an average liveweight of 4.07 pounds.

Faber advises lower sow stress for better litters

FORT WAYNE, Ind. — Minimizing sow stresses before and during lactation can help wean more pigs per litter, says Jerry Faber, swine research specialist, for Master Mix.

"Stress factors at farrowing, including changes in surroundings and feed, increased environmental temperature, and reduced activity trigger hormonal reactions in the sow's system," Faber explains. "These reactions reduce resistance to infection, depress protein metabolism and interfere with the sow's ability to utilize certain nutrients The end results are poorer health, decreased milk production and reduced weaning percentages."

Faber suggests that hog producers begin stress-minimizing practices during the gestation period. To cut down fighting and injury, and insure adequate feed intake, he recommends that gestation pens be limited to ten or fewer sows per pen, with a minimum floor area of 14 to 20 square feet.

Ideally, gestating sows should be housed in individual crates or stalls to eliminate fighting and to control feed intake, Faber says. Even if individual gestation pens are not practical, the researcher recommends that provisions be made for gestating sows to be fed individually.

"Eight years of work at the Master Mix Swine Research Farm has shown that individually-fed sows stay in the breeding herd at least one litter longer than group-fed sows," Faber explains.

"Proper body conditioning and weight gains (gilts 70 to 100 lbs. and sows of 30 to 60 lbs.) are critical for minimizing stress of farrowing. Producers should feed a nutritionally balanced ration which will build adequate body stores of all nutrients without excessive fat building," he continues. In cold weather it may be necessary to increase feed intake by one to two pounds per day, however."

In addition, an external parasite eradication program should be followed during gestation, and sows should be wormed at least two weeks before entering the farrowing house.

The sow should be moved to the farrowing environment at least four days before her due date, to allow her to adjust to the new environment.

"Constipation is one of the biggest stress symptoms in the farrowing house," Faber says. When sows are constipated prior to farrowing, they'll be restless, won't eat properly, and will be susceptible to fever and infections after farrowing."

To avoid constipation, Faber recommends feeding a highly palatable, laxative ration at a moderate level of six lbs., fed at two equal feedings per day. A medicated feed will further combat infection and disease organisms.

"The farrowing room should be maintained at a temperature comfortable for the sow, between 60 and 75 degrees, and kept free of drafts. Warmer temperatures will depress feed intake and milk production," Faber continues.

At farrowing, room noise and activity should be kept to a minimum. The area should be kept clean and dry for general comfort and sure footing.

"Woven wire flooring, because of the clean environment and sure footing it provides, has been shown to decrease sow stress during lactation. Since baby pigs are more healthy and nurse more vigorously and because of the clean environment, sow MMA symptoms are reduced," Faber says.

After farrowing, the sow feeding level should be increased gradually to a level of 4 lbs. per sow plus one lb. per nursing pig. If sows are extremely restless, however, full feed may be offered immediately.

To further reduce stress during lactation, pig needle teeth should be clipped on the first day after farrowing, Faber concludes.

USDA begins purchase of grain

WASHINGTON, D.C. — Secretary of Agriculture Bob Bergland today announced the U.S. Department of Agriculture will buy wheat and corn suspended from shipment to the Soviet Union.

On Friday, March 7, the Commodity Credit Corporation first offered to buy wheat. Purchases will continue until a quantity equal to that suspended from shipment to the USSR has been removed from the market.

The classes of wheat purchased will be based on P.L. 480 program needs. Offers will be accepted at prevailing market prices.

"Our plan is to use the wheat bought by CCC for overseas food assistance programs. To this end it is essential Congress approve legislation requested by the administration to establish a food security reserve so the quantities acquired can be transferred to that special food reserve," Bergland said.

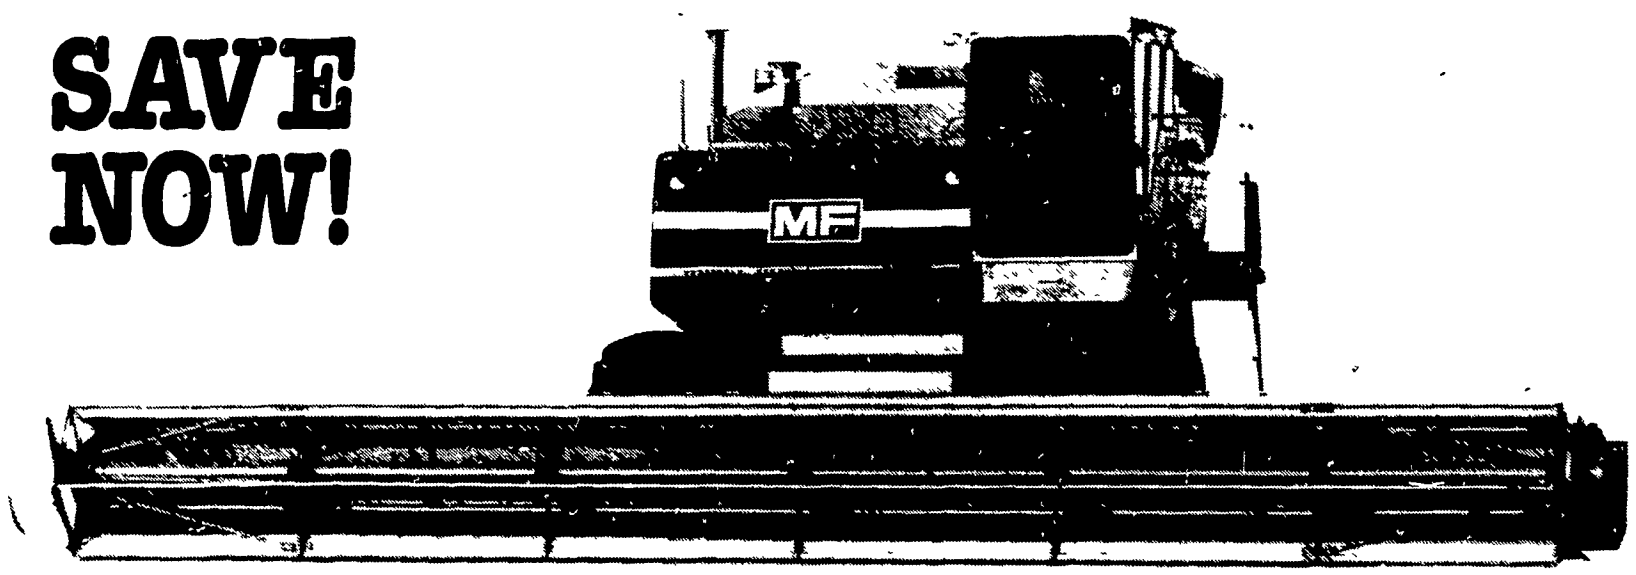
Bergland said a direct purchase program would also be implemented for corn. This will complement the incentives already announced to encourage increased participation in the farmer-owned reserve, he said.

"Since January 7, an additional 3.3 million tons of corn have entered our farmer-owned reserve program and thereby have been isolated from the market. We are continuing to encourage farmers to place additional quantities of corn in the reserve program.

"However, to achieve our goal of removing all of the corn once destined for the USSR from the market, we will begin making offers to directly purchase corn. The first offer will be made by the middle of this month and bids will continue on a regular basis. Acceptances will be made based on prevailing market prices," Bergland said.

Offers to buy the grain will be made by the Kansas City Commodity Office of USDA's Agricultural Stabilization and Conservation Service.

SAVE NOW!



Special factory allowance on MF combines

The factory is giving special allowances on new Massey-Ferguson combines. This means you can get big savings on our crop-saving MF 540 and 550 combines . . . and on the big-capacity MF 750 and 760 models These savings make our everyday good deals even better!

Step up to the combine leader that can make your high-yield fields come clean. Choose from 37" to 60" - wide cylinders to match your needs. Plus all the features you want to give you the best possible return on your combine investment.

You'll get a better deal than ever now, with our special factory allowances. But you'd better hurry, offer expires May 2, 1980.

First Nat'l Charloais sale nets $110 grand

SAN ANTONIO, Tex. — Consignors representing 17 states, assembled to sell 31 top quality Charolais lots to buyers from 15 states, Mexico and Canada, producing a grand sale total of $110,050 for the first National Charolais Sale.

Sponsored by the American-International Charolais Association, the national sale was held in conjunction with the Association's 23rd Annual Membership Meeting and 11th National Charolais Show in San Antonio, Texas.

MF Ms Courage 8254, sired by Courage out of a Nutmegs Avignon FR 31 daughter, topped the national sale at $12,500. Purchasers of this female were Costerisan Farms, Bakersfield, Ca., Giess Cattle Company, Arnold, Kans., and L K Charolais, Meeker, Colo. This outstanding female, consigned by Gentry's Double Hook Ranch, Whitman, Neb., and Miller Farm, Oceola, Iowa, will be used in an embryo transplant in the spring 1981.

Half interst and full possession of FF Realist 0120, an HCR Expectation 269 son, sold for $7,000 to Dr. James L. Smith, Little Rock, Ark. Fairfield Plantation, Jonestown, Miss., was consignor of this top selling bull.

Second highest selling female at $5,400 was purchased by Arlitt Land and Cattle Company, San Antonio, Texas. Double Hook Ms Courage 8350, a November '78 daughter of Courage was consigned to the National event by Gentry's Double Hook Ranch.

Boscamp's Arrowhead Ranch, Gonzales, Texas, purchased Silver Creek Beauty 124, a May '78 daughter of LRC Perfecto 782 Polled, for $4,750. Safe in Calf to Silver Creek Viking RCF, this female was consigned by Silver Creek Farms, Blue Mounds, Wis.

Magnolia, sired by Ideal, was a January '79 Macho calf at side, made an attractive package, selling at $4,500 to Juan Romero Huxley, Monterrey, Mexico. The pair was consigned by Labar Charolais, Harlingen, Texas. Huxley also purchased Eye Hill Hanna 40G at $4,500. A July '75 daughter of Hannibal, she was consigned by Ware Charolais Ranch, Harperville, Miss.

Other consignors to the National Sale include: Minute Man Farms, Yerington, Nev.; Scattered Oaks Ranch, Bleiblerville, Tex.; John Fletcher Polled Charolais, Concord, N.C.; Barksdale Charolais, Houston; Linda Dickerson Trust, Altoona, Pa.; Hubert Charolais Ranches, Monument, Kans.; Wesson Charolais Inc., Koshkonong, Mo.; Reveille Charolais, Taylorsville, Ga.; Rainbow's End Ranch, Douglass, Ariz.; 4J Charolais Ranch, Big Creek, Miss.; Bauman Ranch, Carpenter, Wyo.; Royal Charolais Company, Youngwood, Pa.; 5-K Ranch, Seminole, Okla.; Lockert's Grand View Farms, Hanover, Ill.; La Fraise Farms, Flanagan, Ill.; 4-L Charolais, Kilgore, Texas; 21 Ranch, Chickasha, Okla.; Marti Charolais, Cleburne, Texas; Toro Plata Charolais and Charbray Ranch, Richmond, Texas; AVI Ranch, Seminole, Texas; Charolake Charolais Ranch, Cleburne, and Casey Charolais Company, Cedartown, Ga.

Delaware to choose soybean board

DOVER, Del. — Delaware soybean producers are electing the State's first Soybean Advisory Board. Voting deadline is March 15, 1980.

Ballots to select members to this board were mailed to Delaware growers on February 29, according to Secretary Alden S. Hopkins, Jr.

Secretary Hopkins explained that any soybean producers who have not recieved a ballot in the mail, may obtain one from the Delaware Department of Agriculture or their County Extension Service Office.

Superbugs: A New Biblical Plague?

Insects, once decimated by pesticides, have developed immunities enabling them to multiply at a fantastic pace, posing a threat to world crops

It's a long road that has no turning! And the greed for more and more goods, bigger and bigger barns of materialism are now generating a creeping chaos that will become a **consuming catastrophe!**

This news does not make the headlines of the paper. To do so would generate panic. But in our modern, progressive society . . .to tax our productive earth to the limit at greater profits . . . **WE HAVE CREATED THE SUPERBUG!**

For years Texas farmers kept bugs under control by spraying them with dangerous chemicals. Suddenly last year . . . **the bugs became immune to the chemicals and ate them along with the produce!** Farmers panicked . . . sprayed their fields as much as **50 times** with powerful insecticides . . . with little effect! (And you ate that produce! But you won't become a super bug! Rather, you will, over the years, be struck with a host of inexplainable illnesses!)

The bugs devoured much of the Texas cotton crop. Then they marched to Mexico and gobbled up a million more acres of cotton. Then they marched through the lush Imperial Valley (America's vegetable bowl) and chomped their way through some **5 billion pounds** of lettuce . . . ¾ths of the nation's crop! All seemed lost until the chemical companies came up with a NEW POISON to thwart the assault temporarily. ***And you ate that lettuce!***

The United Nations Environment Program has defined 364 **Superbugs** (223 are agricultural pests that attack crops; 141 spread disease to livestock or humans).

Above is a word for word reprint of an article in a journal. It is just one of the many reasons for going back to nature. Read Joel 2. The Bible says in Proverbs:

"THE CURSE CAUSELESS SHALL NOT COME"

Thousands of farmers and vegetable growers are proving you can get big bountiful crops without bugs, without chemicals, those crops that other farmers have to spray to keep the bugs off. And it so happens that the better way is also the cheaper way. Excuse me, it doesn't just happen. It is designed that way by the Master and Creator as a blessing and reward for obedience to natural law. At least our program is cheaper. Ask us for literature about our products and materials that do so extra good, so economically. You'll be amazed.

Some wonder why not more people are farming this way. It is partly because they think it is too good to be true, but it isn't. They think it just happens. But it doesn't. It is fulfilling the laws of cause and effect. However, many are changing over and they are happy as a lark. Y not U prove it 2? Then you know whether you should put the whole farm in it in 1981.

USDA seeks to change in meat, poultry labeling

WASHINGTON, D.C. — A regulation proposed today by the U.S. Department of Agriculture would assure meat and poultry plant operators of equitable treatment of all applications submitted to USDA for label approval, according to Assistant Secretary of Agriculture Carol Tucker Foreman.

Foreman said this proposal is the first in a series of major USDA food labeling reforms.

"The revised policy maintains the integrity of the labeling system — a system that protects the consumer by careful review of every label for a meat or poultry product," Foreman said. She said the propsed change is in line with recommendations made by USDA's inspector general.

Pre-market approval by USDA's Food Safety and Quality Service is required by the agency for all labels to be used on federally inspected meat and poultry products. Currently, many applications are hand-carried by plant personnel or their representatives, and are often processed before those applications arriving by mail.

"Under the proposal, all applications would be reviewed in the order in which they are received, regardless of the manner of delivery," said Foreman. "Overall, the turn-around time for label review would decrease significantly."

Applications delivered both by mail and in-person would be grouped together and reviewed on a daily basis. Processed applications would be returned by mail unless applicants make special arrangements to pick up the documents.

Exceptions to the first-come, first-serve policy would be granted only in case of emergency, such as meeting deadlines for military or other government agency needs.

A similar regulation was proposed June 20, 1974, but never made final. FSQS officials said it is appropriate to solicit additional information. Although USDA has the authority to amend an internal procedure such as this without public input, Foreman said it is in the public interest to accept comments for 60 days.

Under the Federal Meat Inspection Act and the Poultry Products Inspection Act, FSQS has the authority to establish procedures for the review and approval of all labels to be used on federally inspected meat and poultry products.

Comments on the proposal should be submitted by April 28 to the executive secretariat, attention: Annie Johnson, room 3807-S, FSQS, USDA, Washington, D.C. 20250.

For more information contact Robert Hibbert, acting director, Meat and Poultry Standards and Labeling Division, Compliance, FSQS, USDA, Washington, D.C. 20250, (202) 447-6042.

Notice of this proposal was published in the Feb. 2 Federal Register.

Farm Bureau to assess beef programs

WASHINGTON, D.C., — The American Farm Bureau Federation has announced plans to expand its efforts to strengthen the National Live Stock and Meat Board and the U.S. Meat Export Federation programs.

Noting the recent defeat of the beef referendum to determine whether producers wished to approve an assessment on the value of cattle sold to support a national Beef Research and Information Program, Robert B. Delano, president of the American Farm Bureau Federation, said, "Beef producers have voiced their opinion with respect to collection of research and promotion funds for the industry through the type of program voted upon in February.

"This increases the need for the cattle industry to support the research and domestic promotion programs carried out by the National Live Stock and Meat Board and the export promotion program carried out by the U.S. Meat Export Federation.

"AFBF will continue to encourage more cattle producers and feeders, market agencies, and meat packers to support the Meat Board program and encourage additional state Farm Bureaus to join the U.S. Meat Export Federation," Delano added.

Farm Bureau, the nation's largest farm organization, also will call a meeting of beef industry organizations to consider methods of working together to strengthen existing research and promotion programs, the farm leader said.

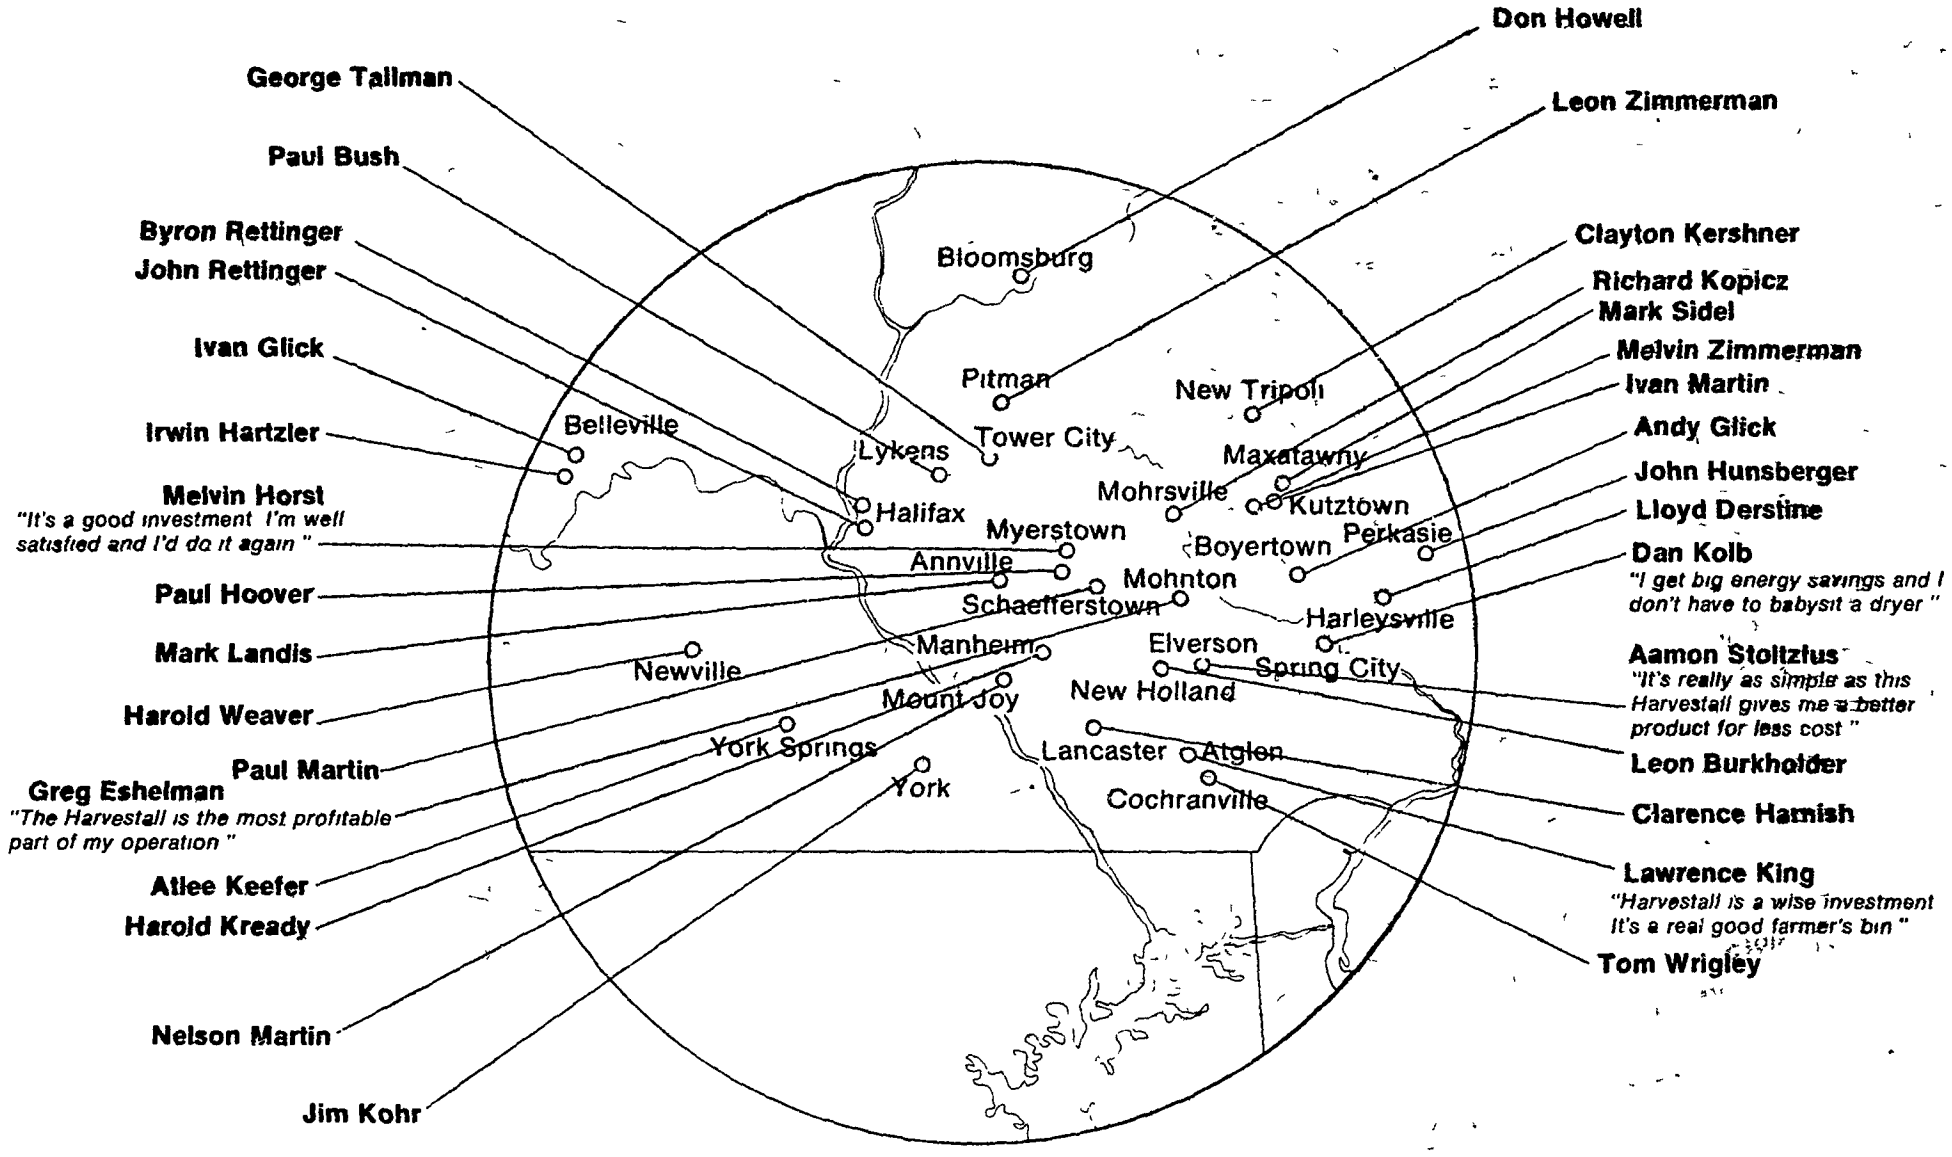
Come & Hear
Harvestall Chillcuring
Straight Talk



Some of these Harvestall owners will be at a Special Noon Dinner Meeting near you soon. Come and find out from them how they are achieving great savings and getting a better product too.

If you are in the market for grain storage, you can't do better than Harvestall. The Harvestall Grain Chillcuring system will save you!

- ***MONEY** — Savings in operating cost plus reduced grain shrinkage (compared to heat drying) will totally pay for the system in five years or less in most cases.*
- ***ENERGY** — The Harvestall uses only electricity, about 1½ kw hrs. per bushel. There is absolutely no gas or oil to buy.*
- ***GRAIN** — Because this is natural air drying, there is no heat damage, and no shrinkage due to loss of dry matter. Harvestall is slow and gentle to the grain, just like nature. So you get the maximum nutritional value.*
- ***TIME** — Grain is moved only once, from the field to the bin. At harvest there is no bottleneck resulting in a big saving in time and labor.*
- ***AGGRIVATION** — The Harvestall is so simple it almost takes care of itself. It's virtually maintenance free because the only moving parts are the fans.*

ARE HIGH SUPPLEMENT PRICES GETTING YOU DOWN

Switch to Mol-Mix liquid supplements. . .the money-saving way to insure maximum feed efficiency. Puts low-cost gains on your beef cattle and sheep, gets top production from your dairy herd.

Mol-Mix is a cane molasses-based supplement . . .a powerhouse of energy, protein, vitamins, and trace minerals. . .all in liquid form for quicker digestion and use. Mol-Mix is easier to handle, too. . .saves you trouble, time, and labor costs.

NOW FORTIFIED
with a new combination of power-packed ingredients.
Distillers Solubles Phosphoric Acid
Condensed Fermented Corn Extractives
Ammonium Polyphosphate

Join the crowd. Join the trend. Join the growing number of satisfied Mol-Mix customers.
For more information see us today.

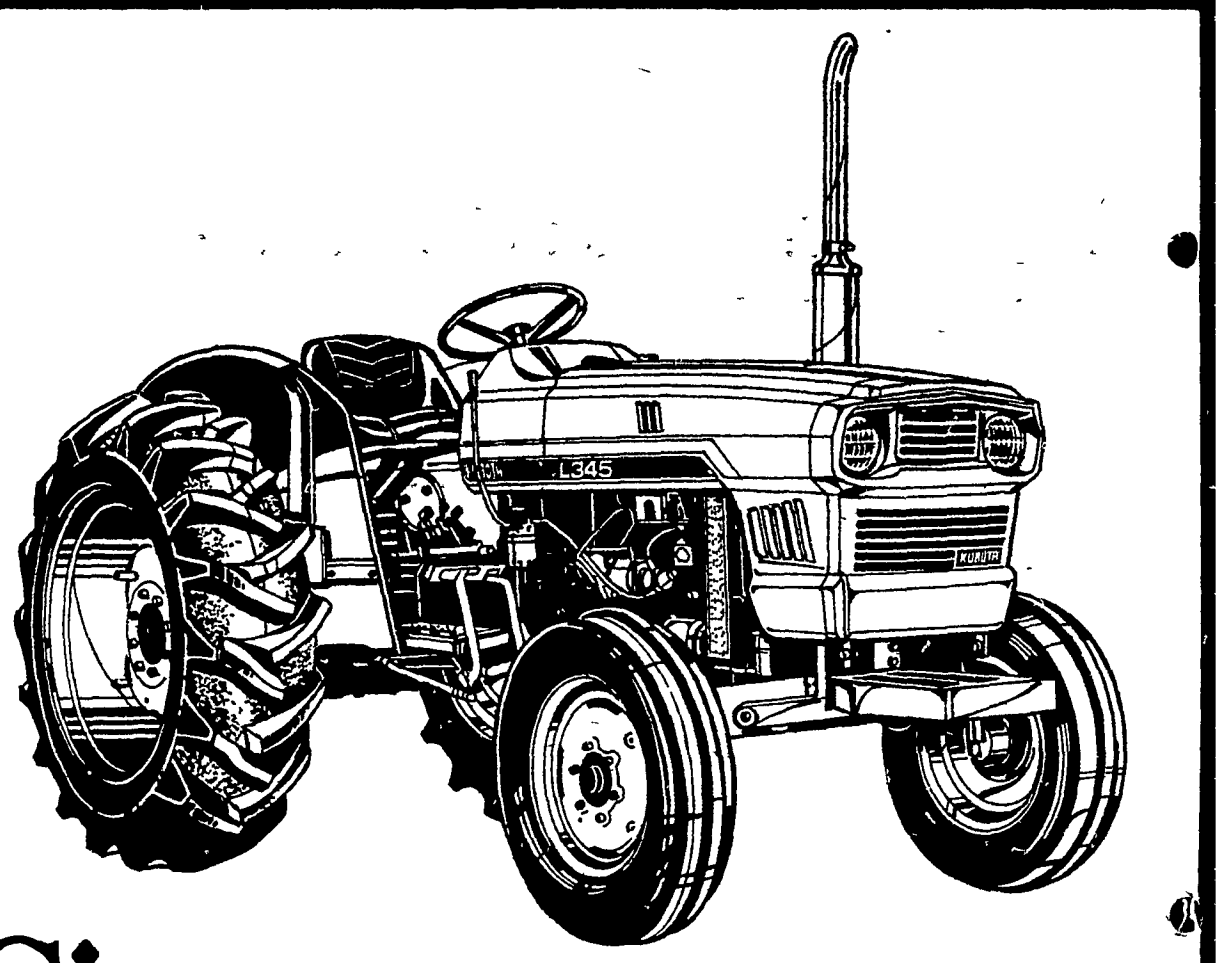
Mol-Mix® liquid supplements the liquid leader



Sit on an orange.

Our orange Kubota L345 can handle a plow, cultivator, front-loader, front blade, rear-mount mower, back hoe, and a host of other implements.

Standard features on both the two and four wheel drive models include live rear PTO, draft and position control, power steering, and the 34 hp 4-cylinder version of Kubota's notoriously durable diesel engine.

The best way to insure you don't end up sitting on a lemon is to get an orange.

We're looking for work.
KUBOTA

USDA cancels paid diversion for 1980 feed grain crops

WASHINGTON, D.C. — Secretary of Agriculture Bob Bergland last Friday announced the U.S. Department of Agriculture will not institute a paid land diversion program for the 1980 crops of wheat, corn and other feed grains.

He said the decision was based on prospects for continued growth in the world consumption requirement for these crops "Our grain exports will be at record levels this year and will continue to grow in the future," Bergland said.

"While U.S. producers enjoyed record large production in 1979-80, world production of grain actually declined. This has boosted demand for U.S. crops," Bergland said.

"According to our estimates, we are expecting U.S. feed grain exports to reach a record 68 million tons in this marketing year and U.S. wheat exports to total 36 million tons—also a record amount."

"Obviously, we cannot make any precise estimates of what 1980 world feed grain production will be but we know world grain demand will continue to grow. As long as we have adequate supplies, we can expect our exports to continue to increase. World grain stocks are declining this year and prices are higher than a year ago," Bergland said. "Stocks are likely to decline again in 1980-81," he said

"The actions the administration took in January to suspend shipments of agricultural products to the Soviet Union above the eight million tons allowed under the U.S.-USSR Grains Supply Agreement have not fundamentally altered the long-range supply-demand picture for U.S. agriculture," Bergland said.

Swedes may be the world's leading apartment-dwellers Two of every three of Sweden's 8,273,000 people live in apartments, the National Geographic Society says

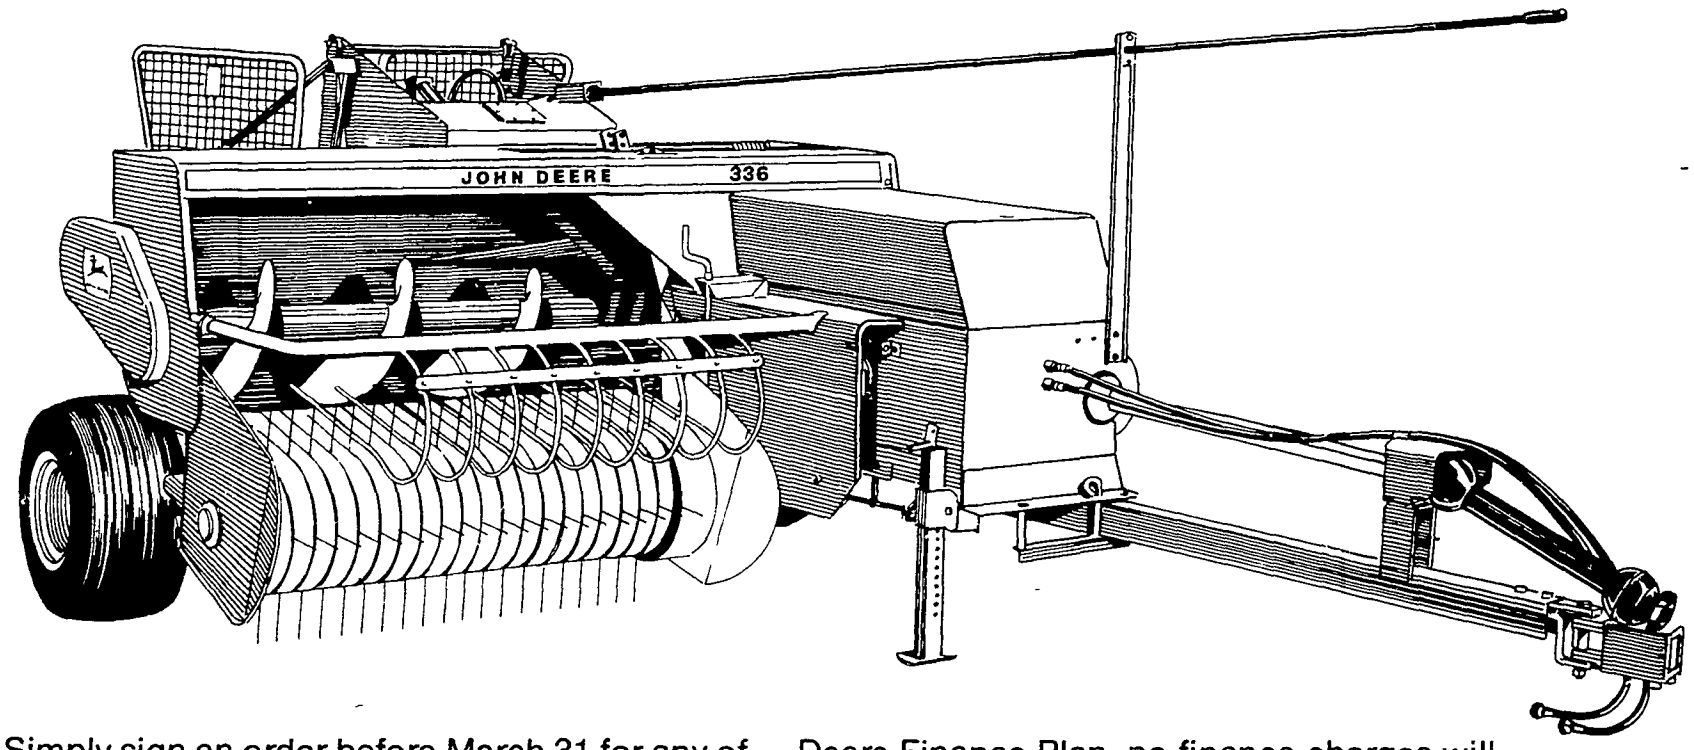
BONUS 1980

Act fast: First-period bonuses of up to $600 on this John Deere equipment must end March 31



Simply sign an order before March 31 for any of the new John Deere equipment listed here — disks, chisel plows, or hay or forage equipment. First-period bonuses will qualify you for $75 to $600 in John Deere money you can spend for goods or services at our store. Your bonus John Deere money will be mailed to you after you take delivery.

What's more, you'll get price protection on any equipment listed here. If you use the John Deere Finance Plan, no finance charges will accrue on any equipment in the program until the first day of the month which begins the 1980 use season in our area.

To get your bonus John Deere money, choose your disk, chisel plow, or hay or forage equipment from this list and order before March ends.

You'll be expected to take delivery of the equipment as soon as it's available.

BUYER BONUS IN JOHN DEERE MONEY FOR NEW EQUIPMENT ORDERS SIGNED DURING:*	
EQUIPMENT:	**MARCH '80**
DISKS:	
111 and 115	$ 75
210, 215, 310, 315, 340, 1630	$150
220, 230, 235, 350, 440, 455, 1640	$225
331 and 360	$375
370	$500
CHISEL PLOWS:	
1610 Integral Rigid, 1610 Drawn Rigid (11- thru 17-foot)	$ 75
1610 Drawn Rigid (19- thru 23-foot), 1610 Drawn Flexible (23- thru 27-foot)	$200
1610 Drawn Flexible (29- thru 41-foot)	$300
1650 Folding	$600
BALERS:	
All Square and Round Balers	$225

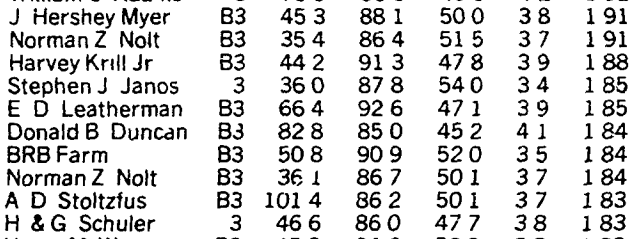
GALVANIZED EXPANDABLE METAL FLOORING

FOR

Nursery, Fattening, Gestation, Breeding, Calves, Sheep, Lambs, Dog runs, Greenhouse Tables.



Swinex "A" ¾" - #8 - 4'x8' & 4' x10'
Swinex "B" ¾" - #9 - 4'x8' & 4'x10'
Swinex "C" -#11 - 4'x8'

EXPANDED METAL HAS MANY ADVANTAGES OVER OTHER FLOORING SYSTEMS. FOR EXAMPLE:

- Foot problems are reduced, compared with solid concrete or concrete slat flooring
- Expanded metal "self-cleans" and stays dry better than any other flooring we've evaluated As a result, bacteria buildup is minimized, which improves conception rates and overall herd health
- Boars and sows have better footing during breeding, compared with breeding on grooved concrete floors

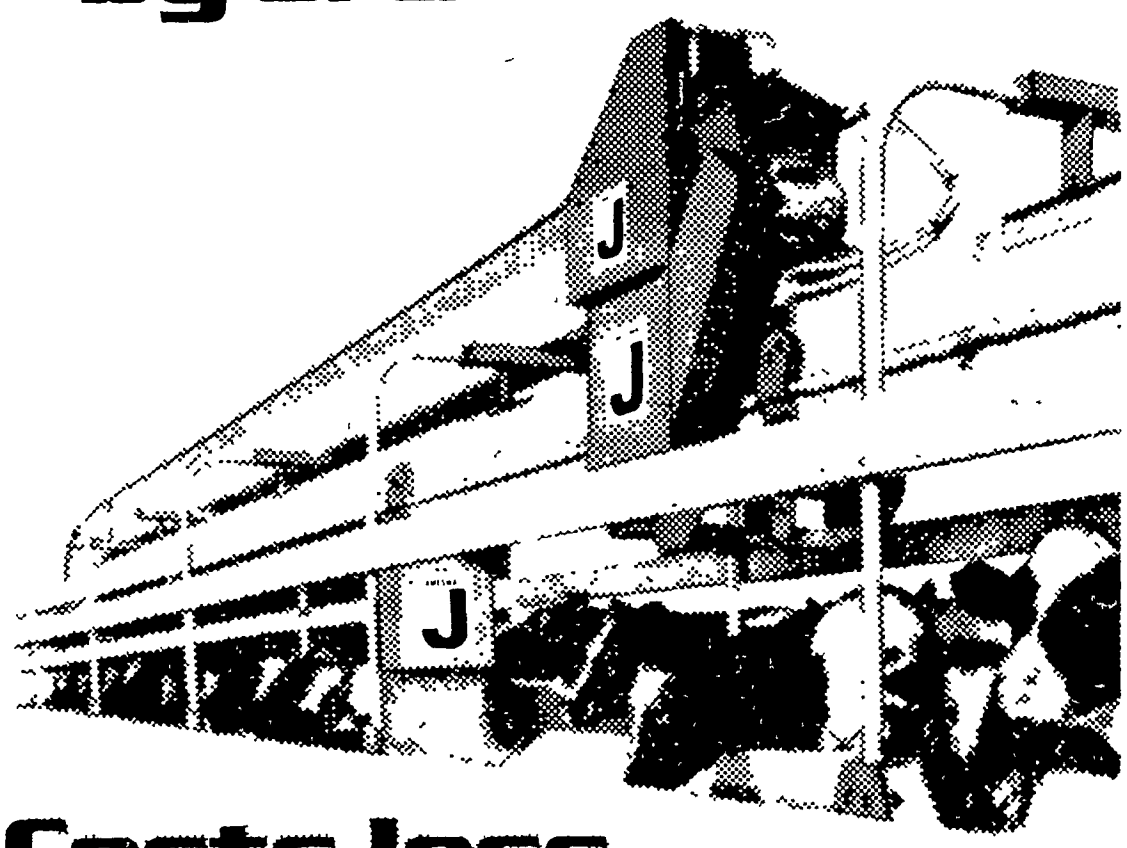
Volume-Belt® cattle feeder by JAMESWAY®



Costs less

Simple design gives you big-capacity performance at a lower cost per foot than other feeders in its class. Few moving parts to cause feeding slowdowns. Takes only 1 hp to load up a 190 ft. bunk, so you save on power costs while you save feeding time. Fast, quiet and dependable, too.

See us for systems and service that help make the good life better.

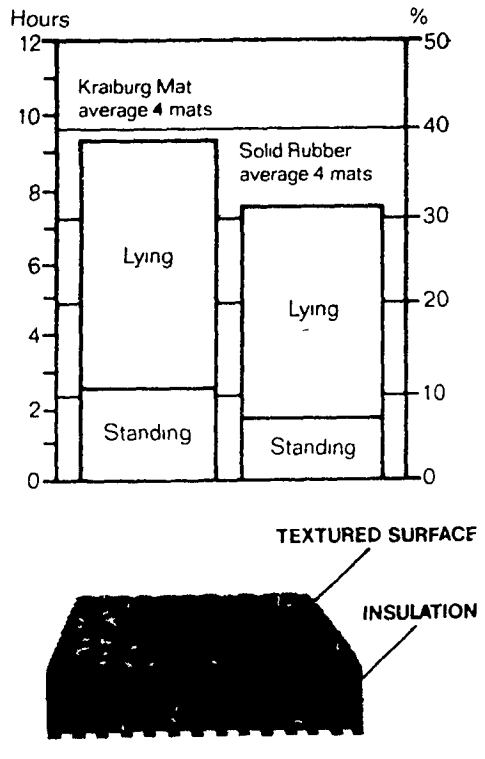
Kraiburg Happy MooMats Keep Cows Happy, Resting...and Profitable!

The installation of our mats in your free stall or stanchion barn doesn't just save you time, which is money, it helps your herd give more milk, which means added profit! And more! Just look at the following:



Elastic comfort surface. Our advanced rubber chemistry and design groups have developed a surface and a rubber understructure that provides a pleasant lying surface and results in noticeably increased milk yield. Testing has shown that increased milk yield results from increased comfort in lying and standing time Details available on written request

Sanitary non-porous texture. Resists barnyard acids, trapping of bacteria and disease Reduces barn odors

"Sure-grip" textured surface. Specially developed tread surface gives solid footing, protection against udder injuries, abrasions and sore hocks

Excellent heat loss resistance. Keeps cows' body heat from dissipating Thermal insulation action rejects cold and dampness from concrete underflooring and minimizes mastitis

Saves bedding materials. Reduces yearly bedding costs by up to $7,000 00 per 100 cows

No bulging, edge or hair cracks. Superior compounding and proper ¾" thickness provide insurance against wear, aging and loss of service

10 Year Warranty Program. Because Kraiburg products are carefully manufactured and have been thoroughly tested, we back every cow mat sold with a Ten Year Warranty.

Available in 10 sizes

7-7 2x 365D 21,560M 4.4% 939BF

RUMLER is quite a bull. HFA codes RUMLER a number one for: fore udder, hind legs, feet, rump, back and head. The ABS Genetic Trait Summary shows RUMLER to sire outstanding udder center support, and stature.

In a nutshell, RUMLER sires tall, great uddered cows with that good dairy rib.

Call your local ABS Representative for RUMLER. He is priced at only $6.00 per unit.

Schuylkill County DHIA Monthly Report

January 1980

The following herds are reported from the IBM report for January 1980 A total of 1618 cows were tested

Only herds averaging 1 4 pounds of milkfat per cow per day or over, and on an official program are reported

The report on individual cows includes only those reported and producing over 600 pounds of milkfat

North Jersey to hold youth conference

FLEMINGTON, N.J. — The annual North Jersey Youth Conference has been scheduled for March 21-23 at the Ramada Inn in Fairfield.

NJYC is a 4-H experience organized by 4-H teenagers for themselves and their peers. It gives the participants the opportunity to learn about and discuss issues affecting today's living in workshops lead by an authority on that subject.

The theme for this year's conference is "The Future is Now"

The conference is open to teenagers from 14 to 19 years old. Besides the many workshops of which four are chosen, there will be a get-acquainted party on Friday night and a dinner dance on Saturday night. During free time the participants will be able to bowl, swim, play tennis or use the hotel's sauna.

For further information and application, contact Ray Nichols, 4-H Agent, R.D. 6, Box 48, Flemington, N.J. 08822, or phone: (201) 788-1340 or 1341

Boots and Saddles Club meets

LANCASTER — The Boots and Saddles Horse and Pony Club held its February meeting at the Farm and Home Center in Lancaster.

James Watts, announced plans to hold an open horse show on April 26, rain or shine, at the Lower Hopewell Horse Center. The twenty-six classes planned include both English and Western riding and a few "fun" classes. Sheets listing the classes and sponsor applications were distributed to the club members.

Watts also mentioned that the club will have a used tack and clothing sale at the show. Anyone interested in sponsoring a class or who has items for the tack and clothing sale is asked to contact Joyce Watts 717-626-2316.

John Brosey, a local farrier, was the guest speaker. He used large drawings to demonstrate hoof problems such as thrush, contracted heel, ringbone, and navicular diesease.

Junior club members Jessica Watts and Janet Wheat gave a demonstration on mounting, both English and Western. Other junior members will be presenting their demonstrations

Anyone interested in joining the Boots and Saddles 4-H club may contact Rose Fellenbaum, 717-569-3068 for more information.

Elanco farmers set corn, hay meeting

TERRE HILL — The Garden Spot Adult Farmer Program will sponsor a corn and hay management meeting on March 18, 1980, at 7:30 p.m. at the Union Grove School.

Speaker for the evening will be John Weidman from Pioneer Seed Company He will discuss current corn management practices and new developments in corn breeding.

Weidman, along with Don Robinson, Adult Farmer Instructor, will present up-to-date tips on alfalfa and clover management.

Last year's wet weather played havoc with the corn crop and many questions on diseases, standibility, fertility, insect control, etc. have arisen. Heavy use of manure and micro-nutrient imbalance have added to corn and hay yield problems.

These and other topics will be discussed.

The Union Grove School is located near Terre Hill on route 625, two miles north of route 23. For additional information call Donald Robinson, Adult Farmer Instructor, 215/445-5041.

STARTING TIME 10:30 A.M.

$5.00 OFF PER TON

ON PURINA'S #1 DAIRY RATION

TEST COW CHOW

★ MARCH 31 - APRIL 11, 1980

TEST COW CHOW
DAIRY RATION
IS PURINA'S #1
COMPLETE MILKING
RATION!

Because it is very palatable and has added energy, fresh cows can really get up and milk to their bred-in potential.

During this special 2 week period (March 31 - April 11, 1980) Purina is offering a $5.00 off discount on each and every ton of Test Cow.

We want the dairyman to take this opportunity to feed Test Cow - see how his cows really go for its palatability - see the fresh cows peak higher and hold peak production longer because of Test Cows added energy. We want you to see results!!

PURINA TEST COW IS THE MILKING RATION GOOD DAIRYMEN ARE LOOKING FOR

Purina Test Cow Chow was not developed by Purina Dairy scientists for just ordinary cows . . . nor ordinary dairymen. This high energy milk-maker was introduced to the dairy industry to be fed by the kind of good dairyman who's never satisfied with his herd's level or production.

If you are convinced that your cows have more bred into them than you are getting out of them . . . If you want to get your herd off of a production plateau . . .or if you're looking for greater return over feed cost, Test Cow, with its "super package" of nutrients, is the ration you are looking for.

CONTACT YOUR PURINA DEALER TODAY AND PLACE YOUR ORDER FOR TEST COW - LET YOUR COWS SHOW YOU THE RESULTS

TEST COW IS AVAILABLE:

- ☐ **16% - 18% Test Cow B Coarse (Hi energy pellets and Steam-Flaked Corn)**
- ☐ **16% - 18% - 20% Test Cow B Checkers (Pellets)**

☐ I want to take advantage of Purina's Special Test Cow Chow Offer.
